

PARTNERSHIP OPPORTUNITIES FOR TRANSPORTATION AGENCIES

Opportunities are developing for transportation agencies to partner with SHRP 2 research teams as new research products are being developed. There are opportunities to participate in invitational design exercises and working sessions, to provide data and expertise, and to host demonstration projects. Others are likely to emerge as research continues and they will be announced on this Web page. Please contact the listed SHRP 2 staff officer for specific information about how to get involved. [Current partnership opportunities.](#)

SHRP 2 Partnership Opportunities	Contact
Capacity C01 and Capacity C18 : In project C01, tabletop trials and pilot projects of the Collaborative Decision-Making Process to assess and re-invent procedures for planning, programming, environmental review, and permitting processes. One trial opportunity will be selected in each AASHTO region and at least three pilots are planned in project C18.	Stephen Andrle
Capacity C21 : Project C21 provides an opportunity for state DOTs and other agencies to pilot test the ecological approach and business model to environmental protection that will be developed in projects C06-A and C06-B.	Stephen Andrle
Renewal R04 : Host sites are being sought for a fall 2010 demonstration project in project R04 for standardized approaches to designing, constructing, and reusing bridge components and complete bridge systems.	Monica Starnes
Renewal R07 : Candidate highway renewal projects are sought for 2010 demonstration of performance specifications and strategies to equitably manage and minimize short- and long-term risk in rapid highway renewal projects through project R07.	James Bryant
