*Technology Transfer
Successes*

The National Academies of
SCIENCES • ENGINEERING • MEDICINE

TRB
TRANSPORTATION RESEARCH BOARD

The **National Academy of Sciences** was established in 1863 by an Act of Congress, signed by President Lincoln, as a private, nongovernmental institution to advise the nation on issues related to science and technology. Members are elected by their peers for outstanding contributions to research. Dr. Marcia McNutt is president.

The **National Academy of Engineering** was established in 1964 under the charter of the National Academy of Sciences to bring the practices of engineering to advising the nation. Members are elected by their peers for extraordinary contributions to engineering. Dr. C. D. Mote, Jr., is president.

The **National Academy of Medicine** (formerly the Institute of Medicine) was established in 1970 under the charter of the National Academy of Sciences to advise the nation on medical and health issues. Members are elected by their peers for distinguished contributions to medicine and health. Dr. Victor J. Dzau is president.

The three Academies work together as the National Academies of Sciences, Engineering, and Medicine to provide independent, objective analysis and advice to the nation and conduct other activities to solve complex problems and inform public policy decisions. The Academies also encourage education and research, recognize outstanding contributions to knowledge, and increase public understanding in matters of science, engineering, and medicine.

Learn more about the National Academies of Sciences, Engineering, and Medicine at www.national-academies.org.

The **Transportation Research Board** is one of seven major programs of the National Academies of Sciences, Engineering, and Medicine. The mission of the Transportation Research Board is to provide leadership in transportation innovation and progress through research and information exchange, conducted within a setting that is objective, interdisciplinary, and multi-modal. The Board's varied committees, task forces, and panels annually engage about 7,000 engineers, scientists, and other transportation researchers and practitioners from the public and private sectors and academia, all of whom contribute their expertise in the public interest. The program is supported by state transportation departments, federal agencies including the component administrations of the U.S. Department of Transportation, and other organizations and individuals interested in the development of transportation.

TRANSPORTATION RESEARCH BOARD 2017 EXECUTIVE COMMITTEE*

Chair: Malcolm Dougherty, Director, California Department of Transportation, Sacramento
Vice Chair: Katherine F. Turnbull, Executive Associate Director and Research Scientist, Texas A&M Transportation Institute, College Station
Executive Director: Neil J. Pedersen, Transportation Research Board

Victoria A. Arroyo, Executive Director, Georgetown Climate Center; Assistant Dean, Centers and Institutes; and Professor and Director, Environmental Law Program, Georgetown University Law Center, Washington, D.C.
Scott E. Bennett, Director, Arkansas State Highway and Transportation Department, Little Rock
Jennifer Cohan, Secretary, Delaware Department of Transportation, Dover
James M. Crites, Executive Vice President of Operations, Dallas–Fort Worth International Airport, Texas (Past Chair, 2016)
Nathaniel P. Ford, Sr., Executive Director–CEO, Jacksonville Transportation Authority, Jacksonville, Florida
A. Stewart Fotheringham, Professor, School of Geographical Sciences and Urban Planning, Arizona State University, Tempe
John S. Halikowski, Director, Arizona Department of Transportation, Phoenix
Susan Hanson, Distinguished University Professor Emerita, Graduate School of Geography, Clark University, Worcester, Massachusetts
Steve Heminger, Executive Director, Metropolitan Transportation Commission, Oakland, California
Chris T. Hendrickson, Hamerschlag Professor of Engineering, Carnegie Mellon University, Pittsburgh, Pennsylvania
Jeffrey D. Holt, Managing Director, Power, Energy, and Infrastructure Group, BMO Capital Markets Corporation, New York
S. Jack Hu, Vice President for Research and J. Reid and Polly Anderson Professor of Manufacturing, University of Michigan, Ann Arbor
Roger B. Huff, President, HGLC, LLC, Farmington Hills, Michigan
Geraldine Knatz, Professor, Sol Price School of Public Policy, Viterbi School of Engineering, University of Southern California, Los Angeles
Melinda McGrath, Executive Director, Mississippi Department of Transportation, Jackson
Patrick K. McKenna, Director, Missouri Department of Transportation, Jefferson City
James P. Redeker, Commissioner, Connecticut Department of Transportation, Newington
Mark L. Rosenberg, Executive Director, The Task Force for Global Health, Inc., Decatur, Georgia
Daniel Sperling, Professor of Civil Engineering and Environmental Science and Policy; Director, Institute of Transportation Studies, University of California, Davis (Past Chair, 2015)
Gary C. Thomas, President and Executive Director, Dallas Area Rapid Transit, Dallas, Texas
Pat Thomas, Senior Vice President of State Government Affairs, United Parcel Service, Washington, D.C.
James M. Tien, Distinguished Professor and Dean Emeritus, College of Engineering, University of Miami, Coral Gables, Florida
Dean H. Wise, Vice President of Network Strategy, Burlington Northern Santa Fe Railway, Fort Worth, Texas
Charles A. Zelle, Commissioner, Minnesota Department of Transportation, Saint Paul

Alberto Ayala, Deputy Executive Officer, California Air Resources Board, Sacramento (ex officio)
Mary R. Brooks, Professor Emerita, Dalhousie University, Halifax, Nova Scotia, Canada, and Chair, TRB Marine Board (ex officio)
Jack Danielson, Executive Director, National Highway Traffic Safety Administration, U.S. Department of Transportation (ex officio)
Audrey Farley, Executive Director, Office of the Assistant Secretary for Research and Technology, U.S. Department of Transportation (ex officio)
LeRoy Gishi, Chief, Division of Transportation, Bureau of Indian Affairs, U.S. Department of the Interior, Washington, D.C. (ex officio)
John T. Gray II, Senior Vice President, Policy and Economics, Association of American Railroads, Washington, D.C. (ex officio)
Michael P. Huerta, Administrator, Federal Aviation Administration, U.S. Department of Transportation (ex officio)
Daphne Y. Jefferson, Deputy Administrator, Federal Motor Carrier Safety Administration, U.S. Department of Transportation (ex officio)
Bevan B. Kirley, Research Associate, University of North Carolina Highway Safety Research Center, Chapel Hill, and Chair, TRB Young Members Council (ex officio)
Howard McMillan, Acting Administrator, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation (ex officio)
Wayne Nastri, Acting Executive Officer, South Coast Air Quality Management District, Diamond Bar, California (ex officio)
Craig A. Rutland, U.S. Air Force Pavement Engineer, U.S. Air Force Civil Engineer Center, Tyndall Air Force Base, Florida (ex officio)
Reuben Sarkar, Deputy Assistant Secretary for Transportation, U.S. Department of Energy (ex officio)
Todd T. Semonite (Lieutenant General, U.S. Army), Chief of Engineers and Commanding General, U.S. Army Corps of Engineers, Washington, D.C. (ex officio)
Karl Simon, Director, Transportation and Climate Division, U.S. Environmental Protection Agency (ex officio)
Joel Szabat, Executive Director, Maritime Administration, U.S. Department of Transportation (ex officio)
Walter C. Waidelich, Jr., Acting Deputy Administrator, Federal Highway Administration, U.S. Department of Transportation (ex officio)
Patrick Warren, Executive Director, Federal Railroad Administration, U.S. Department of Transportation (ex officio)
Matthew Welbes, Executive Director, Federal Transit Administration, U.S. Department of Transportation (ex officio)
Richard A. White, Acting President and CEO, American Public Transportation Association, Washington, D.C. (ex officio)
Frederick G. (Bud) Wright, Executive Director, American Association of State Highway and Transportation Officials, Washington, D.C. (ex officio)
Paul F. Zukunft (Admiral, U.S. Coast Guard), Commandant, U.S. Coast Guard, U.S. Department of Homeland Security (ex officio)

* Membership as of August 2017.

MOVING RESEARCH INTO PRACTICE

3 INTRODUCTION

Moving Research into Practice

Patrick Casey

In any research project, the final report is but the first step toward implementation of a new material, process, or technology. Articles explore the many strategies that public and private transportation organizations have used to advance transportation research into practice.

6 **Moving Research Results to Practice: The Changes Generating Today's Successes**

Barbara T. Harder

Processes that integrate technology transfer and the implementation of research results throughout the research and development stages have had notable success in advancing the practical applications of transportation innovations, the author shows, citing exemplary programs that have benefited infrastructure, safety, and mobility.

14 Assessing Technology Readiness Levels to Increase Implementation

David Kuehn

15 **Research Results Go Statewide: Virginia Transportation Research Council's Implementation Program**

Cathy McGhee, Kevin Wright, and Jimmy White

Seeking a streamlined way to track project outcomes, the Virginia Transportation Research Council created a dedicated research implementation program, complete with coordinator and budget. Presented are examples of successfully implemented research recommendations and lessons learned.

20 Making Cost-Effective Highway Maintenance Decisions: State Pooled Fund Develops System, Supports Implementation

David L. Huft

22 **State Transportation Innovation Councils: Partnering for Continuous Innovation**

Thomas Harman

State Transportation Innovation Councils are providing in-state connections for government at all levels, industry, academia, and other stakeholders to work together to identify, advance, and deploy the technologies and processes that promise the greatest impact. The author describes the program and presents successes from several states.

28 Successful Approach to Technology Transfer: Volpe Center Introduces Primer

Santiago Navarro

29 **Active Implementation at the National Cooperative Highway Research Program: Frameworks for Moving Research into Practice**

Waseem Dekelbab, Christopher Hedges, and Lori Sundstrom

Through active implementation, the National Cooperative Highway Research Program is moving the results of research projects into practice by building on a procedural infrastructure, applying dedicated funding, and relying on proven expertise and on implementation teams, working closely with national partners.

37 Pioneering Ideas from the TRB Annual Meeting: Utah DOT Realizes Savings from Innovations

David Stevens and Cameron Kergaye

TR NEWS

features articles on innovative and timely research and development activities in all modes of transportation. Brief news items of interest to the transportation community are also included, along with profiles of transportation professionals, meeting announcements, summaries of new publications, and news of Transportation Research Board activities.

TR News is produced by the Transportation Research Board Publications Office

38 Going, Seeing, Showing, and Doing: Low-Tech Technology Transfer Works

Laura Melendy and Ann Brody Guy

Person-to-person tools—on-site demonstrations, peer exchanges, and more—are low tech but effective modes of technology transfer. These on-the-ground collaborations enable in-depth exploration and low-risk assessment of new technologies and are augmented easily by high-tech knowledge sharing methods.

44 Energizing Transportation Technology Transfer with Effective Public Relations

Edward M. Bury

46 National Network for Technology Transfer to Local Agencies: The Local and Tribal Technical Assistance Programs

Janet Leli

Through years of disseminating research to transportation agencies, the Local Technical Assistance Program and the Tribal Technical Assistance Program have developed useful technology transfer communication strategies to transform ideas into practice at the local and tribal levels.

52 Technology Transfer at a European Construction Company: Case Study of ACCIONA Construction, Spain

Aquilino Alvarez-Castro And Javier Bonilla-Díaz

Case studies of technology transfer at a European construction company— involving composite materials, sustainability, standards development, and building information modeling—offer insights into the ways that private-sector organizations can partner in advancing transportation to benefit all stakeholders.

Transportation systems resilience is the focus of articles in the September–October issue of TR News, addressing advance preparation, mitigation, and recovery from systemwide disruptions; the roles and interdependencies of the private sector, government agencies, nongovernment organizations, and universities; establishing and safeguarding business continuity; the human aspects of resilience-building activities in the transportation sector, including the development of social capital; strategies for evacuation and emergency transportation; the status of resilience-related research and critical needs; and more.

The Texas Department of Transportation has installed Evaculane shoulder signs on US-290 between Houston and Hempstead.
