

Benefits of Long-Range Capital Planning

Presentation at the Transportation Research Board
9th National Conference on Transportation Asset Management

Stephen A. Berrang
Director, Capital Program Management
New York Metropolitan Transportation Authority

April 18, 2012

Agenda

1. MTA System Overview
2. Origins of the Capital Plan
3. Capital Planning and the
Twenty Year Needs Assessment
4. Benefits to Date

The Nation's Largest Transit System

NYC Transit/Staten Island Railway

Key Facts on Subways

Avg. Weekday Riders:	5,284,930
2011 Ridership:	1,640,327,811
Lines Operated:	23
Daily Trains Operated:	8,279
Stations:	468
Track Miles:	631
Subway Cars:	6,311
Signals:	12,080
Mainline Switches:	3,259

NYC Transit/MTA Bus

Key Facts on Buses

Avg. Weekday Riders:	2,522,290
2011 Ridership:	783,562,437
Bus Routes:	297
Buses:	5,900
Bus Stops:	15,226

Metro-North Railroad

Key Facts

Avg. Weekday Ridership:	281,445
2011 Ridership:	82,037,786
Lines Operated:	8
Daily Trains Operated:	728
Stations:	120
Track Miles:	775
Rolling Stock:	1,193

Long Island Rail Road

Key Facts

Avg. Weekday Riders :	283,248
2011 Ridership:	80,983,003
Lines Operated:	11
Daily Trains Operated:	735
Stations:	124
Track Miles:	594
Rolling Stock:	1,185

MTA Bridges & Tunnels

Key Facts

7 Bridges

2 Tunnels

Daily Vehicles: over 800,000

2011 Vehicles: 280 million

Avg. Daily Travelers: 1 million

Toll Revenue: \$1.3 billion

% to transit: over 50%

Origins of the Capital Plan

By 1982 the system was on the brink of collapse

- Graffiti, crime and poor image
- Subway ridership fell 40%
- Crumbling network of legacy railroads
- Frequent breakdowns and derailments

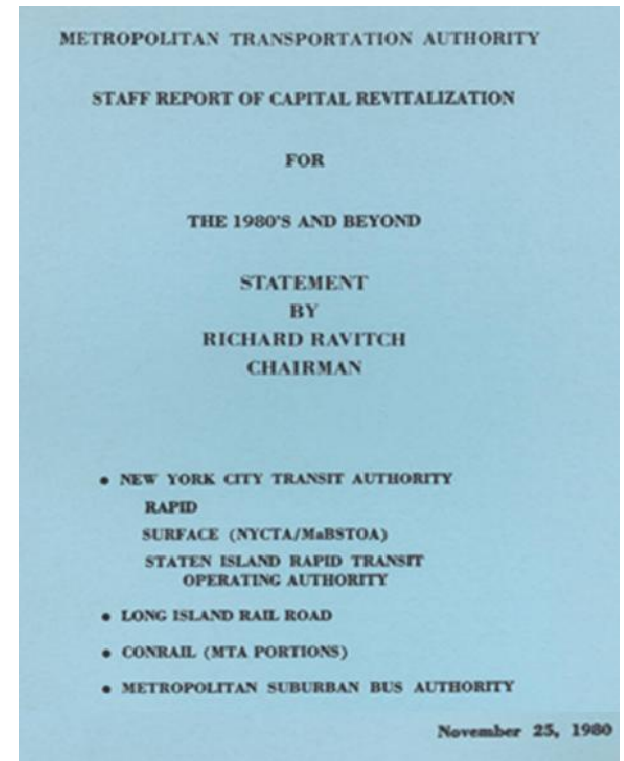

"Photo Credit: 'The Canarsie Kid' on Flickr"

Origins of the Capital Plan

Paradigm shift to rescue the system

- Five year investment plan mandated by state legislature since 1982.
- Establishment of an Independent Engineer Consultant for better oversight
- Twenty Year capital planning and asset management process:
 - Identify needs to maintain state of good repair
 - Support long-term service goals

The Process

1. Asset Inventory and Condition Assessment Update.
2. Long-term priorities and impacts in five year increments.
3. Integration of a Transit Asset Management (TAM) Model.
4. Regional Strategic Review.

Twenty Year Capital Needs Assessment 2010-2029

DRAFT - August 2009

 Metropolitan Transportation Authority

Appendix: Asset Inventory

Twenty Year Needs Assessment 2005-2024

MTA Summary of Continuing Needs: 2010-2029
(2008 \$ in millions)

Agency	2010-2014	2015-2019	2020-2024	2025-2029	Total
NYC Transit	\$22,180	\$20,126	\$22,117	\$19,723	\$84,146
Long Island Rail Road	3,492	4,232	4,091	4,557	16,372
Metro-North Railroad	2,106	3,820	3,281	2,579	11,786
MTA Bus Company	708	988	839	663	3,198
MTA Bridges and Tunnels	3,025	3,459	4,141	1,731	12,356
MTA Police and Security	651	239	39	43	972
Total	\$32,162	\$32,864	\$34,508	\$29,295	\$128,832

1. Asset Inventory and Condition Assessment Update

The Data: Asset Inventory & Condition Assessment

- MTA agencies inventory and rate conditions of all assets.

Long-Term Priorities and Impacts in Five-Year Increments

MTA Uniform condition rating framework

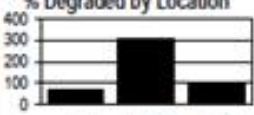

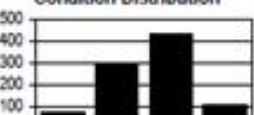

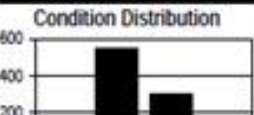

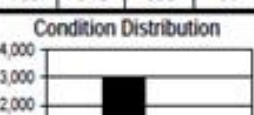

- Asset conditions rated on a scale of 1 (best) to 4 (worst) and informs capital needs 5 year and beyond
- **4 = Deteriorated:** Serious functional deficiencies; unacceptable stoppage expected.
 - *Priority capital investment.*
- **3 = Deficient:** Serious functional deficiencies; stoppages can be minimized through maintenance.
 - *Capital investment can be deferred at some expense.*
- **2 = Acceptable:** Considered to be adequate; stoppages addressed through maintenance.
 - *Capital investment can be deferred.*
- **1 = Modernized:** meet most standards.
 - *Replacement not needed in next 5 years.*

The Data: Asset Inventory & Condition Assessment

- Evaluates asset investment strategies for optimal replacement:
 - ***Cyclical or needs-based, component or renewal needs***
- Develops strategies for each asset category to prioritize critical needs.
- Projects the SGR backlog.
- Prioritizes SGR needs.
- Constrained only by:
 - operations
 - market for construction
 - Internal resources

The Data: Asset Inventory & Condition Assessment

2. Long-term priorities and impacts in five year increments

Long-Term Priorities and Impacts in Five-Year Increments

The results of this process include...

- Identification of investment options to maximize passenger service benefits.
- Descriptions, costs, and time periods for all investment categories.
- Framework for next five-year capital plan.
- Future capital investment informed through asset class strategy.

"If you don't know where you're going, chances are you will end up somewhere else."

- Yogi Berra

Long-term priorities and impacts in five year increments

3. Integration of a Transit Asset Management (TAM) Model

Integration of Transit Asset Management Model

Transit Asset Management Continuum

Integration of Transit Asset Management Model (continued)

- Leverages 30 years of experience
- Builds on evolving asset maintenance management capabilities to develop a compelling argument for sufficient and continual capital funding

- Analytical, off-the-shelf decision support software tool to examine impacts of alternative funding scenarios on future asset conditions

Integration of Transit Asset Management Model (continued)

The Output:

- Run scenarios:
 - Asset-based projections of state-of-good-repair (SGR) backlog
 - Future SGR needs
 - Future condition of MTA assets
 - Operating implications in fiscally constrained scenarios
- Prioritize SGR needs:
 - Age
 - Operational Impact
 - Cost Effectiveness
- Integrate into Capital Planning Process:
 - Twenty Year Needs Assessment
 - Five-Year Capital Program
- Graphical Representation

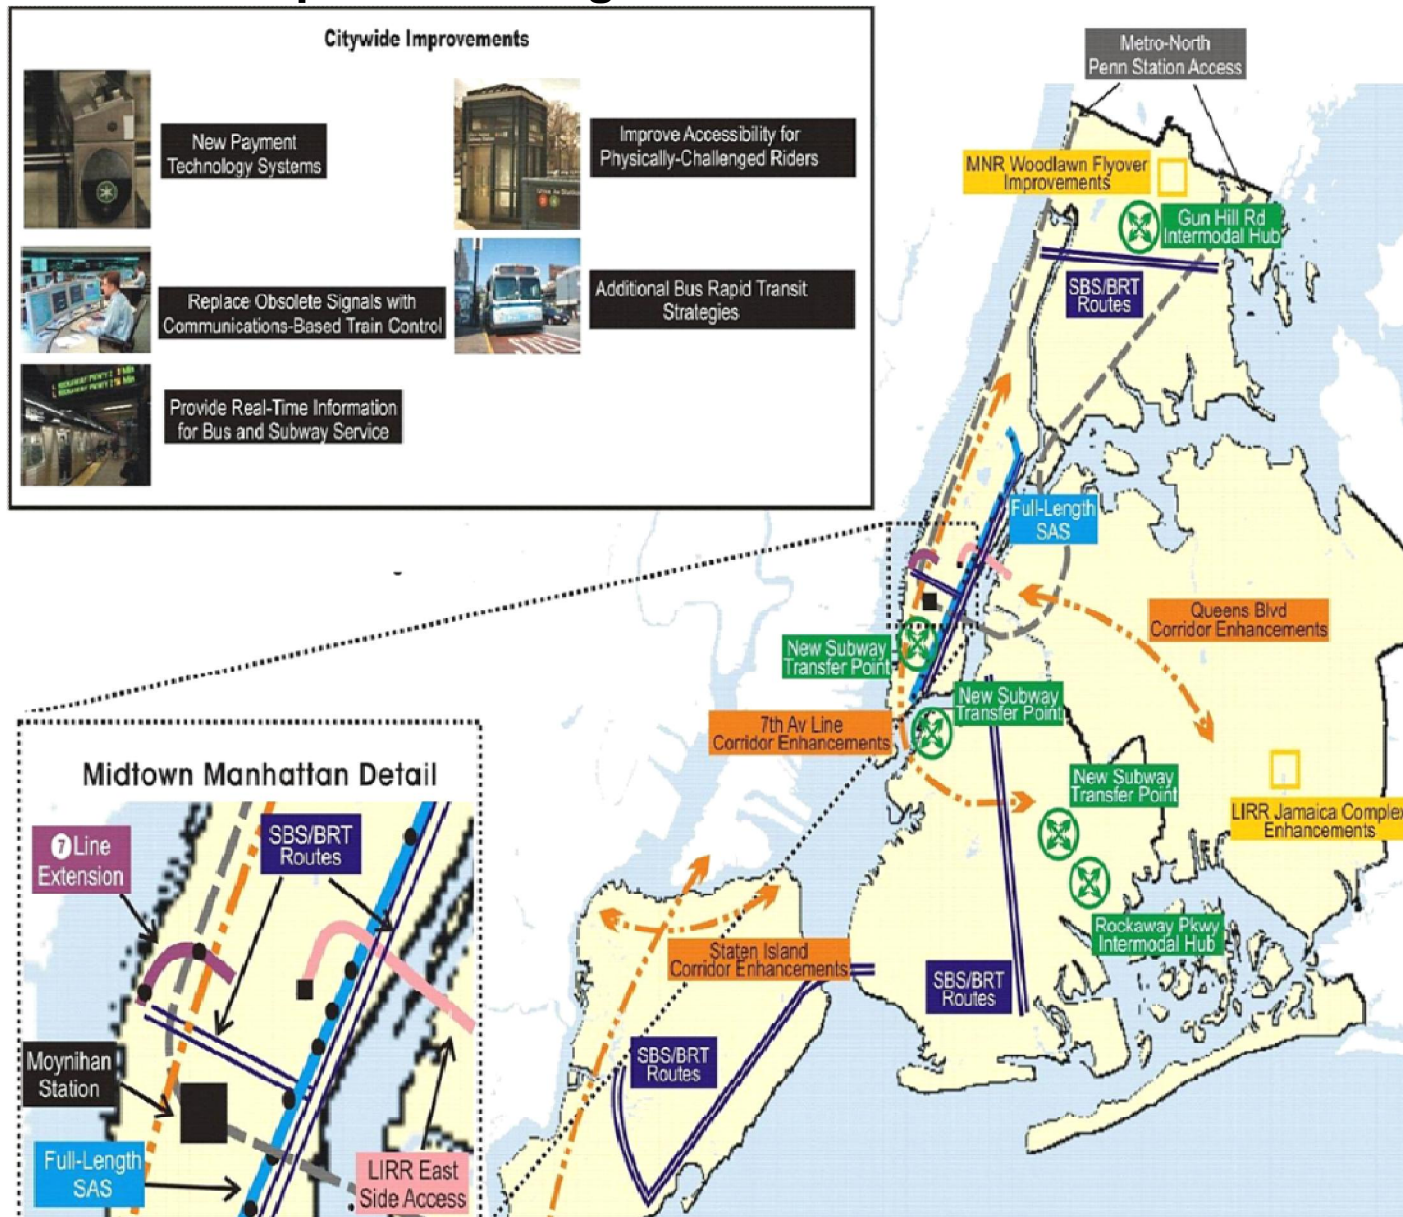

4. Regional Strategic Review

Regional Strategic Review

- A regional scan is conducted every five years to help identify the need for strategic investments that could be made over the next several capital plans
 - Analyze demographic, economic and travel trends
 - Determine the ability of the future network to accommodate these trends
 - Evaluate alternate growth, network and development scenarios
 - Previously identified studies/capital initiatives will address capacity/travel deficits
 - **New Fare/Customer Information technology**
 - **Reverse-peak commuter rail capacity**
 - **Bus network enhancements**
 - **Corridor studies**

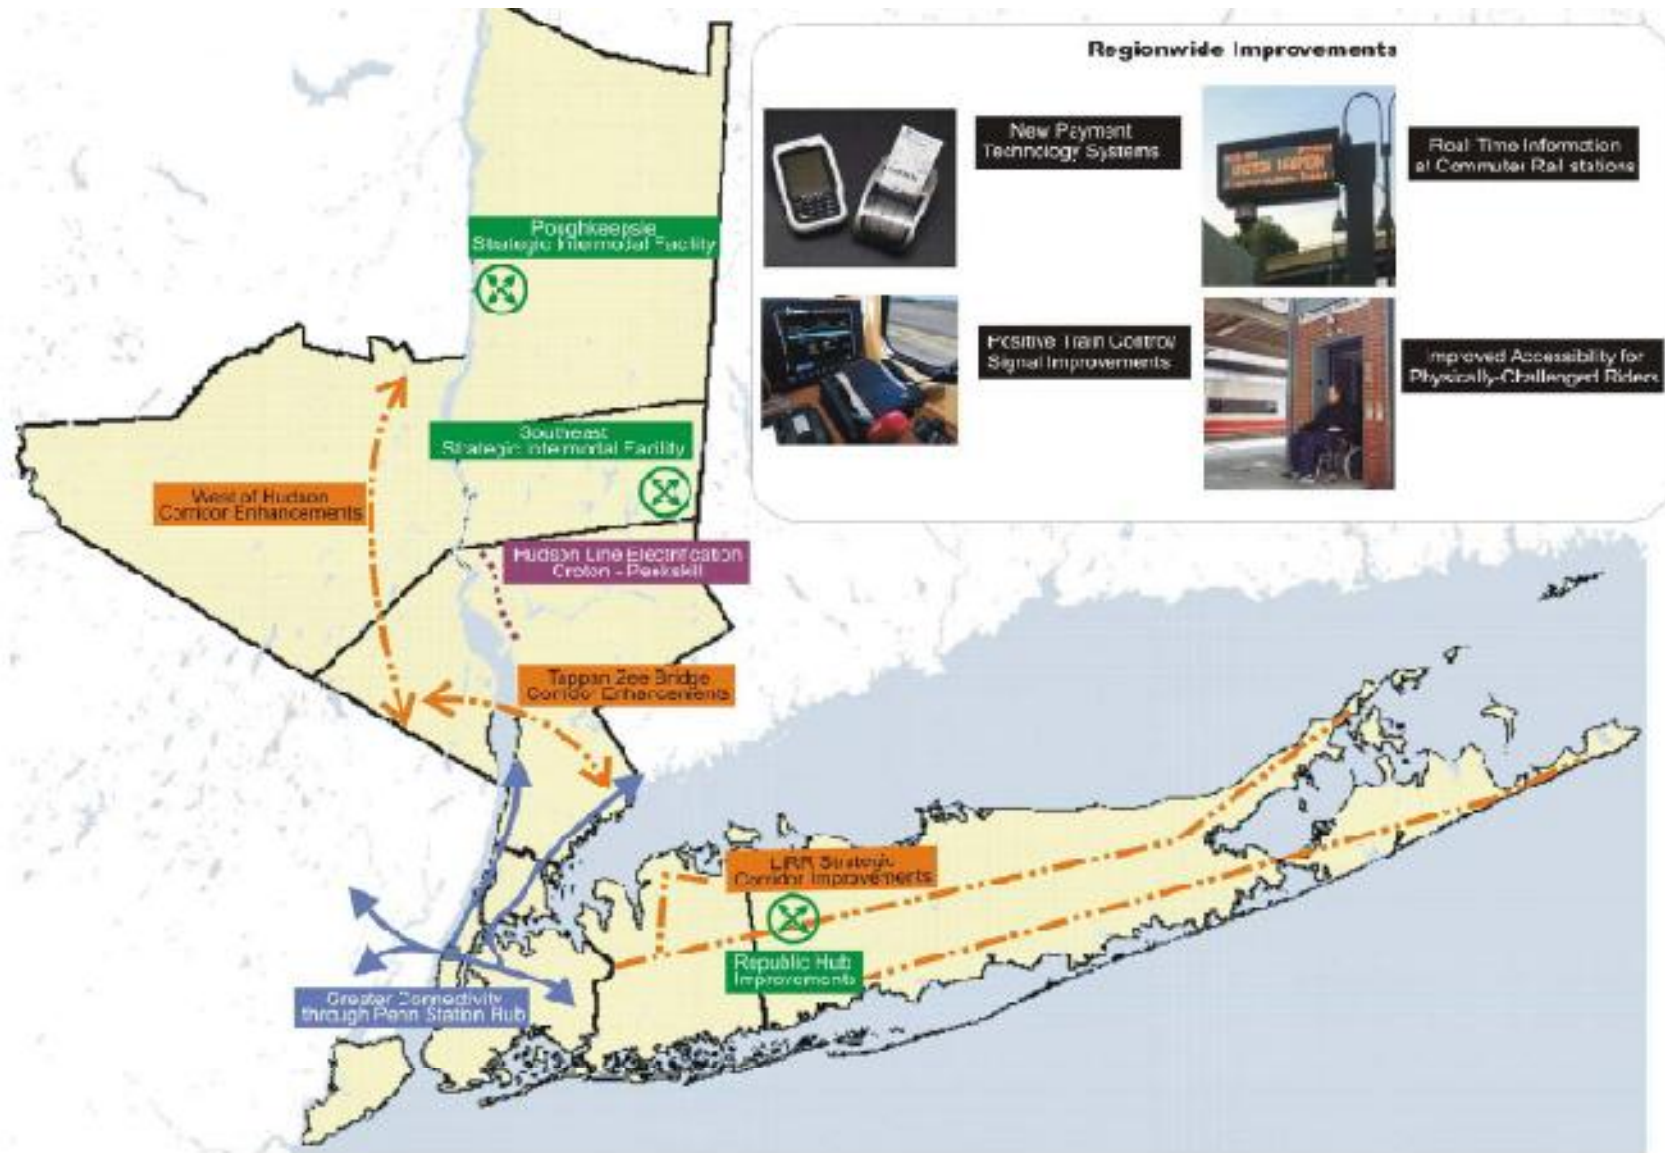

Regional Strategic Review

Proposed Strategic Enhancements: 2010-2029

Regional Strategic Review

Proposed Strategic Enhancements: 2010-2029

Benefits to Date

Benefits to Date

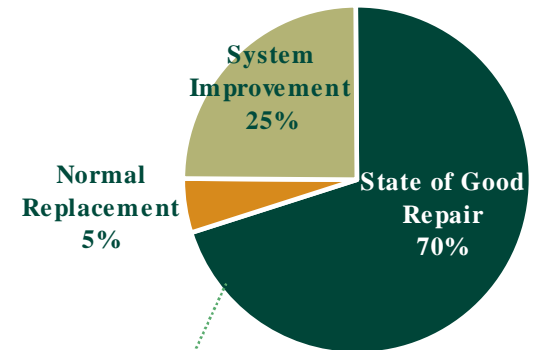

In the 1980s: Stabilized the System

- Old rolling stock overhauled or replaced
- Eliminated graffiti
- Rebuilt track and stations
- Reduced derailments and breakdowns.

Photo credit (upper left): www.nycsubway.org, collection of Joe Testagrose

1982 – 1991 Program

\$15.4 billion

Emphasis on stabilizing the system

Benefits to Date

In the 1990s: Emphasis shift to Normal Replacement

- One third of subway stations rebuilt
- Lift-equipped buses for better ADA compliance
- High-level rail platforms for faster boarding
- Bi-level coaches increased LIRR capacity
- Introduced MetroCard

1992 – 1999 Program

BEFORE

AFTER

Emphasis shifted to Normal Replacement

Benefits to Date

In the 21st Century: Shift to System Improvement

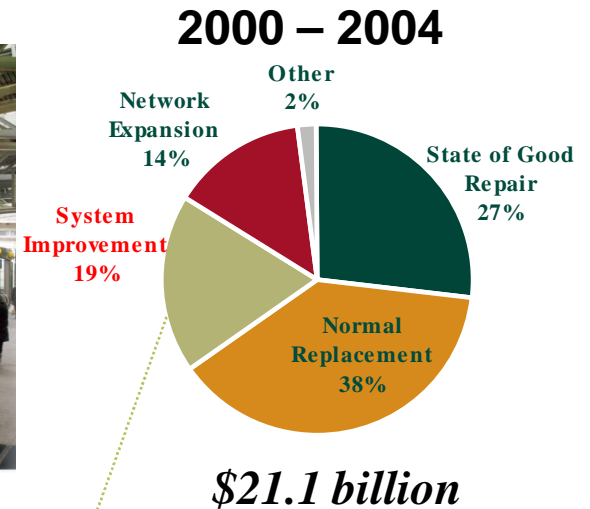

Improved stations & connections

Addressed delays with technology & information

Developed Bus Rapid Transit

Benefits of investment have freed up funds for System Improvements

Benefits to Date

And a shift to Network Expansion

**Network Expansion
now a major focus**

New subway and rail projects

**Station component
renewal program**

2005 – 2009 Program

\$21.3 billion

2010 – 2014 Program

\$24.3 billion

Then and Now

\$72.4 billion later (or \$107.5 billion in 2012 dollars).....

	1982	Today
Subways		
• Ridership (in millions)	989.0	1,640
• On Time Performance %	50	85.4
• Train Delays	319,500	18,502
• MDBF (miles)	10,800	172,700
