

# DISRUPTION VIDEO COLLECTION

2021 TRB WORKSHOP ON MEASURING AND MANAGING FREIGHT SYSTEM RESILIENCE

In support of the TRB Workshop on Measuring and Managing Freight System Resilience, a selection of video and still images of specific transportation disruptions caused by natural hazards has been assembled by the planning committee and is listed below. Some of these were captured by amateurs, others by professionals, and so quality varies. Links to mass media news programs include commercials and other promotions, and of course, these do not represent endorsements by the Transportation Research Board or NASEM.

## FLOODS

- BNSF video on damage from floods 2019 Midwest
