To provide a forum for the exchange of information on the state-of-the-art and state-of-the-practice in research and technology applications to improve snow removal and ice control operations with support of surface transportation weather information.
Format

Non-Traditional conference with the technical presentations posted online and available on Demand to conference registrants.

Workshop participants are encouraged to watch the on demand presentations and access associated materials so that there is ample time to discuss these and other ideas at the interactive workshop.
