

Status of Published Soil Surveys

October 1, 1964

The following tabulation lists the counties and other areas in each state for which soil surveys were published between July 1, 1957, and October 1, 1964. Soil surveys for which field mapping has been completed and soil survey manuscripts submitted for publication are also included. This tabulation supplements the listing published in Highway Research Board Bulletin 22-R, July 1957.

Generally the same type of information is shown about each of the soil surveys listed in this tabulation as was given for those soil surveys listed in Bulletin 22-R. Each published soil survey on this list may be obtained from the Soil Conservation Service, either in the local office or by writing to the Information Division, Soil Conservation Service, U. S. Department of Agriculture, Washington, D. C. 20250.

The soil survey publications which contain interpretations and evaluations of the survey information specifically for engineering purposes are indicated by an asterisk (*) immediately following the name of the survey area. The date shown in the "Year" column is the year in which field survey work was completed. Under "Publication Status" three categories are listed as follows:

In Edit. -- Field work completed. Manuscript in SCS Editorial Unit.
Publication expected before April 1, 1966.

In GPO -- Maps and manuscript in Government Printing Office.
Publication expected before October 1, 1965.

Publ. -- Soil survey maps and manuscript have been published
and are available from the Soil Conservation Service.

Each survey listed has been rated according to the system used in classifying the soils, the scale and type of base maps used in field mapping, and the degree of detail in soil classification and mapping. These ratings are shown in the column headed "Rating." An explanation of each rating is given in Bulletin 22-R.

The Soil Conservation Service has revised, as of April 1, 1964, the national map showing the location and rating of published soil surveys. This is a revised edition of the map showing published soil surveys in Bulletin 22-R. Copies of the revised map have been distributed to all state offices of the Soil Conservation Service or may be obtained by writing to the Soil Conservation Service, U. S. Department of Agriculture, Washington, D. C. 20250.
