

The following graphs show the altitude, speed, and thrust profiles of the new arrival procedures generated during this project. The title of each graph indicates the AEDT ANP aircraft type and the name of the target candidate altitude profile that was generated to match the broader set of radar data (See Section 3.2.7). For reference, each graph also shows the standard arrival altitude profile, as well as the raw and simplified target altitudes.

- StdX - Gray solid lines with dots represent the output altitude profile for the standard procedure, where “X” represents stage length.
- Simple Targets - Black squares represent the simplified target altitudes.
- Raw Targets - Gray circles represent the target altitudes.
- StdThr,StdWgt:FitThr - Green solid lines with dots represent the output thrust profile of the new procedure.
- StdThr,StdWgt:FitSpd - Red solid lines with dots represent the output speed profile of the new procedure.
- StdThr,StdWgt;FitAlt - Blue solid lines with dots represent the output altitude profile of the new procedure.
