Security and Critical Infrastructure Protection: Progress and Paths to Resilience
The Transportation Research Board is one of six major divisions of the National Research Council, which serves as an independent adviser to the federal government and others on scientific and technical questions of national importance, and which is jointly administered by the National Academy of Sciences, the National Academy of Engineering, and the Institute of Medicine. The mission of the Transportation Research Board is to provide leadership in transportation innovation and progress through research and information exchange, conducted within a setting that is objective, interdisciplinary, and multimodal. The Board's varied activities annually engage about 7,000 engineers, scientists, and other transportation researchers and practitioners from the public and private sectors and academia, all of whom contribute their expertise in the public interest. The program is supported by state contributions and individuals interested in the development of transportation.

The National Research Council was organized by the National Academy of Sciences in 1916 to associate the broad community of science and technology with the Academy’s purposes of furthering knowledge and advising the federal government. Functioning in accordance with general policies determined by the Academy, the Council has become the principal operating agency of both the National Academy of Sciences and the National Academy of Engineering in providing services to the government, the public, and the scientific and engineering communities.

TRANSPORTATION RESEARCH BOARD 2011 EXECUTIVE COMMITTEE*

Chair: Neil J. Pedersen, Consultant, Silver Spring, Maryland
Vice Chair: Sandra Rosenbloom, Professor of Planning, University of Arizona, Tucson
Executive Director: Robert E. Skinner, Jr., Transportation Research Board

J. Barry Barker, Executive Director, Transit Authority of River City, Louisville, Kentucky
Deborah H. Butler, Executive Vice President, Planning, and CIO, Norfolk Southern Corporation, Norfolk, Virginia
William A. V. Clark, Professor, Department of Geography, University of California, Los Angeles
Eugene A. Conti, Jr., Secretary of Transportation, North Carolina Department of Transportation, Raleigh
James M. Crites, Executive Vice President of Operations, Dallas–Fort Worth International Airport, Texas
Paula J. Hammond, Secretary, Washington State Department of Transportation, Olympia
Michael W. Hancock, Secretary, Kentucky Transportation Cabinet, Frankfort
Adib K. Kanaan, Cahill Professor of Civil Engineering, University of California, Berkeley (Past Chair, 2009)
Michael P. Lewis, Director, Rhode Island Department of Transportation, Providence
Susan Martinovich, Director, Nevada Department of Transportation, Carson City
Joan McDonald, Commissioner, New York State Department of Transportation, Albany
Michael R. Morris, Director of Transportation, North Central Texas Council of Governments, Arlington (Past Chair, 2010)

Tracy L. Rosser, Vice President, Regional General Manager, Wal-Mart Stores, Inc., Mandeville, Louisiana
Steven T. Scalzo, Chief Operating Officer, Marine Resources Group, Seattle, Washington
Henry G. (Gerry) Schwartz, Jr., Chairman (retired), Jacobs/Sverdrup Civil, Inc., St. Louis, Missouri
Beverly A. Scott, General Manager and Chief Executive Officer, Metropolitan Atlanta Rapid Transit Authority, Atlanta, Georgia
David Seltzer, Principal, Mercator Advisors LLC, Philadelphia, Pennsylvania
Lawrence A. Selzer, President and CEO, The Conservation Fund, Arlington, Virginia
Kumaras C. Sinha, Olson Distinguished Professor of Civil Engineering, Purdue University, West Lafayette, Indiana
Thomas K. Sorel, Commissioner, Minnesota Department of Transportation, St. Paul
Daniel Sperling, Professor of Civil Engineering and Environmental Science and Policy; Director, Institute of Transportation Studies; and Interim Director, Energy Efficiency Center, University of California, Davis
Kirk T. Steudle, Director, Michigan Department of Transportation, Lansing
Douglas W. Stotlar, President and Chief Executive Officer, Con-Way, Inc., Ann Arbor, Michigan
C. Michael Walton, Ernest H. Cockrell Centennial Chair in Engineering, University of Texas, Austin (Past Chair, 1991)

Peter H. Appel, Administrator, Research and Innovative Technology Administration, U.S. Department of Transportation (ex officio)
J. Randolph Babbitt, Administrator, Federal Aviation Administration, U.S. Department of Transportation (ex officio)
Rebecca M. Brewster, President and COO, American Transportation Research Institute, Smyrna, Georgia (ex officio)
Anne S. Ferro, Administrator, Federal Motor Carrier Safety Administration, U.S. Department of Transportation (ex officio)
LeRoy Gishi, Chief, Division of Transportation, Bureau of Indian Affairs, U.S. Department of the Interior, Washington, D.C. (ex officio)
John T. Gray, Senior Vice President, Policy and Economics, Association of American Railroads, Washington, D.C. (ex officio)

John C. Horsley, Executive Director, American Association of State Highway and Transportation Officials, Washington, D.C. (ex officio)
David T. Matsuda, Deputy Administrator, Maritime Administration, U.S. Department of Transportation (ex officio)
Victor M. Mendez, Administrator, Federal Highway Administration, U.S. Department of Transportation (ex officio)
William W. Millar, President, American Public Transportation Association, Washington, D.C. (ex officio) (Past Chair, 1992)

Tara O'Toole, Under Secretary for Science and Technology, U.S. Department of Homeland Security (ex officio)
Robert J. Papp (Adm., U.S. Coast Guard), Commandant, U.S. Coast Guard, U.S. Department of Homeland Security (ex officio)

Cynthia L. Quarterman, Administrator, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation (ex officio)
Peter M. Rogoff, Administrator, Federal Transit Administration, U.S. Department of Transportation (ex officio)
David L. Strickland, Administrator, National Highway Traffic Safety Administration, U.S. Department of Transportation (ex officio)

Joseph C. Szabo, Administrator, Federal Railroad Administration, U.S. Department of Transportation (ex officio)
Polly Trottenberg, Assistant Secretary for Transportation Policy, U.S. Department of Transportation (ex officio)
Barry R. Wallerstein, Executive Officer, South Coast Air Quality Management District, Diamond Bar, California (ex officio)

* Membership as of August 2011.
SECURITY AND CRITICAL INFRASTRUCTURE PROTECTION

3 INTRODUCTION
Security and Critical Infrastructure Protection: Progress and Paths to Resilience
Joedy Cambridge and Stephan A. Parker
Presented in this issue are positive, practical solutions, responses, and approaches based on research findings in the past 10 years to prevent terrorist attacks similar to those of September 11, 2001, and to mitigate the effects of attacks if prevention fails.

4 Brittle Infrastructure, Community Resilience, and National Security
Stephen Flynn and Sean Burke
Countering natural and man-made threats effectively and efficiently requires cooperative, public–private, practitioner-guided programs to build infrastructure resilience at the federal, state, regional, and local levels, the authors note. They examine trends, hindrances, solutions, rationales, policies, and practical models.

8 Five Fundamental, Go-To Documents:
Essential Security-Related Titles for Transportation Agencies
Joe Crossett

10 Security 101: Primer on Protecting Agency Personnel and Assets
Ernest R. Frazier, Sr.

12 Enhancing the Security of U.S. Highway Bridges:
Developing Protective Design Guidance, Tools, and Techniques
Eric L. Sammarco, Eric B. Williamson, and Carrie E. Davis
The main structural components of a bridge are exposed, and major U.S. bridge specifications contain little guidance for protective design. The authors review findings from experimental and computational research for developing bridge-specific protective design provisions, engineering tools, and retrofit techniques to mitigate blast threats.

16 Buying Down Risk: Step-by-Step Guide to Cost-Effective Protection of Transportation Assets
Joe Scanlon

19 Planning for Bridge Security
Steve Ernst

20 Addressing Vulnerabilities in Transit Security:
Developments Since September 11, 2001
Yuko J. Nakanishi
Transit agencies have worked with the Transportation Security Administration, the Federal Transit Administration, and local partners on risk and vulnerability assessments, training and outreach, information sharing, surveillance and detection technologies, and the deployment of transit police, security personnel, and canine teams to increase their preparedness and capabilities to deter and detect terrorism.

25 Trust Builds Speed: Communicating Emergency Transportation Options to Vulnerable Populations
Deborah Matherly and Jane Mobley

27 All-Hazards Planning: Coordinating the Many Levels of Emergency Response
Charles E. Wallace

29 Improving Resilience in Rail Transit Corridors: Developing Models for Estimating the Impacts of System Disruptions
Michael Greenberg, Karen Lowrie, Tayfur Altıok, Michael Lahr, Paul Lioy, and Henry Mayer
Transportation Research Board activities.

31 Airport Security: Which Poses the Greater Threat—Passengers or Air Cargo?
Richard W. Bloom
The security threat from passengers or air cargo changes, depending on risk—the continuous coupling of threat with vulnerability, qualified by the impact and probability of a terrorist attack. The author explores the difficulties of passenger screening, the vulnerabilities of baggage and cargo screening—and in the supply chain—and problems with technologies.

37 North American Perimeter Security: How Best to Keep Trade Moving?
Mary R. Brooks
The hardening of the U.S.—Canada border for security has affected trade since September 11, 2001. The new Beyond the Border vision of perimeter security, however, has renewed interest in refining and returning the two nations’ relationship in security, trade, and transportation; the author traces problems to be addressed, as well as joint initiatives to expect.

44 Supporting Secure and Resilient Inland Waterways
Heather Nachtmann

45 POINT OF VIEW
Maritime Security, Piracy, and the Global Supply Chain
Stephen Carmel
Piracy has had limited—if any—impact on global supply chains and zero effect on supply chains critical to the United States, according to the author, but an obsession with piracy has distracted attention from the myriad of other threats to world trade and maritime security, including misguided policy.

Coming Next Issue
The magazine’s first-ever theme issue on aviation topics is getting ready for takeoff, with a cargo of feature articles covering the Next-Generation Air Transport System, which will transform U.S. air traffic control from a ground-based, human-centric system to a satellite-based, airplane-centric system; the future of aviation sustainability; commercial aviation’s pursuit of sustainable alternative fuels; aviation security; economics of the aviation industry; and more.

Experimental technology to assist in navigation; the aviation industry is undergoing rapid changes and is testing innovations at all levels.
