From Starter Lines to Growing Systems

9th National Light Rail Transit Conference

November 16–18, 2003
Portland, Oregon

Sponsors
American Public Transportation Association
Transportation Research Board

2003 LRT CONFERENCE PLANNING COMMITTEE

John Schumann, Chair
Chair, TRB Committee on Light Rail Transit
Secretary, APTA Light Rail Transit Technical Forum
Senior Transportation Consultant, LTK Engineering Services

Melvin Clark, Co-Chair
Chair, APTA Light Rail Transit Technical Forum
Director, Rail Transportation, Los Angeles County Metropolitan Transportation Authority

John M. Andreas, Faiveley Rail, Inc.
Laura J. Andres, Egis Semaly
Toni Bates, San Diego Association of Governments
Cameron Beach, Sacramento Regional Transit District
Ann Becklund, Tri-County Metropolitan Transportation District of Oregon
J.W. (Jack) Boorse, Parsons Brinckerhoff
Glen D. Bottoms, Federal Transit Administration
Barbara J. Boylan, Massachusetts Bay Transportation Authority
John D. Byrd, Orange County Transportation Authority
Thomas J. Carmichael, Los Angeles County Metropolitan Transportation Authority
John D. Claflin, Triangle Transit Authority
K.C. Cooper, Tri-County Metropolitan Transportation District of Oregon
T.R. (Tom) Hickey, Parsons Brinckerhoff

Aaron C. James, Sr., Jas-TEC
Debra Jones, Jones & Stokes Associates, Inc.
Charles Joseph, Sound Transit
Rodney W. Kelly, Parsons Corporation
Thomas F. Larwin, San Diego Association of Governments
Francis E. Loetterle, Metropolitan Council
Frank T. Martin, Santa Clara Valley Transportation Authority
Linda J. Meadow, Linda J. Meadow & Associates
Douglas B. Moore, Burgess & Niple, Limited
Jeffrey D. Mora, Federal Transit Administration
Paul O’Brien, Utah Transit Authority
Steven E. Polzin, Center for Urban Transportation Research, University of South Florida
Gregory Thompson, Florida State University
John D. Wilkins, New Jersey Transit Corporation

David R. Phelps, APTA Representative
Peter L. Shaw, TRB Representative
Fred Scharf, TRB Program Assistant

The Transportation Research Board is a division of the National Research Council, which serves as an independent adviser to the federal government on scientific and technical questions of national importance. The National Research Council, jointly administered by the National Academy of Sciences, the National Academy of Engineering, and the Institute of Medicine, brings the resources of the entire scientific and technical community to bear on national problems through its volunteer advisory committees.

The Transportation Research Board is distributing this Circular to make the information contained herein available for use by individual practitioners in state and local transportation agencies, researchers in academic institutions, and other members of the transportation research community. The information in this Circular was taken directly from the submissions of the authors. This document is not a report of the National Research Council or of the National Academy of Sciences.
Foreword

Experience, Economics and Evolution—From Starter Lines to Growing Systems” is this year’s joint national conference on light rail transit (LRT), the ninth such meeting. At the first conference, held in Philadelphia in June 1975, the technical sessions focused on introducing—or reintroducing—the concept of LRT in North America.

Now, 28 years later, 16 new systems have joined the 8 original systems (in operation prior to 1975)—a total of 24 North American LRT systems are now in operation. In addition, there are 36 projects in planning or conceptual design, 15 in final design, and 22 in construction.

The focus and related topics of the previous eight national conferences have paralleled the development and reintroduction of LRT in North America:

- Light Rail Transit: Planning and Technology—second national conference, Boston, Massachusetts, 1978;
- Light Rail Transit: New System Successes at Affordable Prices—fifth national conference, San Jose, California, 1988;
- Light Rail Transit: Planning, Design, and Operating Experience—sixth national conference, Calgary, Canada, 1992;
- Building on Success, Learning from Experience—seventh national conference, Baltimore, Maryland, 1995; and

The technical information contained in the proceedings of these conferences (1–8) provides planners, designers, decision makers, and operators with a valuable collection of experiences and ingredients necessary for a successful transit development project.

The ninth national conference focuses on the planning, design, construction, operation, maintenance, and administration of LRT systems. Thus, the Conference Steering Committee decided that the conference title should be “Experience, Economics and Evolution—From Starter Lines to Growing Systems.” A wealth of technical material is offered at the conference. There are 16 sessions; several technical tours of Portland area transit construction, operations, and related development; and 52 papers presented at the conference and published in this compendium. The papers were peer-reviewed by members of the Light Rail Transit Committee in an anonymous online process.

The Transportation Research Board (TRB) and the American Public Transportation Association (APTA) are conference cosponsors. This partnership, started in 1994 in preparation for the 1995 conference, is a formal recognition of the mutual and supportive respect for joint aims and purposes in a cooperative conference venture. TriMet—Tri-County Metropolitan Transit District of Oregon—provided invaluable assistance as the host organization for the ninth joint conference.
The objective of each of these conferences is to add to the growing body of knowledge and real-world experiences with modern LRT applications in order to improve continually new systems being planned, as well as those already in operation.

Success can be fleeting, and we need to learn from past and current experience in order to do the best possible job of providing cost-effective public transportation services. The information, data, and research contained in this proceeding are meant to serve this need.

—John Schumann
LTK Engineering Services
Chair, Conference Planning Committee
Chair, TRB Committee on Light Rail Transit
Secretary, APTA Light Rail Transit Technical Forum
