Climate Change
Curbing Transportation’s Contributions
TRANSPORTATION RESEARCH BOARD
2010 EXECUTIVE COMMITTEE*

Chair: Michael R. Morris, Director of Transportation, North Central Texas Council of Governments, Arlington
Vice Chair: Neil J. Pedersen, Administrator, Maryland State Highway Administration, Baltimore
Executive Director: Robert E. Skinner, Jr., Transportation Research Board

J. Barry Barker, Executive Director, Transit Authority of River City, Louisville, Kentucky
Allen D. Biehler, Secretary, Pennsylvania Department of Transportation, Harrisburg
Larry L. Brown, Sr., Executive Director, Mississippi Department of Transportation, Jackson
Deborah H. Butler, Executive Vice President, Planning, and CIO, Norfolk Southern Corporation, Norfolk, Virginia
William A. V. Clark, Professor, Department of Geography, University of California, Los Angeles
Eugene A. Conti, Jr., Secretary of Transportation, North Carolina Department of Transportation, Raleigh
Nicholas J. Garber, Henry L. Kimmer Professor, Department of Civil Engineering, and Director, Center for Transportation Studies, University of Virginia, Charlottesville
Jeffrey W. Hamiel, Executive Director, Metropolitan Airports Commission, Minneapolis, Minnesota
Paula J. Hammond, Secretary, Washington State Department of Transportation, Olympia
Edward A. (Ned) Helme, President, Center for Clean Air Policy, Washington, D.C.
Adib K. Kanafani, Cahill Professor of Civil Engineering, University of California, Berkeley (Past Chair, 2009)
Susan Martinovich, Director, Nevada Department of Transportation, Carson City
Debra L. Miller, Secretary, Kansas Department of Transportation, Topeka (Past Chair, 2008)
Sandra Rosenbloom, Professor of Planning, University of Arizona, Tucson
Tracey L. Rossor, Vice President, Corporate Traffic, Wal-Mart Stores, Inc., Mandeville, Louisiana
Steven T. Scalzo, Chief Operating Officer, Marine Resources Group, Seattle, Washington
Henry G. (Gerry) Schwartz, Jr., Chairman (retired), Jacobs/Sverdrup Civil, Inc., St. Louis, Missouri
Beverly A. Scott, General Manager and Chief Executive Officer, Metropolitan Atlanta Rapid Transit Authority, Atlanta, Georgia

David Seltzer, Principal, Mercator Advisors LLC, Philadelphia, Pennsylvania
Daniel Sperling, Professor of Civil Engineering and Environmental Science and Policy; Director, Institute of Transportation Studies; and Interim Director, Energy Efficiency Center, University of California, Davis

Kirk T. Steudle, Director, Michigan Department of Transportation, Lansing
Douglas W. Stotlar, President and Chief Executive Officer, Con-Way, Inc., Ann Arbor, Michigan
C. Michael Walton, Ernest H. Cockrell Centennial Chair in Engineering, University of Texas, Austin (Past Chair, 1991)

Peter H. Appel, Administrator, Research and Innovative Technology Administration, U.S. Department of Transportation (ex officio)

J. Randolph Babbitt, Administrator, Federal Aviation Administration, U.S. Department of Transportation (ex officio)
Rebecca M. Brewster, President and COO, American Transportation Research Institute, Smyrna, Georgia (ex officio)
George Bugliarello, President Emeritus and University Professor, Polytechnic Institute of New York University, Brooklyn; Foreign Secretary, National Academy of Engineering, Washington, D.C. (ex officio)

Anne S. Ferro, Administrator, Federal Motor Carrier Safety Administration, U.S. Department of Transportation (ex officio)
LeRoy Gishi, Chief, Division of Transportation, Bureau of Indian Affairs, U.S. Department of the Interior, Washington, D.C. (ex officio)
Edward R. Hamberger, President and CEO, Association of American Railroads, Washington, D.C. (ex officio)

John C. Horsley, Executive Director, American Association of State Highway and Transportation Officials, Washington, D.C. (ex officio)
David T. Matsuda, Deputy Administrator, Maritime Administration, U.S. Department of Transportation (ex officio)
Victor M. Mendez, Administrator, Federal Highway Administration, U.S. Department of Transportation (ex officio)

William W. Millar, President, American Public Transportation Association, Washington, D.C. (ex officio) (Past Chair, 1992)
Robert J. Papp, (Adm., U.S. Coast Guard), Commandant, U.S. Coast Guard, U.S. Department of Homeland Security (ex officio)

Cynthia L. Quartenman, Administrator, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation (ex officio)
Peter M. Rogoff, Administrator, Federal Transit Administration, U.S. Department of Transportation (ex officio)
David L. Strickland, Administrator, National Highway Traffic Safety Administration, U.S. Department of Transportation (ex officio)

Joseph C. Szabo, Administrator, Federal Railroad Administration, U.S. Department of Transportation (ex officio)
Polly Trottenberg, Assistant Secretary for Transportation Policy, U.S. Department of Transportation (ex officio)

* Membership as of June 2010.

The Transportation Research Board is one of six major divisions of the National Research Council, which serves as an independent adviser to the federal government and others on scientific and technical questions of national importance, and which is jointly administered by the National Academy of Sciences, the National Academy of Engineering, and the Institute of Medicine. The mission of the Transportation Research Board is to provide leadership in transportation innovation and progress through research and information exchange, conducted within a setting that is objective, interdisciplinary, and multimodal. The Board’s varied activities annually engage about 7,000 engineers, scientists, and other transportation researchers and practitioners from the public and private sectors and academia, all of whom contribute their expertise in the public interest. The program is supported by state transportation departments, federal agencies including the component administrations of the U.S. Department of Transportation, and other organizations and individuals interested in the development of transportation.

The National Research Council was organized by the National Academy of Sciences in 1916 to associate the broad community of science and technology with the Academy’s purposes of furthering knowledge and advising the federal government. Functioning in accordance with general policies determined by the Academy, the Council has become the principal operating agency of both the National Academy of Sciences and the National Academy of Engineering in providing services to the government, the public, and the scientific and engineering communities.

CLIMATE CHANGE: CURBING TRANSPORTATION’S CONTRIBUTIONS

3 INTRODUCTION
Transportation and Climate Change: Developing Technologies, Policies, and Strategies
Jonathan D. Rubin and Robert B. Noland
Significantly reducing greenhouse gas emissions from transportation will require actions that go beyond increasing vehicle fuel efficiency and that encompass initiatives in all of the major passenger and freight modes.

6 AMERICA’S CLIMATE CHOICES
The State of Climate Change Science and Options for Limiting Future Climate Change
Findings and recommendations are summarized from new National Research Council reports addressing the status of climate change science and the options for limiting the magnitude of climate change.

10 Why Focus on Transportation for Emissions Reduction?
Emil Frankel and Thomas R. Menzies, Jr.
Transportation may be an important precursor and testing ground for national, economywide action to reduce energy use and the emissions of greenhouse gases.

12 Legislative and Regulatory Moves to Reduce Transportation’s Greenhouse Gas Emissions
Robert B. Noland

15 Curbing Carbon Dioxide Emissions from Transportation: Scenarios for Meeting the Global Challenge
Lew Fulton
A European study indicates that the widespread adoption of new vehicle technologies and fuels, along with mode shifts, can help stabilize atmospheric concentrations of greenhouse gases within targeted ranges—but strong policy actions and a willingness to embrace change are needed.

21 NEW TRB SPECIAL REPORT
A Transportation Research Program for Mitigating and Adapting to Climate Change and Conserving Energy
Michael D. Meyer and Stephen R. Godwin
To assist federal, state, and local policy makers, an expert committee recommends a research program to develop the best guidance quickly on the effectiveness, costs, feasibility, and acceptability of transportation mitigation and adaptation strategies.

23 TRB Special Task Force Produces Climate Change Primer and Research Needs Statements
Mark R. Norman

24 TRB SPECIAL REPORT
Driving and the Built Environment: The Effects of Compact Development on Motorized Travel, Energy Use, and CO2 Emissions
José A. Gómez-Ibáñez and Nancy Humphrey
A new study examines the relationship between land development patterns and motor vehicle travel in the United States and assesses whether petroleum use—and greenhouse gas emissions—could be reduced with more compact, mixed-use development.

26 Traffic Congestion and Greenhouse Gases
Matthew Barth and Kanok Boriboonsomsin

COVER: Curbing emissions of greenhouse gases from transportation sources can lead the way in national and international efforts to halt climate change. (Design by Michelle Wandres; earth image courtesy of NASA)
features articles on innovative and timely research and development activities in all modes of transportation. Brief news items of interest to the transportation community are also included, along with profiles of transportation professionals, meeting announcements, summaries of new publications, and news of Transportation Research Board activities.

29 Policies to Promote Low-Carbon Transportation Fuels: What Works?
Daniel Sperling
The author examines options to reduce the carbon content of fuels and reviews the policies that are needed, the fundamentals of effective programs, and the challenges for the transition.

32 Plug-In Hybrid and Electric Vehicles: Recent Developments and Prospects
Tom Torrentine
Plug-in, electric-drive vehicles offer ways to diversify fuels for personal vehicles, to reduce tailpipe criteria pollutants, and—if the source of electricity has followed a low-carbon pathway—to reduce greenhouse gas emissions.

34 Reducing Greenhouse Gas Emissions from Freight Trucking: Challenges and Opportunities
Marianne Mintz
Heavy-duty trucks dominate U.S. freight energy use and greenhouse gas emissions; the author reviews strategies and technologies to reduce total freight emissions from large trucks and their operations.

40 International Shipping and Greenhouse Gas Emissions: From Assessment to Mitigation
James J. Corbett, James J. Winebrake, and Haifeng Wang
Controlling the emissions from shipping requires novel policy and technology approaches, because of the complex mix of international ownership and registry, as well as services connecting suppliers and customers all over the globe.

45 Recent Developments in Aviation Climate Policy
Annela Anger and John E. Putnam

Coming next issue

Transportation and globalization is the theme of the July–August TR News, with feature articles exploring the relationship of international freight transportation to national economic recovery and global sustainability; the effects of globalization on infrastructure and on national security and terrorism; a history of global trade, going back to ancient Rome; an opinion piece on the contributions of seaports to prosperity and employment; a quiz on globalization and international transportation; and a look at lessons learned from the disruption of air traffic by ash from the volcanic eruptions in Iceland.
