

# 3B Data Framework

- We're moving toward an automated data collection system but we're not there yet

# 3B Data Framework

- We're moving toward an automated data collection system but we're not there yet
- Human bias in the data, need for verification of data

# 3B Data Framework

- We're moving toward an automated data collection system but we're not there yet
- Human bias in the data, need for verification of data
- Integration/standardization among federal agencies in transmitting and sharing data

# 3B Data Framework

- We're moving toward an automated data collection system but we're not there yet
- Human bias in the data, need for verification of data
- Integration/standardization among federal agencies in transmitting and sharing data
- Need for performance metrics to support higher level goals (like more jobs, including in the maritime industry)

# 3B Data Framework

- We're moving toward an automated data collection system but we're not there yet
- Human bias in the data, need for verification of data
- Integration/standardization among federal agencies in transmitting and sharing data
- Need for performance metrics to support higher level goals (like more jobs, including in the maritime industry)
- Sustainability of data sources/analyses based on personnel and budgets
