# Using satellite radiometry to Develop Data for Models

H.G. LOPEZ-RUIZ, A. MUHSEN, M. YUAN, M. MORALES, N. CHASE

# 1. Overview of approach

## 2. Examples

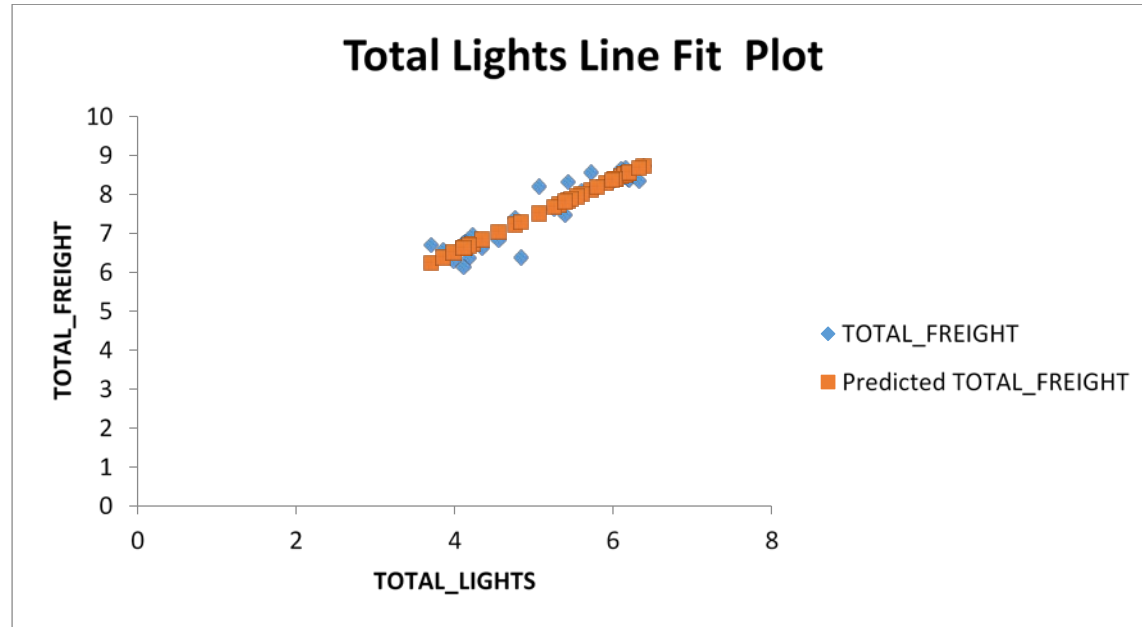

- a) Estimating freight movement in China and India
- b) Going Urban: use of complimentary data
- c) Freight shipping: a World Model

## 3. Future work

# Overview of approach

- **What we needed for SOFIA-T** (Simple Open Framework for Informed Assessments in Transportation):
  - Global data source
  - Open data
  - Easy to process
- **How we did it:**
  - Derive indicators of human and economic activity from night lights and urban form from color composites (other uses are possible)
  - Use indicators as a seed for flow estimation
  - Compliment with other open sources (Google, OSM, AIS, COMTRADE)
- **How we can make it better:**
  - Open Street map (amenities, roads, routing)
  - Google API (distances, speed, amenities, routing)
  - UN COMTRADE API
  - Scraping (source for massive amounts of data from public websites)
  - Social media (particularly for passenger transport)

Results India State Level (33 Obs)

Regression Statistics						
Multiple R	0.93443					
R Square	0.87317					
Adjusted R Square	0.86908					
Standard Error	0.307009

		Intercept	2.800635	0.337298	8.303142	2.23E-09
		TOTAL_LIGHTS	0.928703	0.06357	14.60921	1.91E-15

1. Overview of approach

## 2. Examples

a) **Estimating freight movement in China and India**

b) **Going Urban: use of complimentary data**

c) **Freight shipping: a World Model**

3. Future work

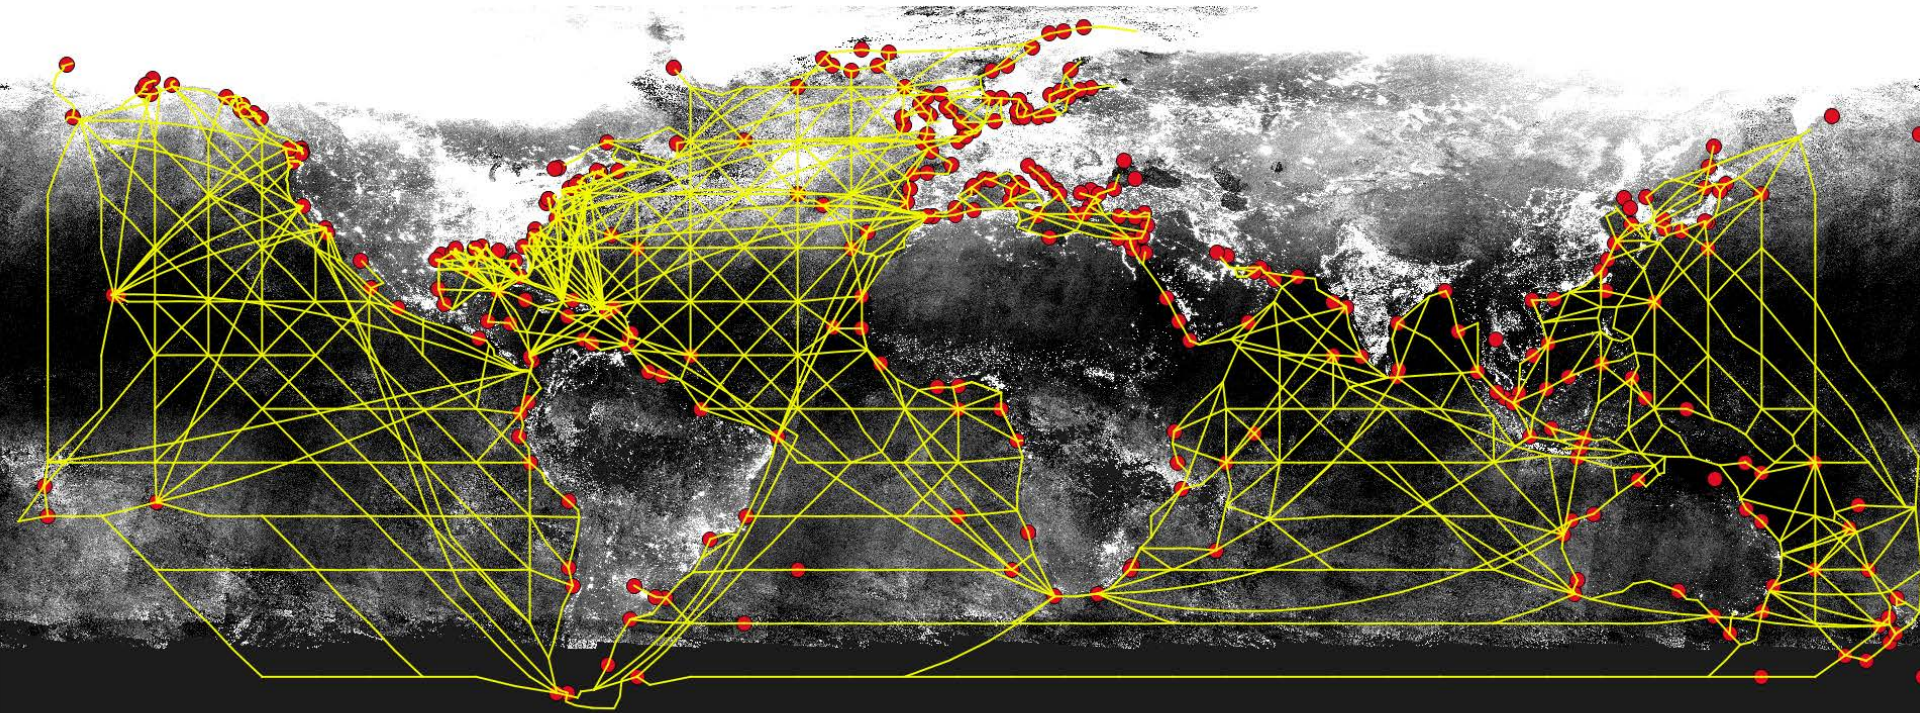

# Night Lights China (Main Cities)

# 1. Overview of approach

## 2. Examples

- a) Estimating freight movement in China and India
- b) Going Urban: use of complimentary data
- c) Freight shipping: a World Model

## 3. Future work

- Time Series – Deblurring

- Passenger and Freight Transportation ->LUTI

Deep understanding of the interaction between residential and commercial land-use with transportation activities

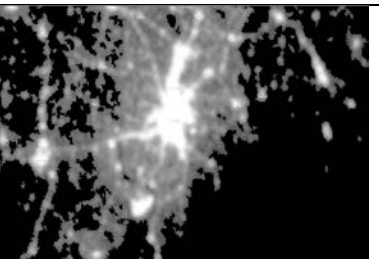

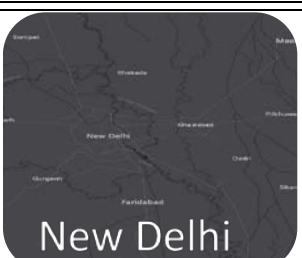

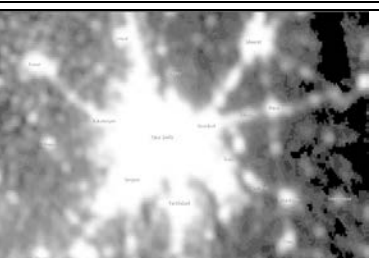

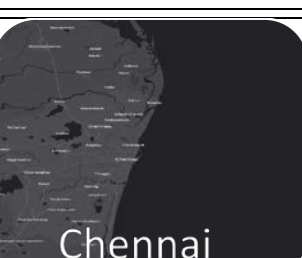

- Strategic plan for increased urban energy efficiency for major cities in Saudi Arabia.

Sustainable Urban Mobility Plans (SUMPS) dataset (quantified effects of urban policy measures in transportation)

+

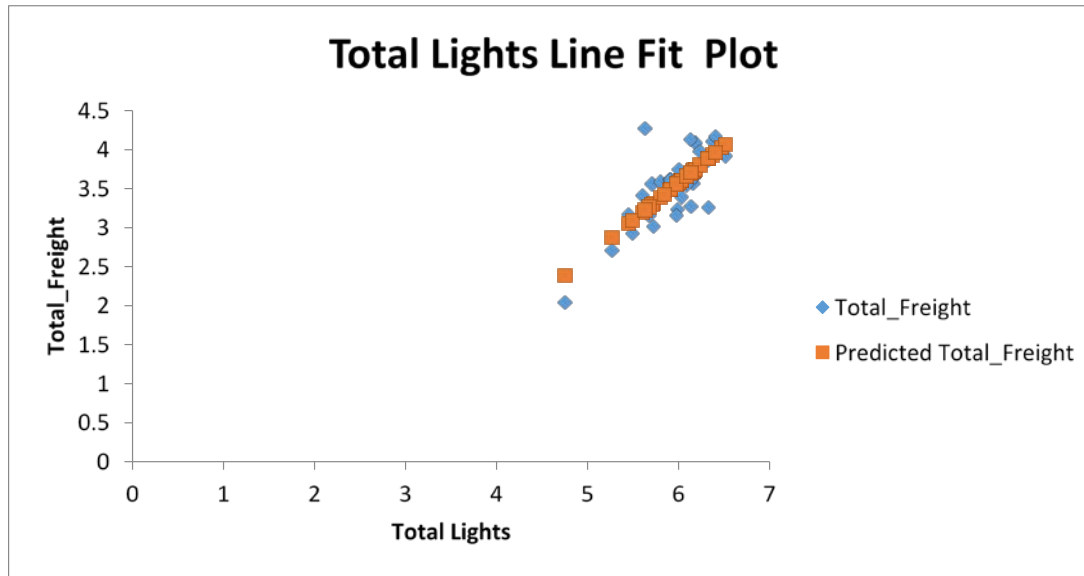

Analysis on the possible efficiency gains in buildings.
