

e-Navigation and practical applications to monitor and improve the Marine Transportation System

TRB-CMTS R&D Conference 26 June 2012
Diagnosing the Marine Transportation System:
Measuring Performance and Targeting Improvement

BUILDING STRONG®

Overview

- e-Navigation
- US e-Navigation Strategy
- Emerging e-Navigation capabilities
 - ▶ River Information Services
 - ▶ Lock Operations Management Application
- Applying e-Navigation to improve the MTS

e-Navigation

International definition:

*“e-Navigation is the **harmonised collection, integration, exchange, presentation and analysis of maritime information** onboard and ashore by electronic means to enhance berth to berth navigation and related services, for safety and security at sea and protection of the marine environment”*

MSC85/26/Add.1 annex 20

BUILDING STRONG®

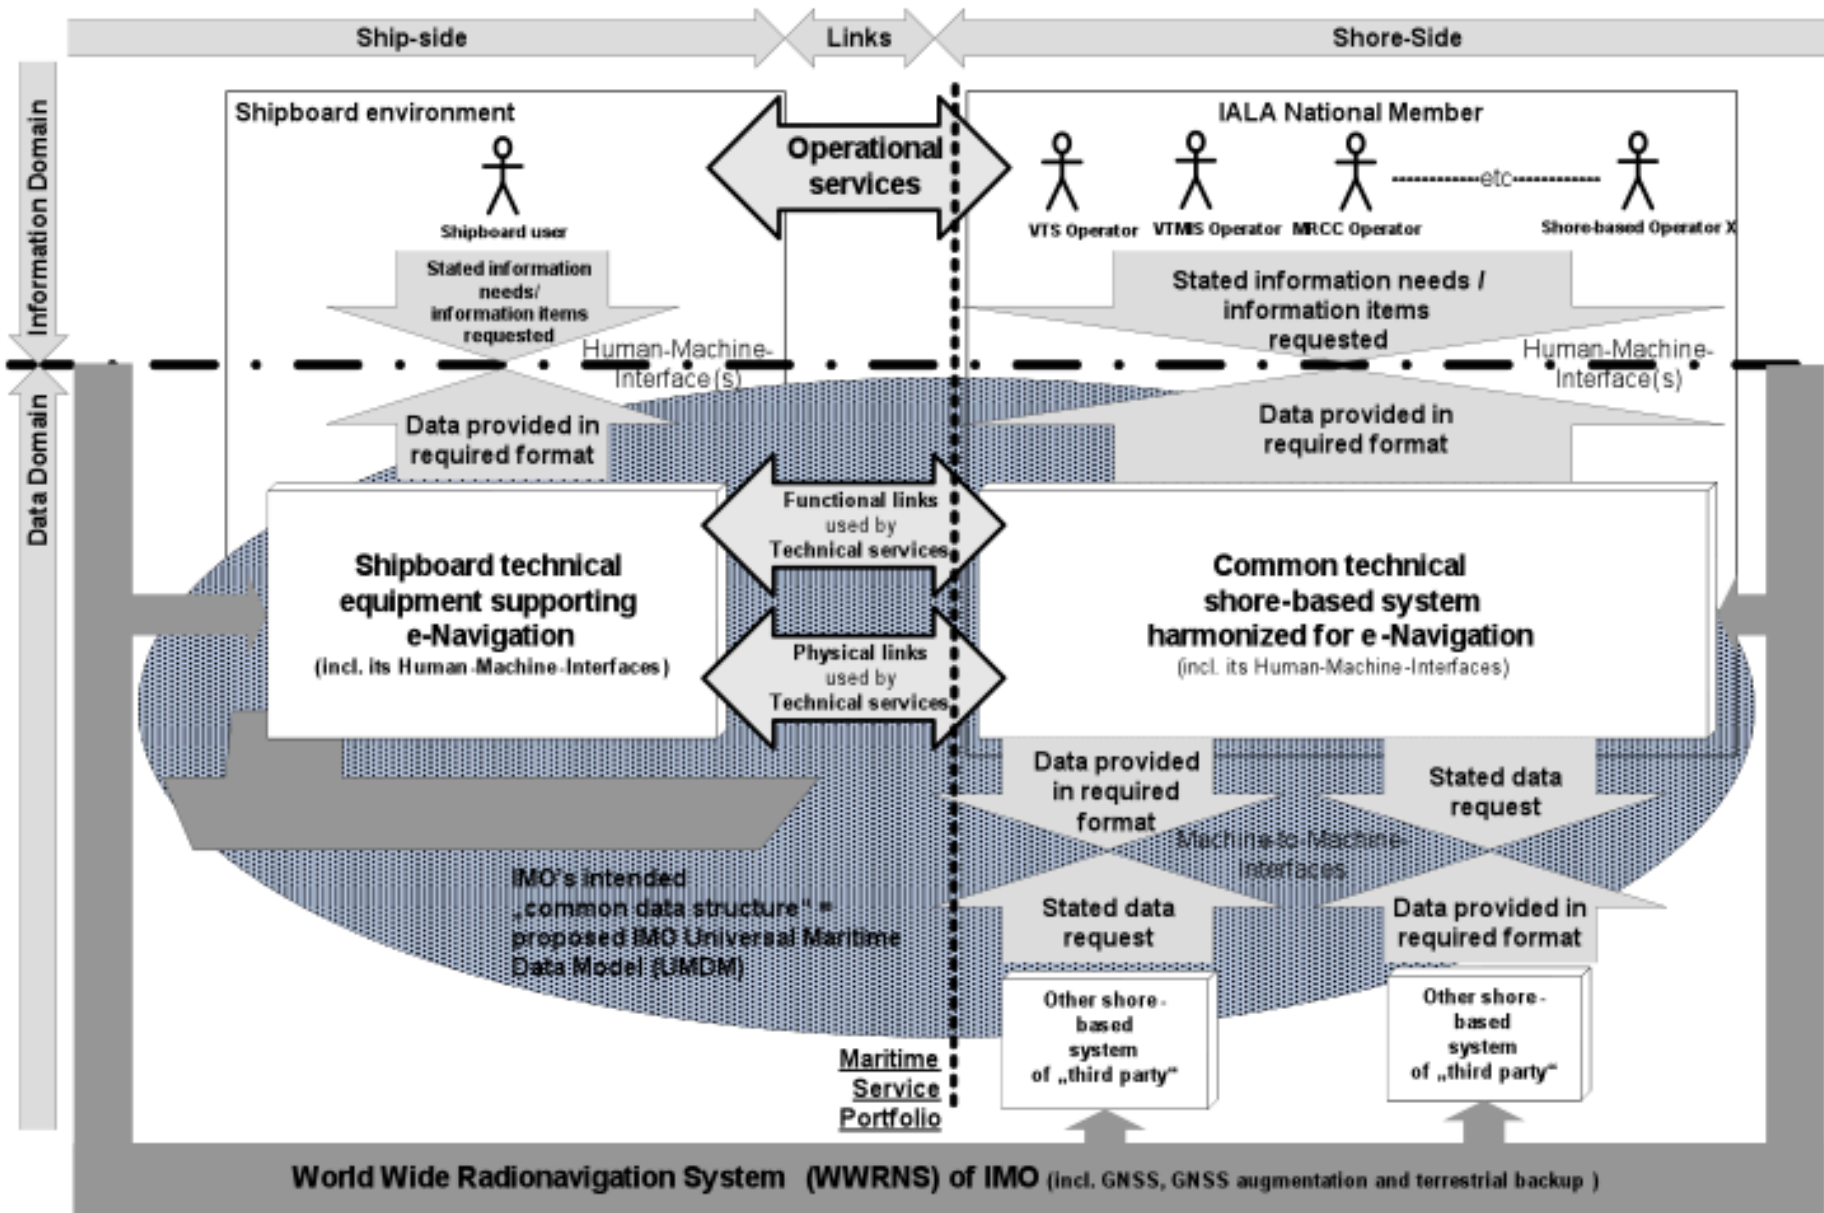

Figure 4 The overarching e-Navigation architecture – complete presentation

e-Navigation: “three sides of the coin”

“harmonized collection,
integration, exchange,
presentation and analysis
of maritime information

onboard”

“harmonized collection,
integration, exchange,
presentation and analysis
of maritime information

ashore”

“Information Paper on the Draft IALA Recommendation e-Nav 140 on e-Navigation Architecture – the shore perspective”

BUILDING STRONG®

Key elements of e-Navigation

- Standard technology onboard and ashore
 - ▶ Provides commonality for users and known capabilities
- Communications capabilities
 - ▶ Flexible wireless comms, adaptable to dynamic needs
 - ▶ AIS, VHF Data Exchange, WiMAX, etc.
- Data architecture
 - ▶ Common understanding - “speak the same language”
 - ▶ Authoritative data sources/stewards

International e-Navigation implementation

Proposed joint plan of work for the COMSAR, NAV, and STW sub-committees

A coordinated approach to the implementation of IMO's e-navigation strategy overall planning 2012-2014 by strategy element.

Meetings	2012					2013				2014				
	COMSAR 16	STW 43	MSC 90	NAV 58	MSC 91	COMSAR 17	STW 44	MSC 92	Nav59	COMSAR 18	STW 45	MSC 93	NAV 60	MSC 94
User Needs														
Overarching Architecture														
Gap Analysis	Correspondence Group			Final										
C-B and Risk Analysis						Correspondence Group		Final						
Strategy Implementation Plan	2012 : Intersessional WG (to be decided)			Updated outline		2012 : Intersessional WG (to be decided)			Updated outline	Correspondence Group			Final	Adoption

NAV 57/15 annex 6

BUILDING STRONG®

US CMTS

e-Navigation Strategic Action Plan

Published February 2012

Principles:

- Action – from concept to capabilities
- Alignment with international efforts
- Built on existing capabilities
- User needs

Activities:

- CMTS e-Nav IAT established March 2012
- Initial work plan approved 12 Jun 12

BUILDING STRONG®

CMTS e-Nav Integrated Action Team Work Plan

CMTS e-Navigation IAT – Work Plan			
Task	Responsible Party(ies)	Target Completion	Status
Develop Implementation Plan	Co-Chairs	15 May 12	Completed
Develop Initial Work Plan	Co-Chairs	29 May 12	Completed
Develop Initial Capabilities Inventory	e-Nav IAT	1 Oct 12	Pends
Identify e-Navigation Accomplishments/Successes	Co-Chairs	29 May 12	Completed
Inventory e-Navigation-related Regulations	e-Nav IAT	15 Aug 12	Pends
Identify Key Stakeholders	e-Nav IAT	15 Sep 12	Pends
Conduct Stakeholder Outreach; Participate in e-Navigation Conferences	e-Nav IAT	Ongoing	Pends
Identify Stakeholders' Requirements	e-Nav IAT	Ongoing	Pends
Review and Compare IMO Gap Analysis to inventory results	e-Nav IAT	Jan 2013	Pends
Identify collaborative opportunities to deliver short-term value added e-Navigation Products and Services	e-Nav IAT	Ongoing	Pends

CMTS e-Nav Integrated Action Team

Significant events

CMTS e-Navigation Significant Events	
CMTS e-Navigation Strategic Action Plan Finalized	Feb 2012
CMTS e-Navigation IAT Approved by CB	13 Mar 2012
CMTS e-Navigation IAT Terms of Reference Approved by CB	13 Mar 2012
CMTS e-Navigation IAT Inaugural Meeting	19 Mar 2012
HSC/RIS Workshop (Pittsburgh)	Aug 2012
RTCM Conference (Orlando)	Sep 2012
Dredging 2012 (San Diego)	Oct 2012
e-Nav Conference (Seattle)	Nov 2012

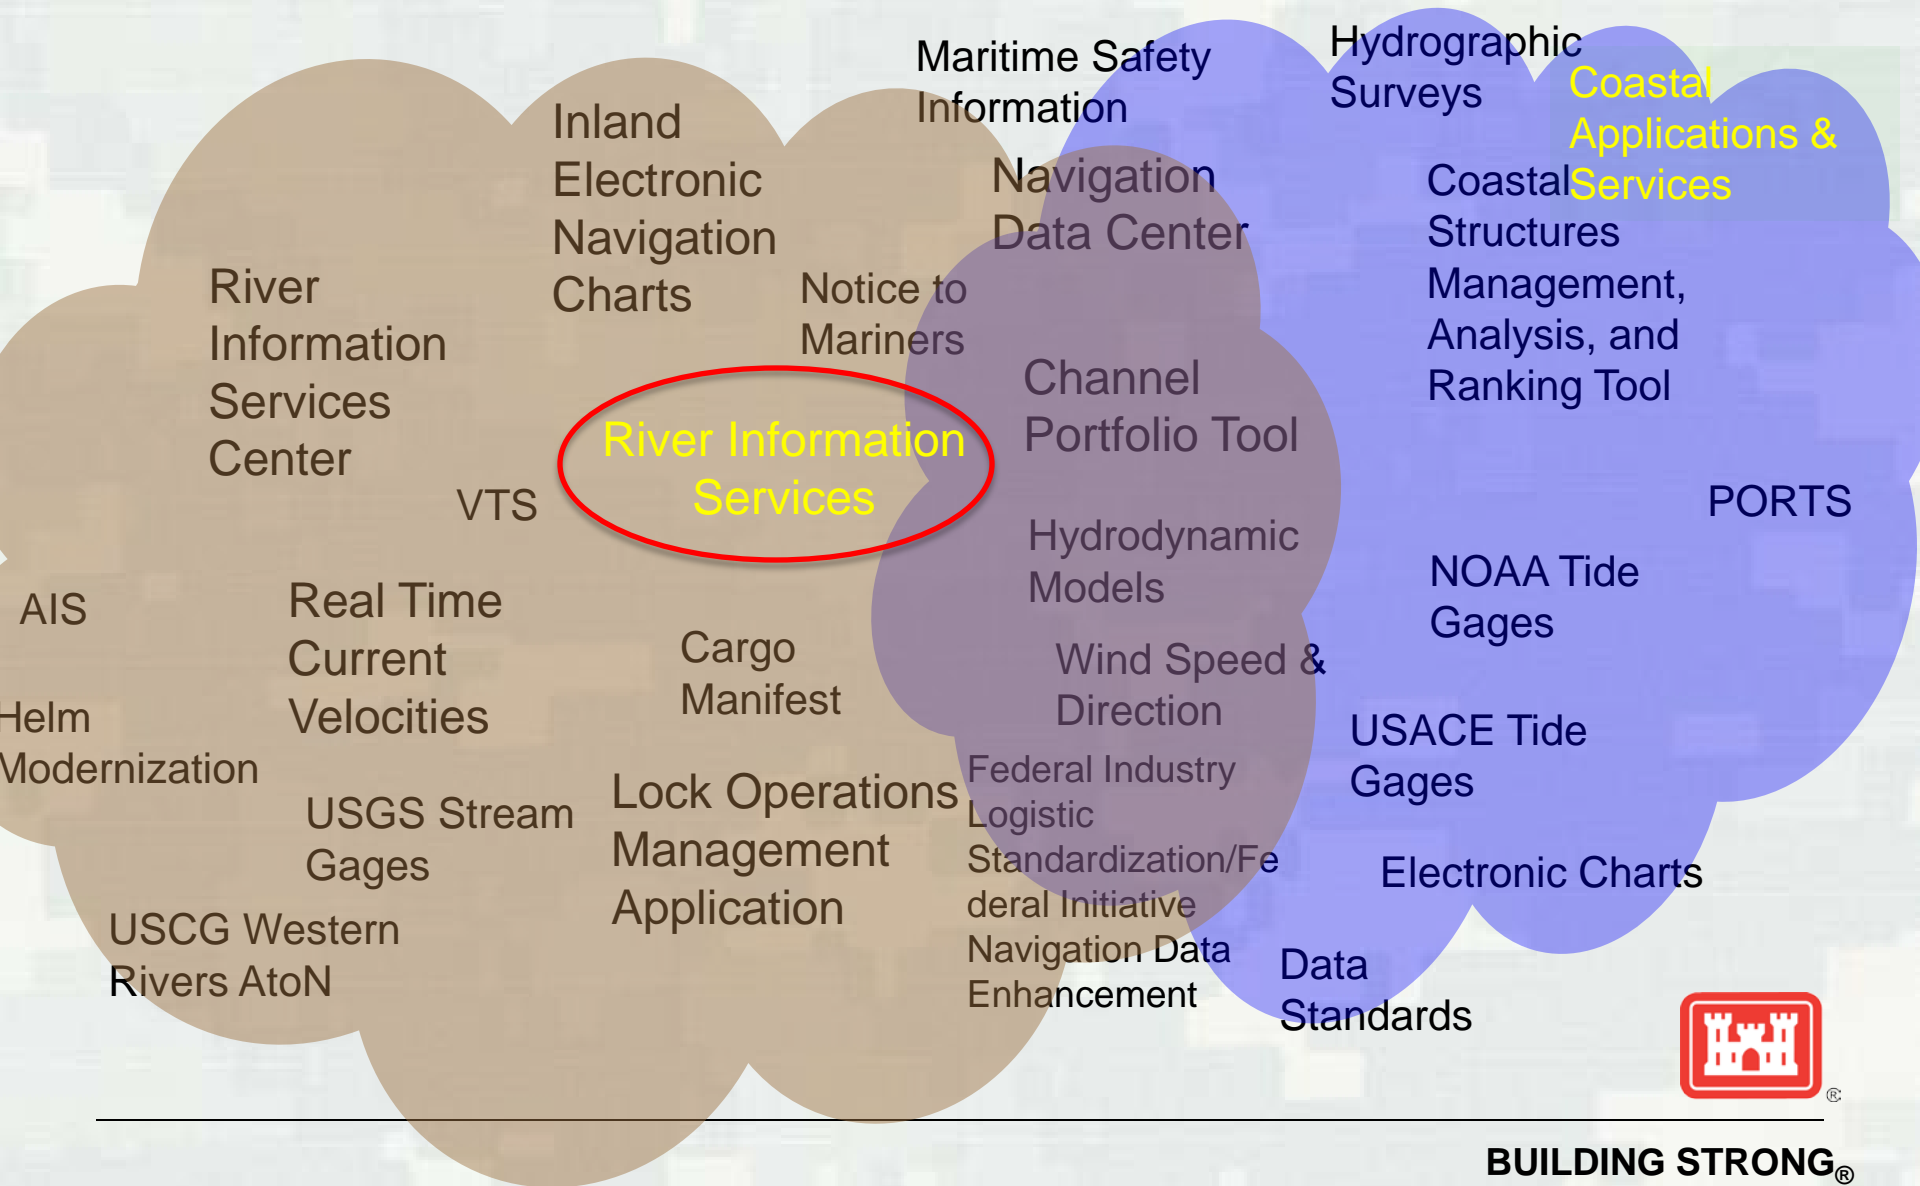

Next e-Nav IAT meeting: 16 July 2012

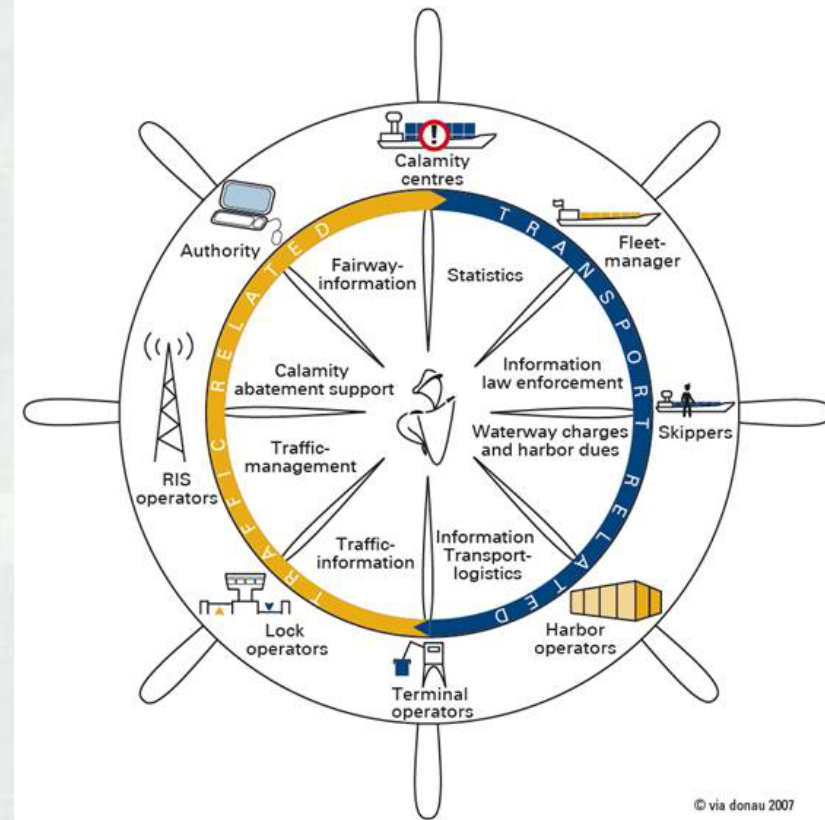

Existing capabilities

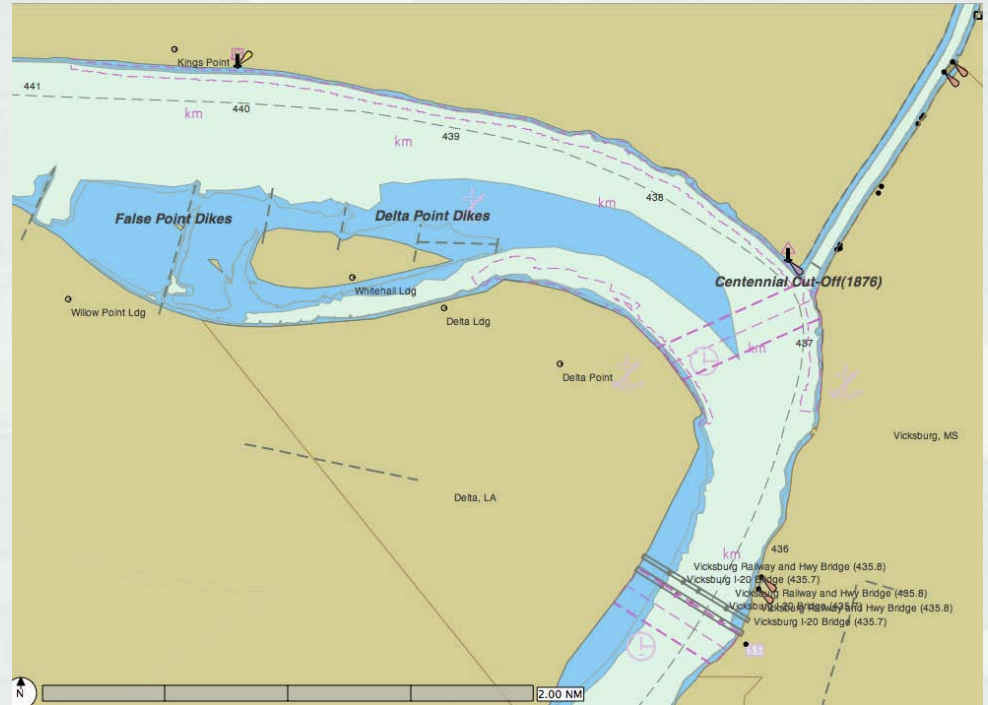

Main functions of RIS

- Fairway information services
 - ▶ IENCs
 - ▶ Notices to Skippers
- Vessel traffic information services
 - ▶ Traffic monitoring
- Traffic management
 - ▶ Lock management
- Calamity abatement support
 - ▶ Support for responders
- Transport logistics support
 - ▶ Voyage information
 - ▶ Electronic cargo reporting
 - ▶ Voyage planning
 - ▶ Navigation Notices/Notices to Mariners

RIS Key Technologies

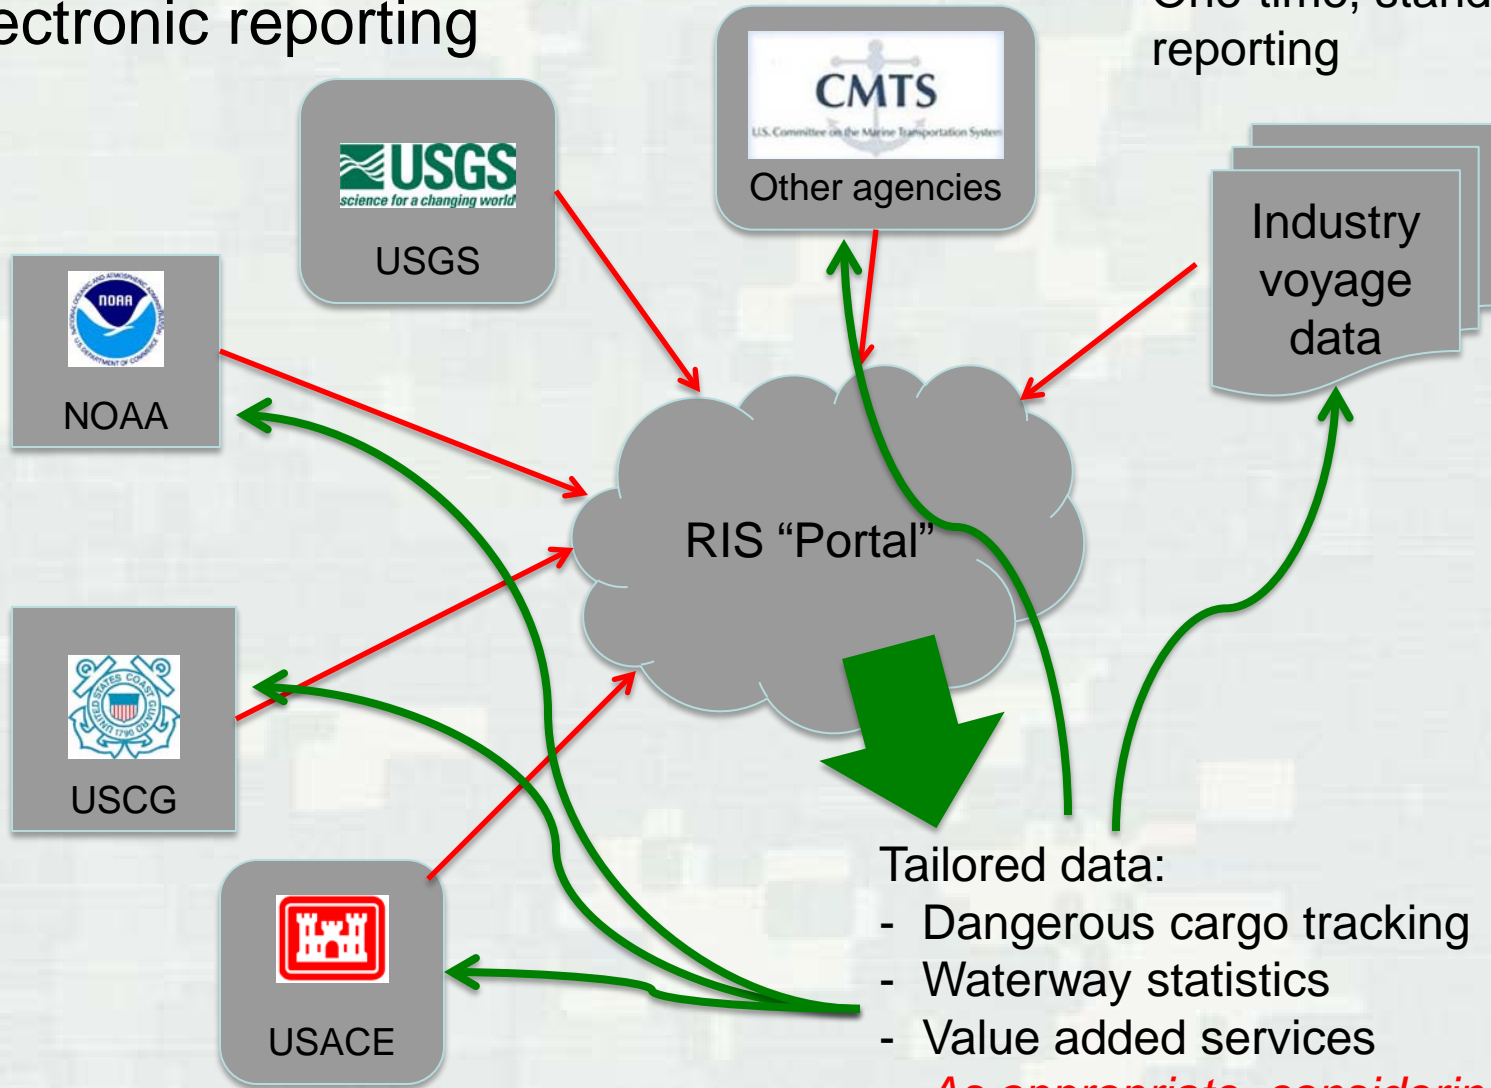

- Inland ECDIS
 - ▶ IENCs
- Inland AIS
 - ▶ LOMA, USCG NAIS
- Electronic Reporting
 - ▶ Industry, interagency
- Notices to Skippers
 - ▶ Harmonization between USACE and USCG
- RIS Index
 - ▶ FILS/FINDE, Master Docks+

U.S. RIS concept

electronic reporting

One-time, standardized reporting

Tailored data:

- Dangerous cargo tracking
- Waterway statistics
- Value added services
- *As appropriate, considering protection of information*

US RIS Implementation

- Build on existing capabilities
 - ▶ USACE: LOMA, FILS/FINDE*, LPMS
 - ▶ USCG: Vessel data, NAIS services
 - ▶ NOAA/USGS: met/hydro obs and predictions
- Start providing services
 - ▶ “low hanging fruit”
 - ▶ Lock operational information
 - ▶ Water levels, met/hydro observations and forecasts
- Establish a RIS Center
 - ▶ Public-private partnership
 - ▶ Personnel

* Session 3B, Weds 11:00 am, Room 120

BUILDING STRONG®

Lock Operations Management Application (LOMA)

- Purpose:
 - ▶ Provide end users information needed for decision support
- Goals:
 - ▶ Increase lock operator situational awareness
 - ▶ Provide vessel operators better information
 - ▶ Provide better information to Corps management
 - ▶ Exchange information with external users
- AIS is the central LOMA technology

Automatic Identification System (AIS)

Self Organizing Time Division Multiple Access

4500+ rpts per minute...

...1101010110101..0010101001....

Dynamic (2-10 sec)

- MMSI / IMO#
- POSITION
- ACCURACY (+/-10m)
- UTC
- COURSE (COG)
- SPEED (SOG)
- HEAD
- NAV STA
- RATE OF

GPS, Nav sensors

- VESSEL NAME
- LENGTH / BEAM
- TYPE OF SHIP
- ANTENNA LOCATION
- HEIGHT OVER KEEL *

Voyage Related

- DRA
- HAY ONBOARD
- ETA
- ROUTE
- PEOPLE ON BOARD *

Heading Rate of Turn Other sensors

- SHORT TEXT MESSAGES *

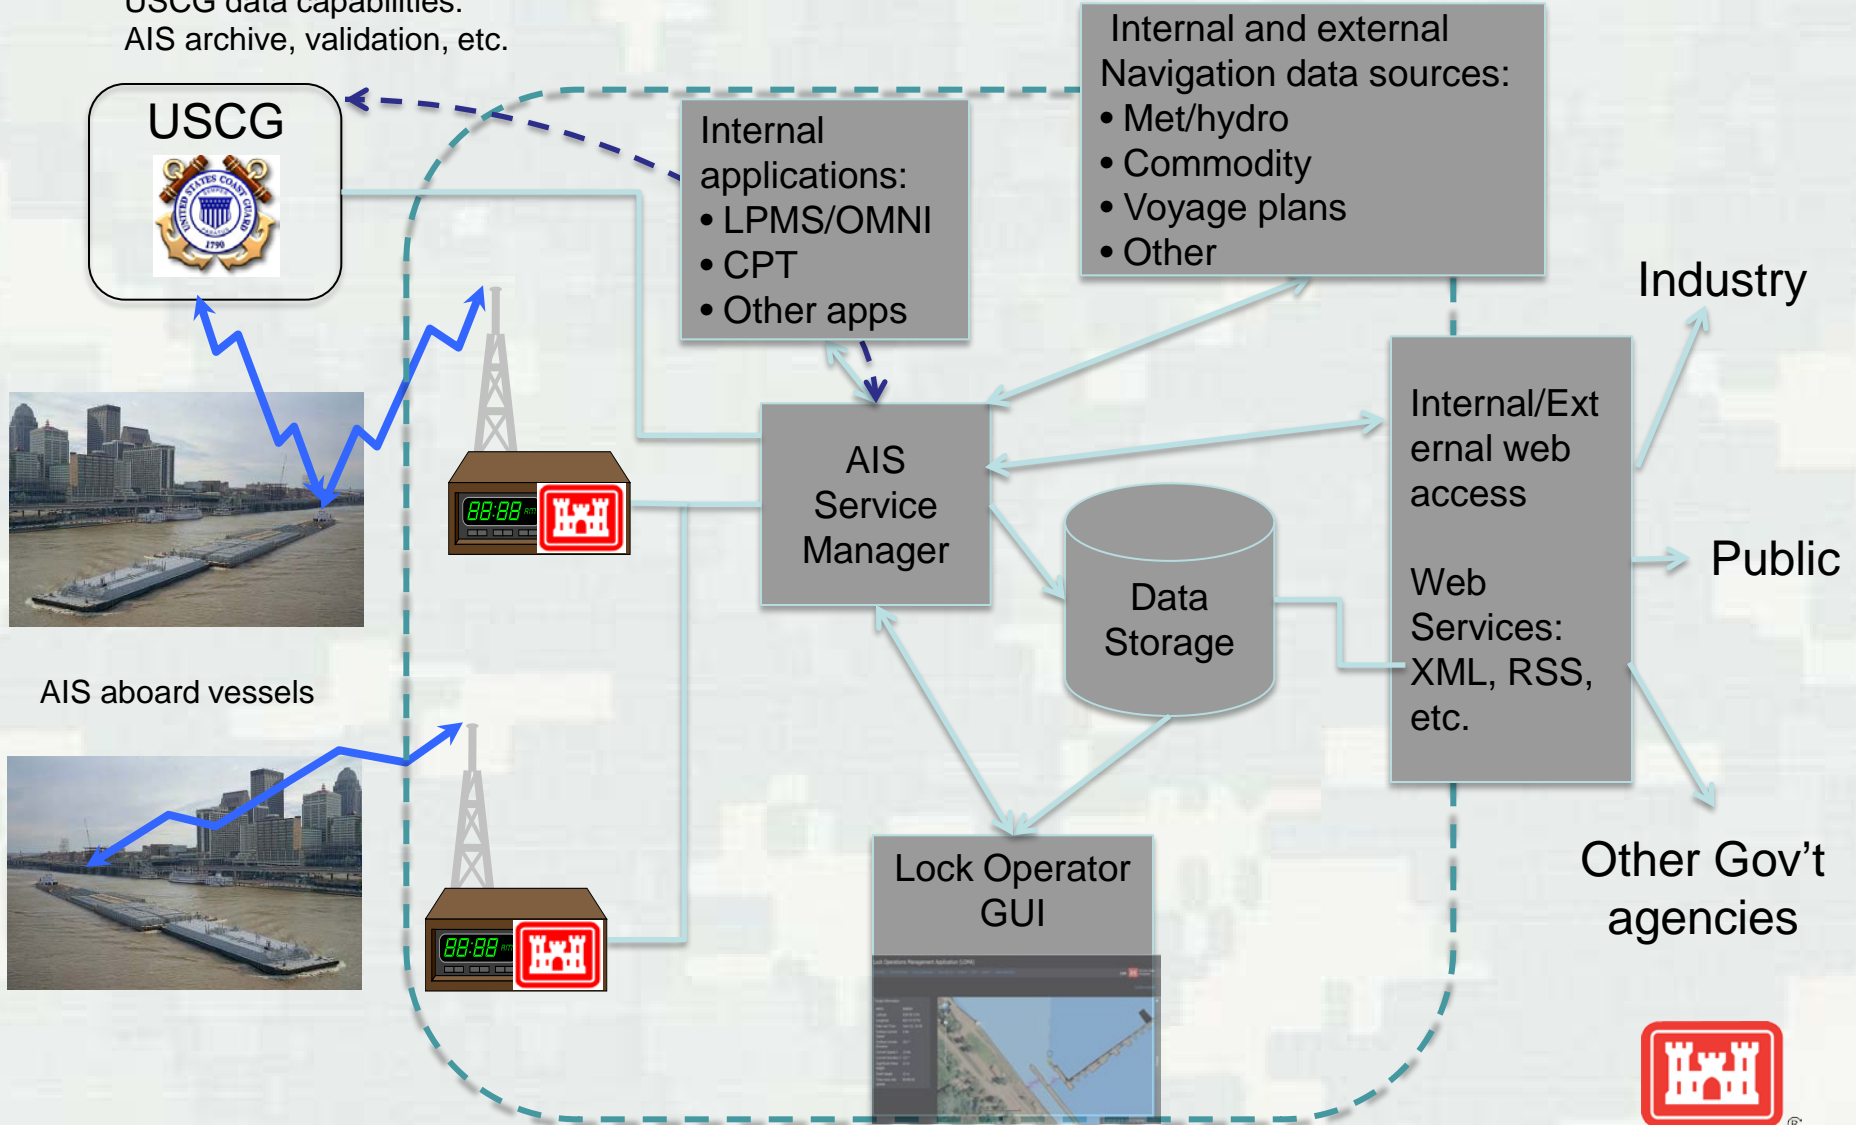

Additional Functions

- Binary Applications
- Telecommands

LOMA overview

USCG data capabilities:
AIS archive, validation, etc.

LOMA AIS equipment deployment June 2012

Current LOMA Capabilities

- Lock operator situational display
- AIS vessel information
- Zone management
- Playback capability

LOMA (Lock Operations Management Application)

Target Information

Name	EVA KELLEY
MMSI	367402950
Callsign	WDE8218
Latitude	037°53'33"N
Longitude	086°43'46"W
SOG	2.7
Heading	98
COG	106.9
Nav Status	Undefined
Operating Mode	Autonomous
Destination	
Length	34
Beam	8
Type of Ship	Vessel
Type of Cargo	N/A
IMO Number	0
Draught	0
Nav Sensor	Undefined
DTE Status	Available

Developing Capabilities

- Integration with other systems

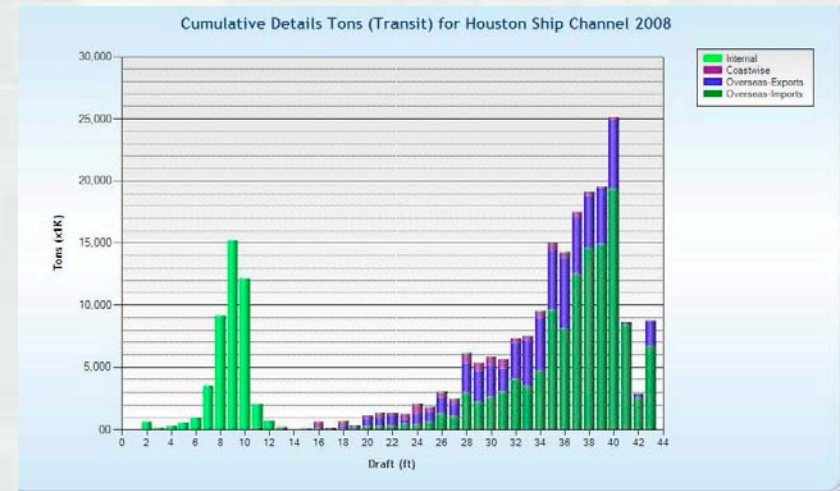

- Channel Portfolio Tool*
- SMARTGate

- Industry data

- Approaching tow information

- Real time met/hydro information

- Sensors
- Observations
- Predictions

* Session 2A, rm 118 (now)

Target Information

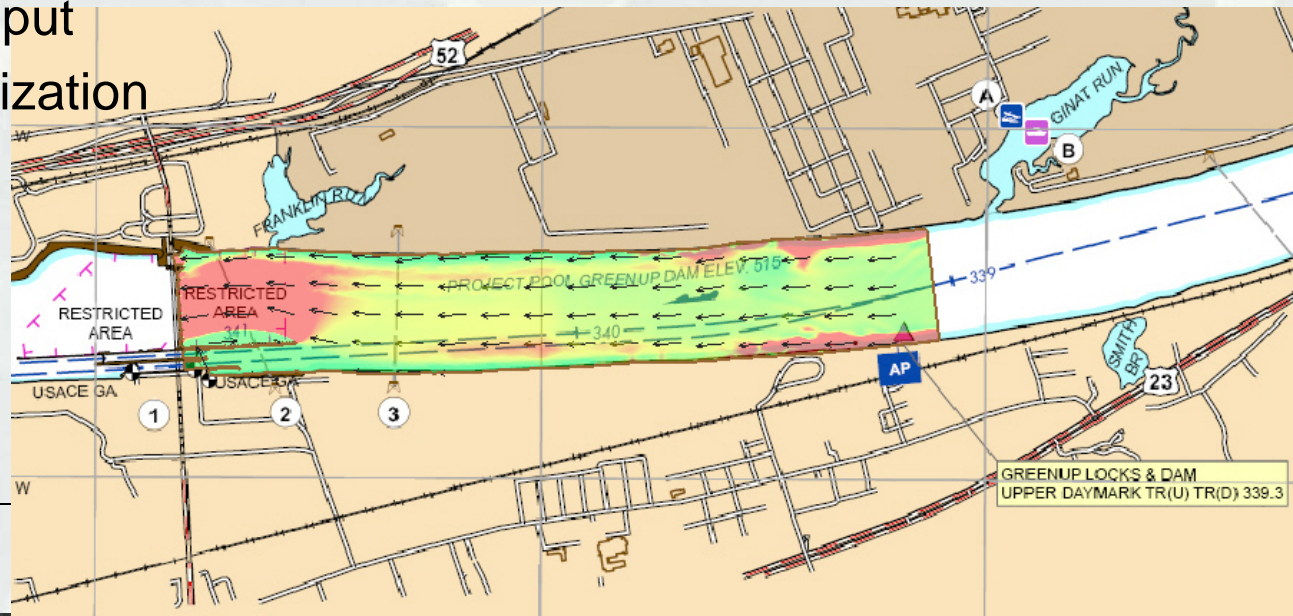

MMSI	568859
Latitude	039°38'16"N
Longitude	091°14'57"W
Date and Time	June 22, 10:30
Surface Current Speed	7 kts
Surface Current Direction	135 °
Current Speed 2	12 kts
Current Direction 3	127 °
Significant Wave Height	12 m
Swell Height	12 m
Time since last update	00:01:15

BUILDING STRONG®

Future Capabilities: Predictive tools

- Hydrodynamic modeling
 - ▶ Historical observations and analysis
 - ▶ Match to historical AIS tracks – provide suggested vessel approach
- River system optimization
 - Transit time
 - Long term predications
 - Maximize throughput
 - Emergency prioritization

Applying e-Nav to measure and improve the MTS

- e-Nav mainly deals with “real-time” information
- However...
 - ▶ Data architecture
 - ▶ Standards
 - ▶ Communication and interface
- Some examples and possibilities...

Real-time monitoring and management

Targets in Carp Barrier

Targets in Louisville Upstream

Targets in Lock & Dam 22 - Locking

BUILDING STRONG®

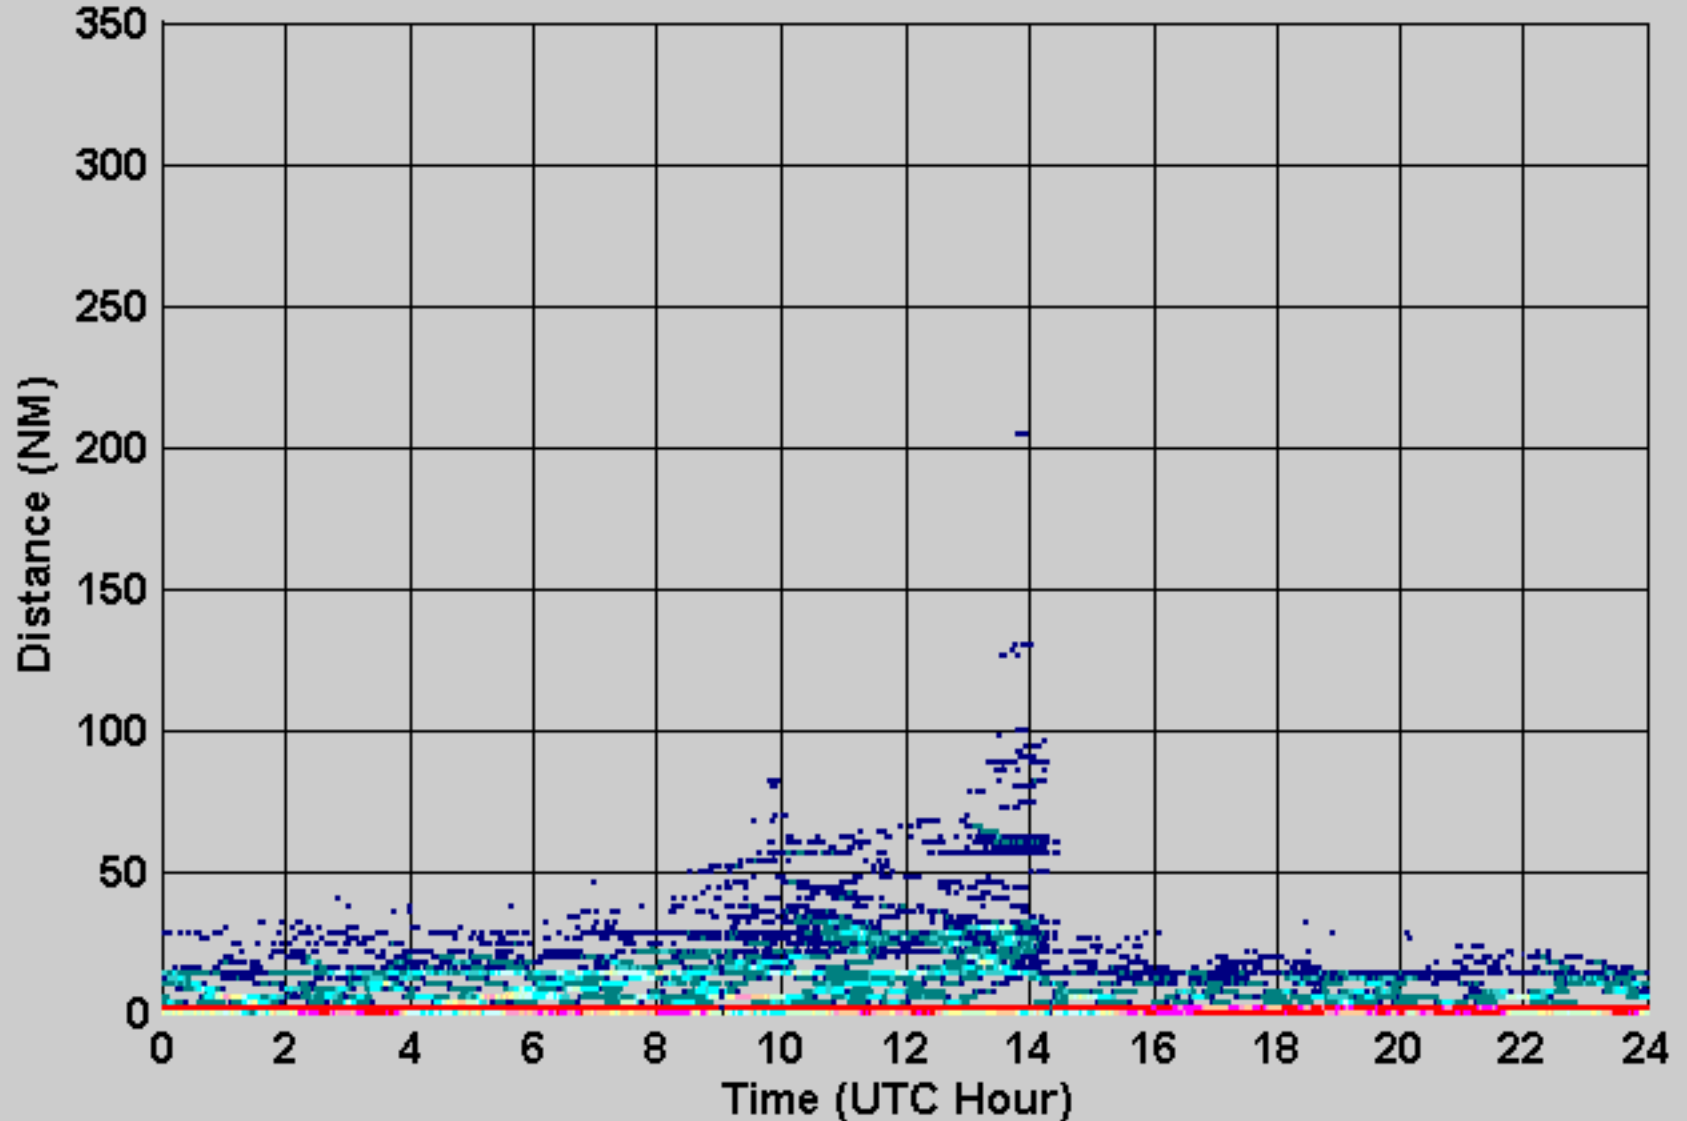

Heat maps (and beyond)

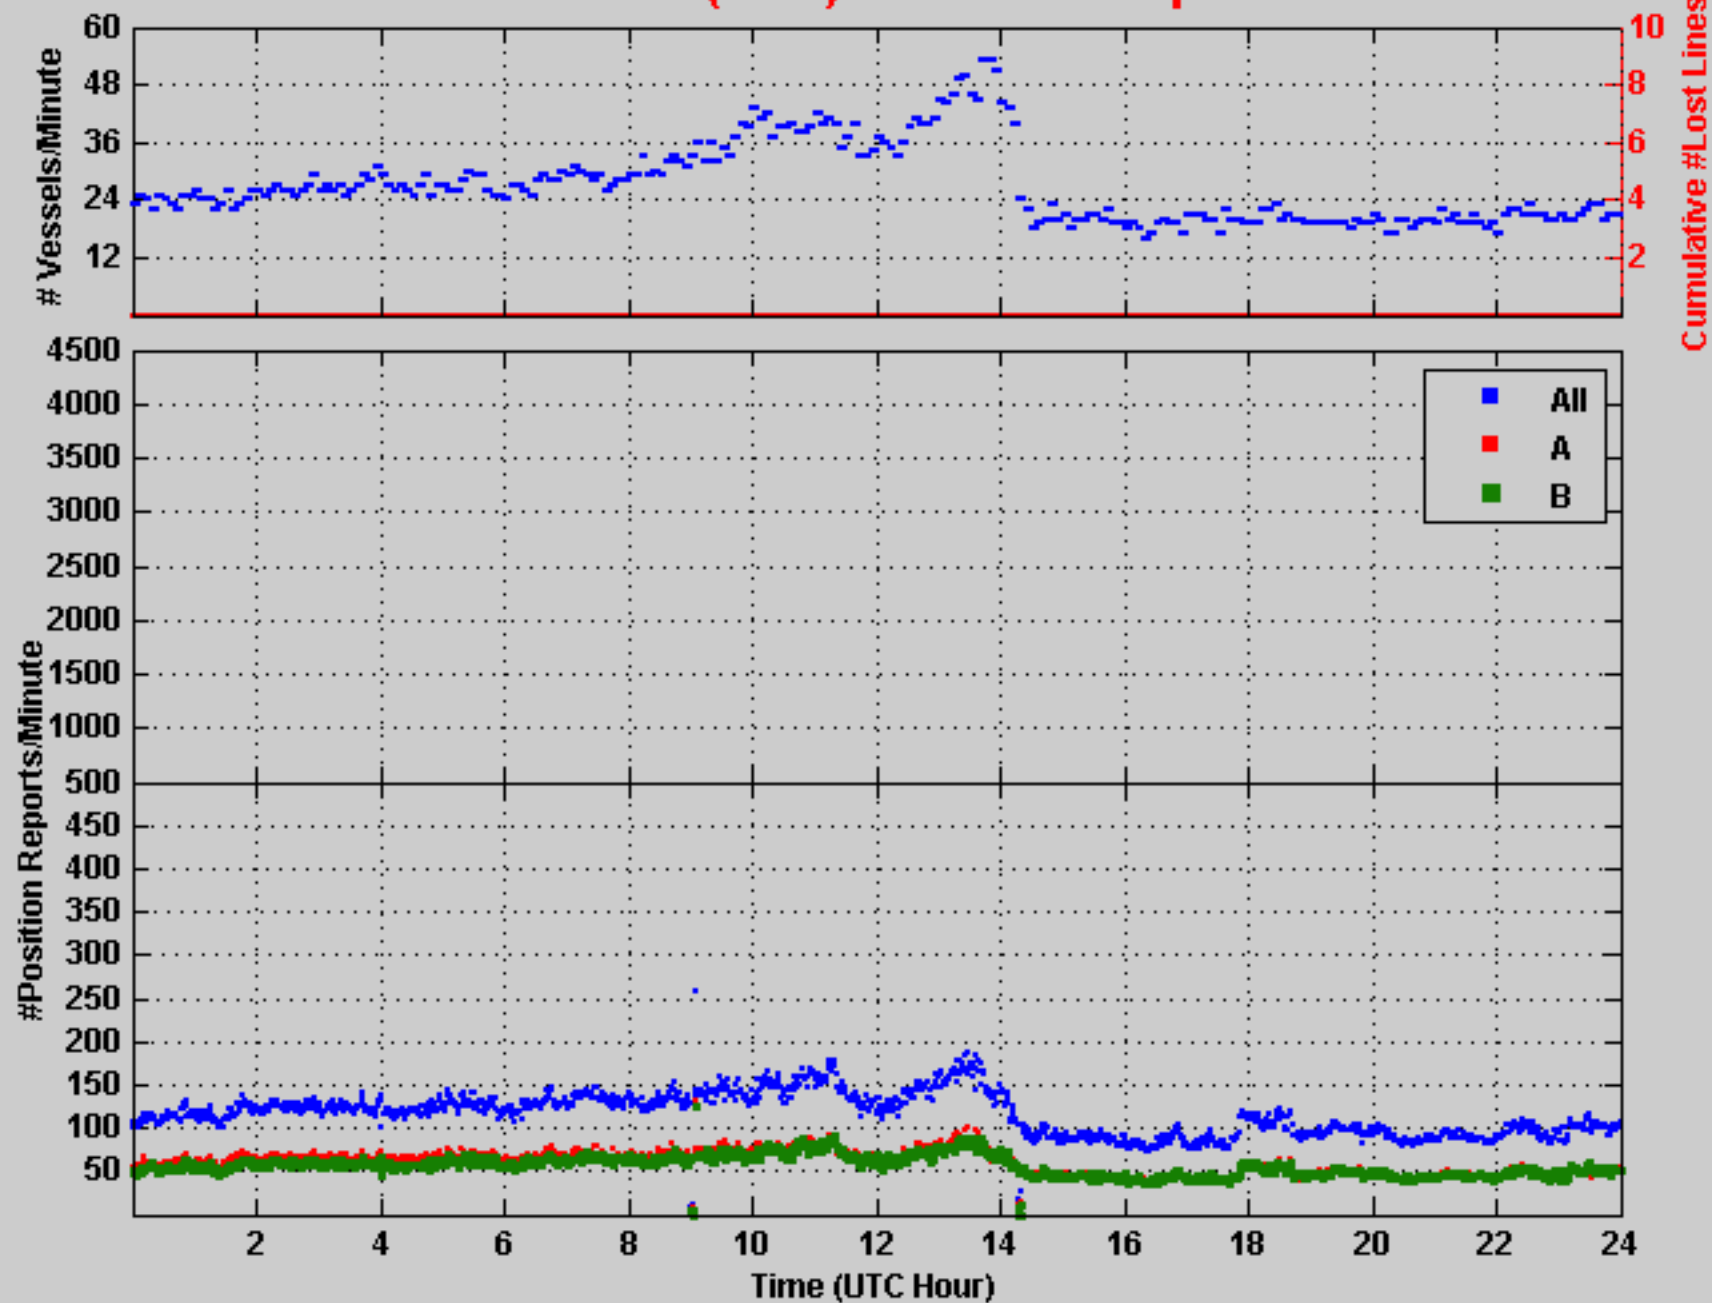

Num Unique Vessels: 76 Min Time Stamp: 12/31/2008 11:59:37 PM Max Time Stamp: 1/31/2009 11:59:07 PM

Analysis

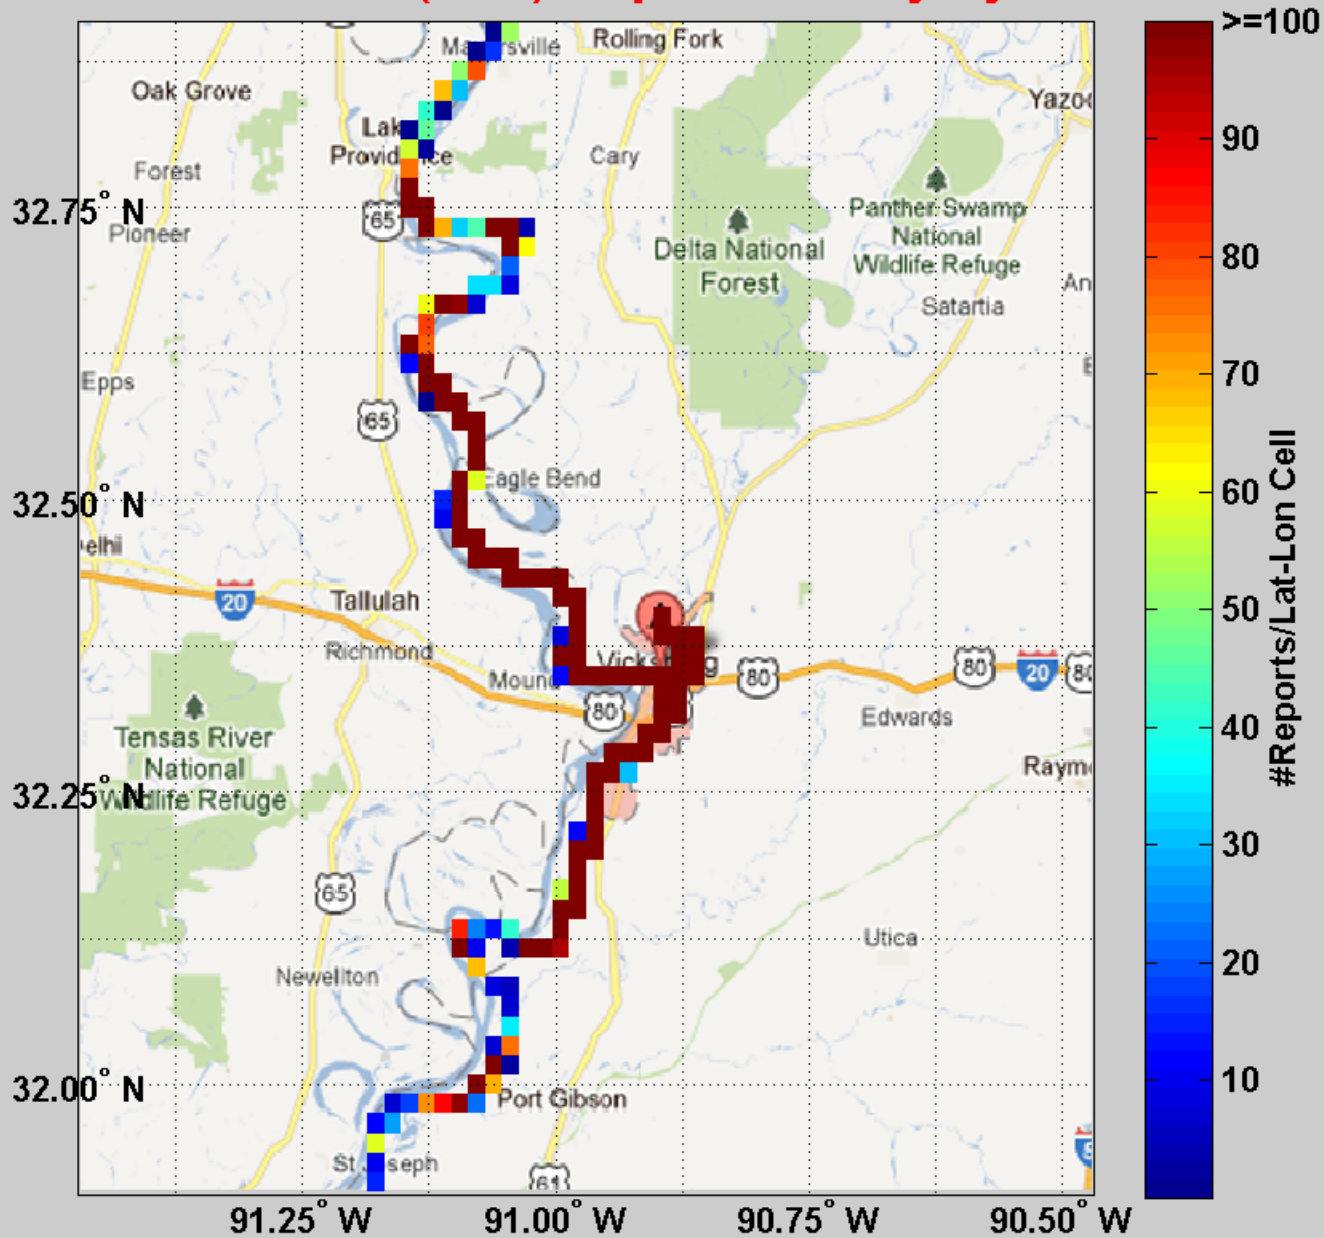

22 Jun 2012 rMVD (DS2) Distance vs Time

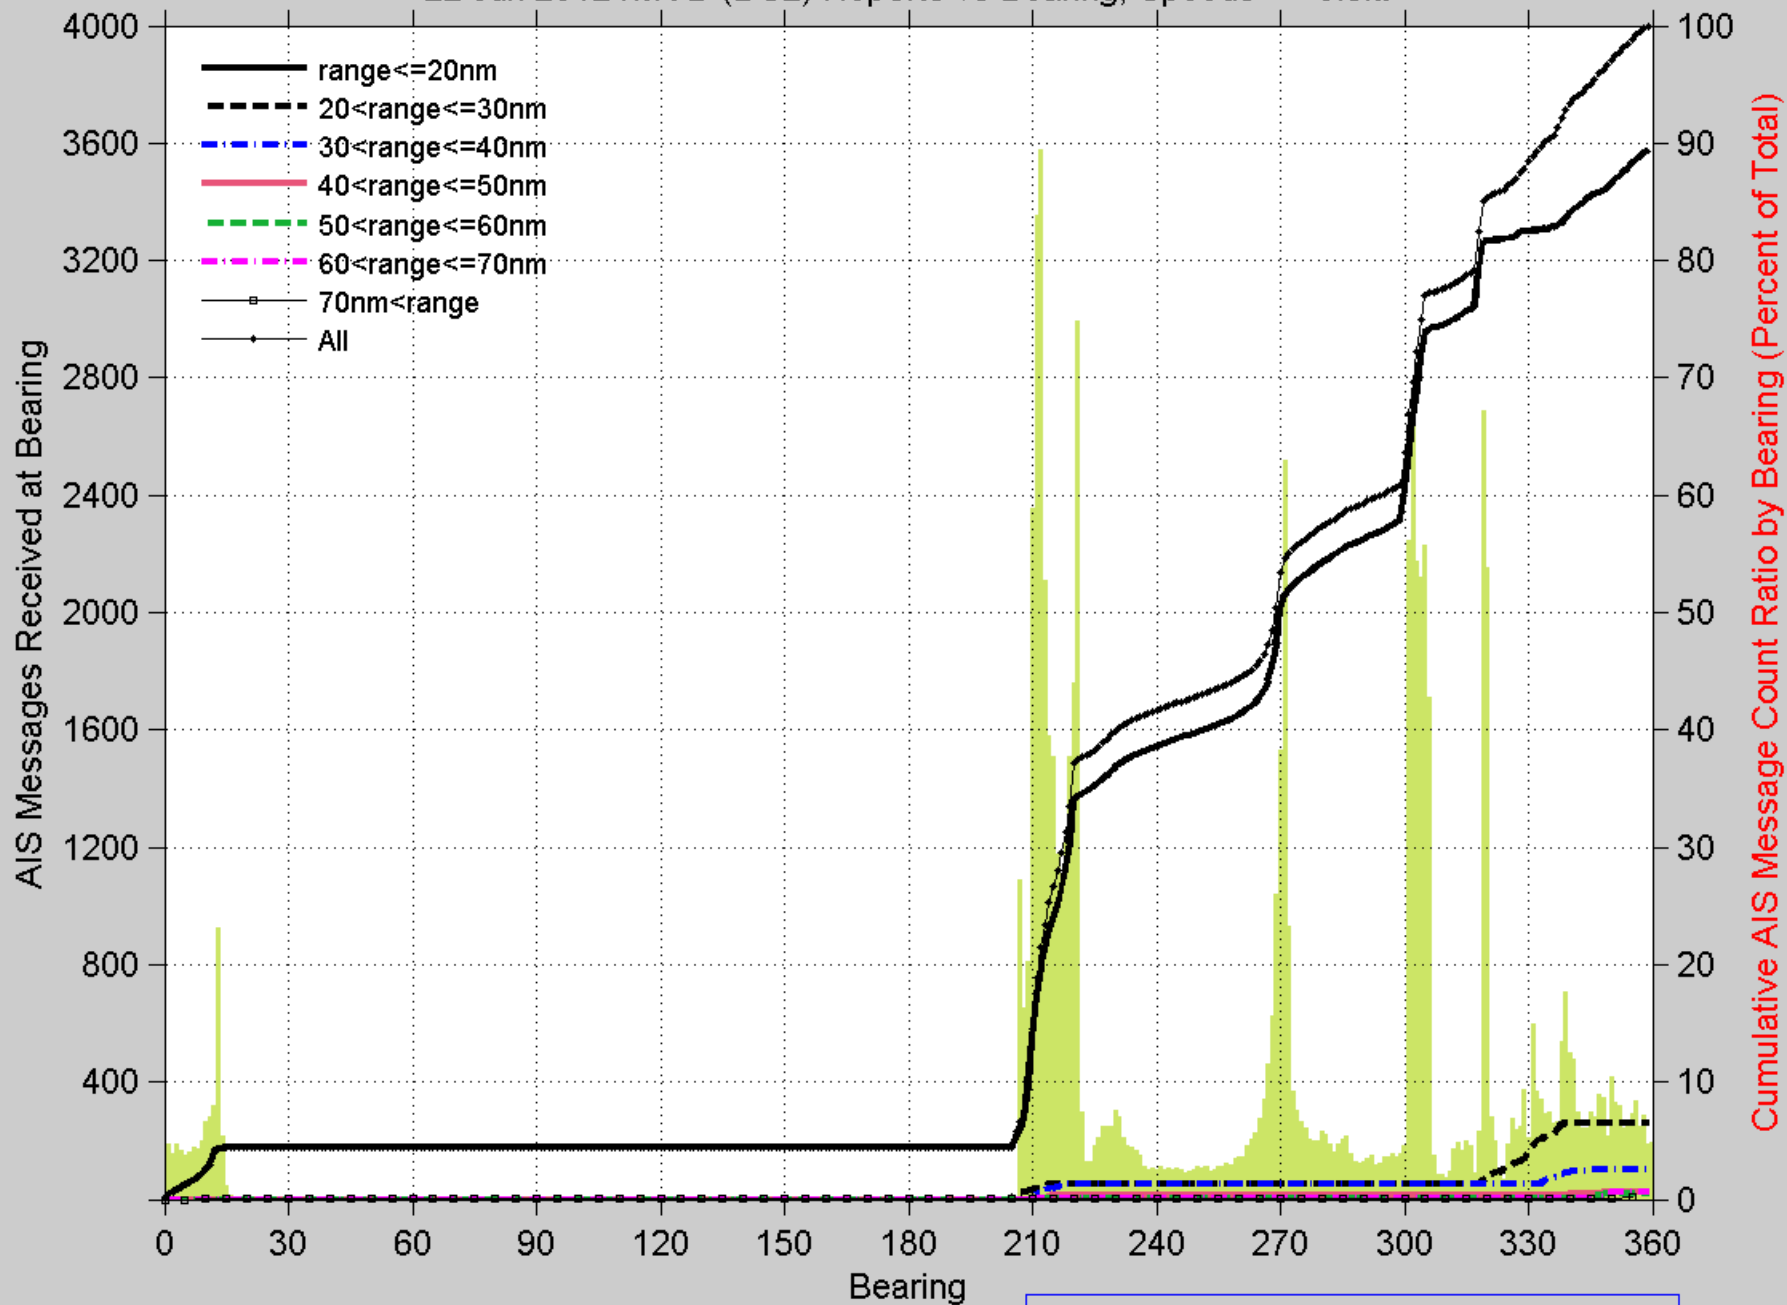

22 Jun 2012 rMVD (DS2) Received Reports vs Time

21 Jun 2012 rMVD (DS2) Report Density by Lat/Lon

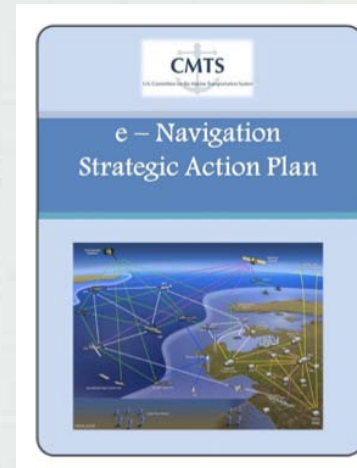

22 Jun 2012 rMVD (DS2) Reports vs Bearing, Speeds ≥ 0.5 kt

Total Position Reports (VDM 1,2,3,18,19) = 81798

Summary

- e-Navigation concept and US implementation
- US RIS implementation
- LOMA as foundational RIS capability
 - ▶ AIS capabilities
 - ▶ Interoperability – e.g., USCG data exchange
 - ▶ Future capabilities
- e-Nav contribution to MTS
 - Real-time
 - Measuring and improvement
- And a question...

Thank you for your attention!
