

NCHRP

National Cooperative Highway Research Program

RESEARCH RESULTS DIGEST

December 1995

Number 209

These Digests are issued in the interest of providing an early awareness of the research results emanating from projects in the NCHRP. By making these results known as they are developed, it is hoped that the potential users of the research findings will be encouraged toward their early implementation in operating practices. Persons wanting to pursue the project subject matter in greater depth may do so through contact with the Cooperative Research Programs Staff, Transportation Research Board, 2101 Constitution Ave., N.W., Washington, D.C. 20418.

Responsible Staff Engineer: Scott A. Sabol

Continuing Project to Synthesize Information on Highway Problems

A staff digest of the progress and status of NCHRP Project 20-5, "Synthesis of Information Related to Highway Problems," for which the Transportation Research Board is the agency conducting the research. The Principal Investigators responsible for the project are Sally D. Liff, Manager, Synthesis Studies; Stephen F. Maher, P.E., and Donna L. Vlasak, Senior Program Officers, serving under the Studies and Information Services Division of the Board.

INTRODUCTION

Administrators, practicing engineers, and researchers continually face highway problems on which much information already exists, either in documented form or in terms of undocumented experience and practice. Unfortunately, this information is often fragmented, scattered, and undervalued. Often it is unknown to the person normally responsible for making decisions related to the topic. As a consequence, full knowledge of what has been learned about a problem is frequently not brought to bear on its solution. Costly research findings may go unused, valuable experience may be overlooked, and due consideration may not be given to recommended practices for solving or alleviating the problem.

There exists a vast storehouse of information relating to nearly every subject of concern to highway administrators and engineers. Much of it resulted from research and much from successful application of the ideas of practitioners faced with problems in their day-to-day work. Because there has been no systematic means for bringing such useful information together and making it available to the entire highway community, the American Association of State Highway and Transportation Officials has, through the mechanism of the National Cooperative Highway Research Program, authorized the Transportation Research Board to undertake a continuing study, NCHRP Project 20-5, "Synthesis of Information Related to Highway Problems." This study is intended to search out and synthesize useful knowledge from all possible sources and to prepare documented reports on current practices in the subject areas of concern. Reports

from this endeavor constitute an NCHRP report series, Synthesis of Highway Practice, that collects and assembles the various forms of information into single concise documents pertaining to specific highway problems or sets of closely related problems.

THE SYNTHESIS PROGRAM

This synthesis series attempts to report on the various practices, making some recommendations where appropriate but without the detailed directions usually found in handbooks or design manuals. Nonetheless, these documents can serve similar purposes, for each is a compendium of the best knowledge available on those measures found to be the most successful in resolving specific problems. The

Suggestions for synthesis topics may be sent to the NCHRP Program Director at any time (see address on back). Topics suggested must be accompanied by a brief scope statement or discussion of the problem (a paragraph or two). Suggestions for updates of published syntheses are also welcome.

Interested in writing a synthesis? For details, contact Sally D. Liff, Stephen F. Maher, P.E., or Donna L. Vlasak at 202-334-3244, 3245, or 2974, respectively.

extent to which they are used in this fashion will be tempered by the breadth of the user's knowledge in the particular problem area.

To develop these syntheses in a comprehensive manner and to ensure inclusion of significant knowledge, the Transportation Research Board analyzes available information assembled from numerous sources, including state highway and transportation departments. A panel of experts in the subject area is established to guide the researchers in organizing and evaluating the data collected on each topic and to review the synthesis report.

For each topic the project objectives are (1) to locate and assemble documented information; (2) to learn what practice has been used for solving or alleviating the problems; (3) to identify all ongoing research; (4) to learn what problems remain largely unsolved; (5) to organize, evaluate, and document the useful information that is acquired; and (6) to evaluate the effectiveness of the synthesis after it has been in the hands of its users for a period of time.

Each synthesis is an immediately useful document that records practices that were acceptable within the limitations of the knowledge available at the time of its preparation. As the processes of advancement continue, new knowledge can be expected to be added to that which is now at hand; eventually the synthesis may need to be updated or redone. The readers and users of the syntheses are in the best position to know when this has occurred. Whenever you believe that a synthesis should be updated, it would be appreciated if you would write to TRB (address on back) and let us know.

Studies in Progress

Work is currently under way on the topics listed in Table 1. Questions on these topics should be addressed to the principal project investigators, Sally D. Liff, Stephen F. Maher, P.E., or Donna L. Vlasak, who can be reached at (202) 334-3244, 3245, or 2974, respectively.

Selection of Topics

NCHRP Project Committee SP20-5 meets each year to select topics for study using funds from the upcoming fiscal year. The membership of this committee is given in Table 2. Current funding allows for initiation of about 12 syntheses per year. This number, plus some alternative topics, are selected by the committee at the annual project meeting.

The following factors are considered in the selection process for synthesis topics:

- The problem should be widespread enough to generate broad interest in the synthesis.
- The problem should be timely and critical with respect to economic impact, safety, or social impact.
- The problem is appropriate if current practice is nonuniform or inconsistent from agency to agency, or if the validity of some practices appears to be questionable.

- The quality and quantity of useful available information should indicate a need to organize and compress that which has already been learned and written on the topic.
- The topic should not be one where ongoing research or other activities in progress might be expected to render the synthesis obsolete shortly after completion.

Each year many more topics are suggested for the committee's consideration than can be programmed for study in Project 20-5. Nevertheless, the continued success of this project depends on a constant supply of worthy synthesis topics. The interest of those who have recommended topics is sincerely appreciated, and they are urged to continue. Candidate topics are suggested by members of the committee and by a variety of other sources, including state highway and transportation department personnel; FHWA; AASHTO; and TRB committees; and other practitioners and researchers.

Available Publications

The Syntheses of Highway Practice that have been completed under this project are listed in Table 3. Three Research Results Digests on topics studied under the project are also listed. Copies of these Syntheses and Digests can be obtained from the Publications Office, Transportation Research Board, 2101 Constitution Avenue N.W., Washington, D.C. 20418 or by calling (202) 334-3214.

Index of Topic Subjects

Table 4 is an index to published syntheses and digests and topics under study.

Conduct of the Studies

Throughout the year, following the project committee's selection of topics, studies are initiated in the order of priority assigned by the committee. A panel consisting of practitioners and researchers is formed for each topic. At its first meeting, this topic panel thoroughly discusses the topic, refines the scope, suggests sources of information, and identifies and discusses potential topic consultants.

Following this meeting, an agreement is negotiated with a consultant to gather information on the topic, synthesize it, and draft a report. Typically, the agreement covers about 50 workdays over a period of about one year. Information gathering and preparation of the first draft of the synthesis report usually take from 6 to 9 months. This draft is reviewed by the topic panel with the consultant at the second panel meeting. A revised draft is then prepared by the author and reviewed by the topic panel. Subsequent drafts and meetings are scheduled if needed, although this rarely occurs.

After the topic panel is substantially satisfied with the report, a final draft is sent to the members of NCHRP Project Committee SP20-5 for their approval. At the same time, members of the topic panel have their last chance to review the report, which is usually published as an NCHRP Synthesis of Highway Practice.

Table 1
TOPICS BEING STUDIED

No.	Title	No.	Title
19-22	Status and Application of GPS Satellite Positioning for Departments of Transportation	26-06	Land Development Regulations that Promote Access Management
22-12	Truck Operating Characteristics	26-07	Application of Full-Scale Accelerated Pavement Testing
23-11	Changeable Message Signs	26-08	Ground Penetrating Radar (GPR) for Evaluating Subsurface Conditions for Transportation Facilities
23-12	Reduced Visibility on the Highway	26-09	Evaluation of Effectiveness and Impact of Training
24-10	Asphalt Surface Treatments and Thin Overlays	26-10	Settlement of Bridge Approaches
25-01	Applications of 3D and 4D Visual Modeling for Transportation Systems	26-11	Transportation Development Process
25-02	Freight Transportation Planning in the Public Sector	26-12	Alternate Methods of Corrosion Protection for Exposed Bridge Steel Surfaces
25-04	Guardrail and Median Barrier Crashworthiness	27-01	Trenchless Construction of Conduits Beneath Roadways
25-06	Collecting and Managing Cost Data for Bridge Management Systems	27-02	Criteria for Routing of Hazardous Materials
25-07	Pavement Subsurface Drainage Systems	27-03	Stability of Existing Subgrades During Interstate Pavement Rehabilitation to Improve Constructibility
25-11	Toll Plaza Design	27-04	Methods of Increasing Live Load Capacity of Existing Highway Bridges
25-12	Operational Management of the Transportation System	27-05	Methods for State Construction and Materials Acceptance
25-14	Managing Contract Research Programs	27-06	Outsourcing of State Highway Facilities and Services
25-15	Productivity Measurements within Departments of Transportation	27-07	Methods for Overcoming Product Liability to Achieve Highway Innovations
25-16	Dynamic Effects of Pile Installations on Adjacent Structures	27-08	Thin-Surfaced Pavements
25-21	Service Life of Drainage Pipe	27-09	Methods for Capital Programming and Project Scheduling
26-01	Remediation of Petroleum Contaminated Soils	27-10	Response of Small Urbanized Area MPOs to ISTEA
26-02	Variability in Highway Pavement Construction	27-11	Traffic Signal Control Systems Maintenance Management Practices
26-03	Methods for Household Travel Surveys	27-12	Road User and Mitigation Costs in Highway Pavement Projects
26-04	Highway-Rail Crossing Surfaces		
26-05	Relationship Between Pavement Surface Texture and Highway Traffic Noise

Table 4
INDEX TO SYNTHESSES AND STUDIES*

- Accelerated pavement testing 26-07
 Access management 26-06
 Accident data 91, 192
 Accident location 21, 91, 128, 202
 Advance warnings 186
 Aid to motorists 7
 Artificial intelligence 183
 Asphalt
 - cement 59
 - compaction 152
 - emulsions 30
 - friction courses 49, 104, 180
 - moisture damage 175
 - overlays 116
 - patching 64
 - pavements 30, 49, 59, 104, 152, 171, 175, 180, 27-08
 - recycling 54, 160, 193
 - surface treatments 223
 Attenuators 182
 Automatic vehicle identification (AVI) 194
 Bases 37
 Bearings for bridges 41
 Bidding qualifications 190
 Bituminous emulsions 30
 Bituminous patching 64
 Bituminous pavements (see Asphalt)
 Bridges
 - approaches 2, 159, 26-10
 - bearings 41
 - below-water inspection 88
 - below-water maintenance 200
 - below-water repair 88, 200
 - concrete decks 4, 57, 86, 209, 220
 - construction 44, 53
 - corrosion protection 26-12
 - deck joints 141
 - deck removal 169
 - deck sealers 209
 - design for maintenance 123
 - drainage 67
 - durability 4, 57, 86, 118, 140
 - expansion devices 141
 - foundations 42, 107
 - galvanizing 112, 26-12
 - historic 101
 - increasing live loads, existing 27-04
 - inspection 88, 118
 - maintenance 25-06, 26-12
 - management systems 25-06
 - membranes 220
 - paint removal 176
 - painting 136
 - patching 45
 - posting practices 108
 - precast concrete 53, 119
 - prefabricated 53, 119
 - prestressed, durability 140
 - scour 5, 200
 - substructure repair 88, 200
 - wheel load distribution 111
 Bus transit planning 69
 Bypasses, impacts of RRD 210
 Changeable message signs 61, 23-11
 Communications 7, 12, 13, 71, 165
 Computer-aided design 161
 Computers 55
 Concrete
 - admixtures 127, 129
 - bridge decks 4, 57, 86, 169
 - consolidation 44
 - dry-cast 129
 - durability 4, 57, 129, 140
 - epoxies 109
 - fly ash in 127, 199
 - freezing and thawing 129
 - latex-modified 179
 - overlays 99, 204
 - patching 45
 - pavement recycling 54, 154
 - pavements 16, 19, 27, 45, 56, 60, 98, 99, 134, 144, 204, 211
 - precast 53
 - rapid test methods 187
 - repair preparation 169
 - resurfacing 204
 - sealers 209
 - water reducers 129
 Conduits
 - trenchless construction 27-01
 Consolidation of concrete 44
 Construction
 - acceptance 27-05
 - bases and subbases 37
 - bidding qualifications 190
 - bituminous pavements 30
 - bridge approaches 2, 159, 26-10
 - bridge decks 4, 44, 57, 86
 - concrete pavements 16, 19, 27, 44, 144, 204, 211
 - conduits, 27-01
 - consultants 146
 - contract claims 105, 214
 - contract time 79, 215
 - embankments 8
 - energy factors 85
 - engineering 145, 146
 - erosion control 18
 - management 51, 145
 - material certification 102, 27-05
 - pavements 16, 19, 27, 30, 44, 144, 211, 152, 167, 204, 211
 - quality assurance 38, 65, 212, 26-02, 27-05
 - recycling 54, 154, 193
 - specifications 38, 212, 27-05
 - staffing 51, 145
 - subgrades, 27-03
 - testing 36, 65, 187
 - traffic control 208, RRD 100
 - trenchless, 27-01
 - utilities 115, 224
 - value engineering 78
 - variability 26-02
 - warranties 195
 - weather 47
 Consultants
 - construction engineering 146
 - negotiating for services 137
 Contaminated Soils 26-01
 Continuously reinforced pavements 16, 60, 204, 211
 Contract
 - bidding qualifications 190
 - claims 105, 214
 - maintenance 125, 27-06
 - management 168
 - time determination 79, 215
 Corridor preservation 197
 Cost-effectiveness analysis 142, 223
 Costs
 - life-cycle 122, 222, 27-12
