The Bus Renaissance

Intercity Travel, Bus Rapid Transit, Technology Advances, Rural Services
The National Academy of Sciences was established in 1863 by an Act of Congress, signed by President Lincoln, as a private, nongovernmental institution to advise the nation on issues related to science and technology. Members are elected by their peers for outstanding contributions to research. Dr. Ralph J. Cicerone is president.

The National Academy of Engineering was established in 1964 under the charter of the National Academy of Sciences to bring the practices of engineering to advising the nation. Members are elected by their peers for extraordinary contributions to engineering. Dr. C. D. Mote, Jr., is president.

The National Academy of Medicine (formerly the Institute of Medicine) was established in 1970 under the charter of the National Academy of Sciences to advise the nation on medical and health issues. Members are elected by their peers for distinguished contributions to medicine and public health. Dr. Victor J. Dzau is president.

The three Academies work together as the National Academies of Sciences, Engineering, and Medicine to provide independent, objective analysis and advice to the nation and conduct other activities to solve complex problems and inform public policy decisions. The Academies also encourage education and research, recognize outstanding contributions to knowledge, and increase public understanding in matters of science, engineering, and medicine.

Learn more about the National Academies of Sciences, Engineering, and Medicine at www.national-academies.org.

The Transportation Research Board is one of seven major programs of the National Academies of Sciences, Engineering, and Medicine. The mission of the Transportation Research Board is to provide leadership in transportation innovation and progress through research and information exchange, conducted within a setting that is objective, interdisciplinary, and multimodal. The Board’s varied committees, task forces, and panels annually engage about 7,000 engineers, scientists, and other transportation researchers and practitioners from the public and private sectors and academia, all of whom contribute their expertise in the public interest. The program is supported by state transportation departments, federal agencies including the component administrations of the U.S. Department of Transportation, and other organizations and individuals interested in the development of transportation.

TRANSPORTATION RESEARCH BOARD 2016 EXECUTIVE COMMITTEE*

Chair: James M. Crites, Executive Vice President of Operations, Dallas–Fort Worth International Airport, Texas
Vice Chair: Paul Trombino III, Director, Iowa Department of Transportation, Ames
Executive Director: Neil J. Pedersen, Transportation Research Board

Victoria A. Arroyo, Executive Director, Georgetown Climate Center; Assistant Dean, Centers and Institutes, and Professor and Director, Environmental Law Program, Georgetown University Law Center, Washington, D.C.
Scott E. Bennett, Director, Arkansas State Highway and Transportation Department, Little Rock
Jennifer Cohen, Secretary, Delaware Department of Transportation, Dover
Malcolm Dougherty, Director, California Department of Transportation, Sacramento
A. Stewart Fotheringham, Professor, School of Geographical Sciences and Urban Planning, Arizona State University, Tempe
John S. Halikowski, Director, Arizona Department of Transportation, Phoenix
Susan Hanson, Distinguished University Professor Emerita, Graduate School of Geography, Clark University, Worcester, Massachusetts
Steve Heminger, Executive Director, Metropolitan Transportation Commission, Oakland, California
Chris T. Hendrickson, Hamerschlag Professor of Engineering, Carnegie Mellon University, Pittsburgh, Pennsylvania
Jeffrey D. Holt, Managing Director, Power, Energy, and Infrastructure Group, BMO Capital Markets Corporation, New York
S. Jack Hu, Vice President for Research and J. Reid and Polly Anderson Professor of Manufacturing, University of Michigan, Ann Arbor
Roger B. Huff, President, HGLC, LLC, Farmington Hills, Michigan
Geraldine Knatz, Professor, Sol Price School of Public Policy, Viterbi School of Engineering, University of Southern California, Los Angeles
Ysea Llort, Consultant, Miami, Florida
Melinda McGrath, Executive Director, Mississippi Department of Transportation, Jackson
James P. Redeker, Commissioner, Connecticut Department of Transportation, Newington
Mark L. Rosenberg, Executive Director, The Task Force for Global Health, Inc., Decatur, Georgia
Kumares C. Sinha, Olson Distinguished Professor of Civil Engineering, Purdue University, West Lafayette, Indiana
Daniel Sperling, Professor of Civil Engineering and Environmental Science and Policy; Director, Institute of Transportation Studies, University of California, Davis
Kirk T. Steudle, Director, Michigan Department of Transportation, Lansing (Past Chair, 2014)
Gary C. Thomas, President and Executive Director, Dallas Area Rapid Transit, Dallas, Texas
Pat Thomas, Senior Vice President of State Government Affairs, United Parcel Service, Washington, D.C.
Katherine F. Turnbull, Executive Associate Director and Research Scientist, Texas A&M Transportation Institute, College Station
Dean Wise, Vice President of Network Strategy, Burlington Northern Santa Fe Railway, Fort Worth, Texas
James C. Card (Vice Admiral, U.S. Coast Guard, retired), Maritime Consultant, The Woodlands, Texas, and Chair, TRB Marine Board (ex officio)
T. F. Scott Darling III, Acting Administrator and Chief Counsel, Federal Motor Carrier Safety Administration, U.S. Department of Transportation (ex officio)
Marie Therese Dominguez, Administrator, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation (ex officio)
Sarah Feinberg, Administrator, Federal Railroad Administration, U.S. Department of Transportation (ex officio)
Carolyn Flowers, Acting Administrator, Federal Transit Administration, U.S. Department of Transportation (ex officio)
LeRoy Gishi, Chief, Division of Transportation, Bureau of Indian Affairs, U.S. Department of the Interior, Washington, D.C. (ex officio)
John T. Gray II, Senior Vice President, Policy and Economics, Association of American Railroads, Washington, D.C. (ex officio)
Michael P. Huerta, Administrator, Federal Aviation Administration, U.S. Department of Transportation (ex officio)
Paul N. Jaenichen, Sr., Administrator, Maritime Administration, U.S. Department of Transportation (ex officio)
Bevan B. Kirby, Research Associate, University of North Carolina Highway Safety Research Center, Chapel Hill, and Chair, TRB Young Members Council (ex officio)
Gregory G. Nadeau, Administrator, Federal Highway Administration, U.S. Department of Transportation (ex officio)
Wayne Nasiri, Acting Executive Officer, South Coast Air Quality Management District, Diamond Bar, California (ex officio)
Mark R. Rosekind, Administrator, National Highway Traffic Safety Administration, U.S. Department of Transportation (ex officio)
Craig A. Rutland, U.S. Air Force Pavement Engineer, U.S. Air Force Civil Engineer Center, Tyndall Air Force Base, Florida (ex officio)
Reuben Sarkar, Deputy Assistant Secretary for Transportation, U.S. Department of Energy (ex officio)
Richard A. White, Acting President and CEO, American Public Transportation Association, Washington, D.C. (ex officio)
Gregory D. Winfree, Assistant Secretary for Research and Technology, Office of the Secretary, U.S. Department of Transportation (ex officio)
Frederick G. (Bud) Wright, Executive Director, American Association of State Highway and Transportation Officials, Washington, D.C. (ex officio)
Paul F. Zukunft (Admiral, U.S. Coast Guard), Commandant, U.S. Coast Guard, U.S. Department of Homeland Security (ex officio)

THE BUS RENAISSANCE

3 INTRODUCTION
The Bus Renaissance: Innovations Drive a Boom
Victoria A. Perk and Dennis P. Hinebaugh
Research, technology, and innovative service strategies have contributed to maintaining the role of the bus as the workhorse of public transit and are increasing the importance of buses for local and longer-distance transportation.

4 The Decline and Revival of Intercity Bus Service
Joseph P. Schwieterman
A resurgence in intercity bus service is changing commercial competition for travelers, as new curbside operators are opening downtown-to-downtown routes of 125 to 350 miles. The author traces the industry's turnaround, its extent, the types of services, issues for planners and researchers, and more.

11 The Intercity Bus Renaissance: One Company's Experience
David Hall
The author presents the history and background of Greyhound's introduction of new brands and services—particularly BoltBus—and describes the demographic changes that led to the company's expansion of scope from rural and long-haul trips to urban center-to-urban center trips, including applications of technology platforms.

16 Bus Rapid Transit in the United States: Making Inroads
Jennifer M. Flynn
Swift and inexpensive implementation makes bus rapid transit (BRT) an attractive option for cities contending with traffic congestion and constrained budgets. The author reviews the key features of BRT, the mode's origins, federal initiatives, and examples of U.S. successes, as well as challenges, such as collisions.

22 CTfastrak Bus Rapid Transit System: Connecting Central Connecticut
Randal P. Davis

23 POINT OF VIEW
Bus Rapid Transit Works: Countering the Myths
Samuel L. Zimmerman and Herbert S. Levinson
The authors identify and debunk myths that have persisted in arguments against the adoption of BRT and cite four decades of evidence that BRT deserves serious consideration as an attractive, high-capacity, and cost-effective rapid transit investment that can improve the quality of urban living.

28 Transformative Trends in Bus Data: A Bright Future Ahead
Catherine T. Lawson
Operational data and other information routinely collected by bus systems are being put to work to assist bus riders and system planners. The creation of the General Transit Feed Specifications is a key development, but efforts are needed to take full advantage of emerging open-source data and programming capabilities, the author maintains.

31 Kansas City Pilots Microtransit: Partnership with Bridj Delivers On-Demand Bus Service
32 Automation Advancing into Transit Bus Operations: Lane Assist, Crash Avoidance—and More
Matthew Lesh

34 The Changing State of Rural Transit: Challenges, Trends, Benefits, and Innovations
Jill Hough and Jeremy Mattson
Transit agencies serving rural areas are challenged by low population densities, long travel distances, recruiting and training staff, and securing local funding. The authors describe the size and scope of rural transit, the demographic shifts, the benefits, and the technology and organizational innovations to address the challenges.
features articles on innovative and timely research and development activities in all modes of transportation. Brief news items of interest to the transportation community are also included, along with profiles of transportation professionals, meeting announcements, summaries of new publications, and news of Transportation Research Board activities.

38 NEW TRB SPECIAL REPORT
Interregional Travel: A New Perspective for Policy Making
Thomas R. Menzies, Jr.

A new TRB policy study reviews the demand for interregional travel in the United States and the uncertainties that arise in supplying transportation services and infrastructure to accommodate the demand. The study committee finds a need for analytical tools and up-to-date data on long-distance travel patterns and recommends initiatives to fill gaps in decision-making capacity.
