

## Table of Contents

|  |           |
|--|-----------|
| <b>Part A: Introduction</b> .....  | <b>1</b>  |
| <b>Chapter 1: Transportation Operations Manual Introduction</b>                                | <b>3</b>  |
| 1.1 Introduction to Transportation Operations  | 5         |
| 1.1.1 Scope of TSMO  | 7         |
| 1.2 Manual Need and Purpose  | 9         |
| 1.3 Organization of the Manual   | 10        |
| 1.3.1 The Parts of the Manual and Their Intended Audience                                      | 11        |
| 1.4 How to Use the Manual  | 15        |
| 1.5 Resources and Related Activities   | 16        |
| <b>Part B: TSMO Concepts and Context</b> .....   | <b>19</b> |
| <b>Chapter 2: TSMO Concepts</b>  | <b>21</b> |
| 2.1 Challenges Addressed by TSMO   | 21        |
| 2.1.1 Congestion and Disruption  | 21        |
| 2.1.2 Responding with TSMO   | 23        |
| 2.2 TSMO Tactics and Outcomes  | 24        |
| 2.3 TSMO Application Contexts  | 27        |
| 2.4 TSMO Implementation Characteristics  | 30        |
| 2.5 TSMO and Collaborating Entities  | 31        |
| 2.6 TSMO Benefits  | 32        |
| <b>Chapter 3: TSMO in the Transportation Agency Context</b>                                    | <b>37</b> |
| 3.1 Foundational Concepts  | 37        |
| 3.1.1 Performance Management   | 38        |
| 3.1.2 TSMO as a System   | 40        |
| 3.1.3 TSMO vs Legacy DOT Programs  | 41        |
| 3.2 Integrating TSMO into Agency Goals, Objectives, and Performance Management                 | 42        |
| 3.2.1 Trends and Considerations for Transportation Agency Mission Focus                        | 42        |
| 3.2.2 Increased Agency Accountability  | 43        |
| 3.2.3 Achieving Agency Goals and Objectives with TSMO  | 43        |
| 3.2.4 Incorporating TSMO as Agency Goals Evolve  | 45        |
| 3.2.5 Performance Management and Reporting   | 46        |
| 3.3 Relationship to Agency Planning and Programming  | 46        |
| 3.4 Relationship to Agency Project Development and Design                                      | 48        |
| <b>Chapter 4: Agency Readiness to Advance TSMO</b>   | <b>51</b> |
| 4.1 Elements of Agency Readiness   | 52        |
| 4.1.1 Resources  | 52        |
| 4.1.2 Institutional Framework  | 53        |
| 4.2 Essential Institutional Capabilities   | 54        |
| 4.2.1 Business Processes – Agency Planning, Programming and Funding                            | 54        |
| 4.2.2 Performance Measurement/Management   | 55        |
| 4.2.3 Systems and Technology – Systems Engineering, Interoperability and Technology Management | 55        |
| 4.2.4 Organization and Staffing/Workforce  | 55        |
| 4.2.5 Collaboration and Outreach   | 56        |
| 4.2.6 Culture and Leadership   | 57        |
| 4.3 The TSMO Capability Maturity Model   | 58        |

|       |                               |    |
|-------|-------------------------------|----|
| 4.4   | The Business Case for TSMO    | 60 |
| 4.4.1 | Making the Business Case      | 60 |
| 4.4.2 | Contents of the Business Case | 61 |

## Part C: TSMO Program Development and Management.....63

### Chapter 5: TSMO Program Planning 65

|       |  |    |
|-------|--|----|
| 5.1   | What is a TSMO Program?                                    | 65 |
| 5.1.1 | Definition   | 65 |
| 5.1.2 | Relationship to Other Programs                             | 66 |
| 5.1.3 | Communicating the Value of TSMO – Making the Business Case | 67 |
| 5.1.4 | Improving and Sustaining a TSMO Program                    | 69 |
| 5.2   | The TSMO Program Plan                                      | 70 |
| 5.2.1 | Concept of a TSMO Program Plan                             | 70 |
| 5.2.2 | Functions of a TSMO Program Plan                           | 71 |
| 5.3   | Elements of a TSMO Program Plan                            | 71 |
| 5.3.1 | Strategic Element  | 71 |
| 5.3.2 | Programmatic Element                                       | 73 |
| 5.3.3 | Tactical Element   | 75 |
| 5.4   | TSMO Program Planning Considerations                       | 76 |
| 5.4.1 | Program Plan Development Process                           | 76 |
| 5.4.2 | Variation in Need and Plans                                | 76 |
| 5.4.3 | Statewide vs. MPO TSMO Program Plans                       | 77 |
| 5.4.4 | Program Plan Updates                                       | 78 |

### Chapter 6: Planning, Programming, and Funding for TSMO Tactics 81

|       |  |    |
|-------|--|----|
| 6.1   | Definitions  | 82 |
| 6.1.1 | Planning   | 82 |
| 6.1.2 | Programming  | 82 |
| 6.1.3 | Funding  | 82 |
| 6.1.4 | TSMO Program Planning vs. Planning for TSMO Tactics                | 82 |
| 6.2   | Approaches to TSMO Tactics Planning and Programming                | 83 |
| 6.2.1 | Policy Context   | 83 |
| 6.2.2 | Relationship to Standard Agency Planning and Programming Processes | 83 |
| 6.3   | Scales of Planning for TSMO Tactics                                | 85 |
| 6.3.1 | Overview   | 85 |
| 6.3.2 | Statewide TSMO Planning  | 85 |
| 6.3.3 | District/Regional TSMO Planning                                    | 85 |
| 6.3.4 | Subarea Planning   | 86 |
| 6.3.5 | Corridor Planning  | 87 |
| 6.3.6 | Capital Improvement Planning that Incorporates TSMO Tactics        | 89 |
| 6.3.7 | Scenario Planning for TSMO   | 89 |
| 6.4   | Key Steps in a TSMO Tactics Planning Process                       | 90 |
| 6.4.1 | Overview   | 90 |
| 6.4.2 | Purpose and Scope  | 91 |
| 6.4.3 | Project Management and Stakeholder Roles                           | 91 |
| 6.4.4 | Analysis of Needs  | 92 |
| 6.4.5 | Candidate Tactics Identification                                   | 92 |
| 6.4.6 | Alternatives Evaluation  | 93 |
| 6.4.7 | Implementation and Operations and Maintenance Requirements         | 94 |

|   |   |            |
|---|---|------------|
| 6.5   | Planning Analysis Tools   | 94         |
| 6.5.1   | Use of Planning Analysis Tools                                  | 94         |
| 6.5.2   | Sketch-planning Tools   | 95         |
| 6.5.3   | Analytical or Deterministic Tools                               | 95         |
| 6.5.4   | Travel Demand Models  | 95         |
| 6.5.5   | Simulation Models   | 96         |
| 6.5.6   | Benefit-Cost Analysis   | 96         |
| 6.6   | TSMO Programming and Funding                                    | 97         |
| 6.6.1   | Eligibility and Sources of Funds                                | 97         |
| 6.6.2   | Cost Considerations   | 98         |
| 6.6.3   | Programming and Funding Context                                 | 99         |
| 6.7   | TSMO Asset Management   | 100        |
| 6.7.1   | Policy Context and Motivation                                   | 100        |
| 6.7.2   | Asset Management Program Goals and Components                   | 101        |
| 6.7.3   | Integrated vs. Separate TSMO Asset Management                   | 104        |
| <b>Chapter 7: TSMO Performance Management</b> |   | <b>107</b> |
| 7.1   | Orientation and Definitions                                     | 107        |
| 7.1.1   | Transportation Performance Management                           | 107        |
| 7.1.2   | TSMO Performance Management                                     | 108        |
| 7.1.3   | Steps to TSMO Performance Management                            | 108        |
| 7.2   | TSMO Performance Management as a Strategic Policy Focus         | 109        |
| 7.2.1   | Introduction  | 109        |
| 7.2.2   | Drivers and Response  | 109        |
| 7.2.3   | Policy Commitment to TSMO                                       | 110        |
| 7.3   | Measures and Targets Supporting TSMO-Relevant Agency Objectives | 111        |
| 7.3.1   | Introduction  | 111        |
| 7.3.2   | Agency-Focused Performance Measures                             | 112        |
| 7.3.3   | User-Focused Performance Measures                               | 113        |
| 7.3.4   | Performance Measure Selection                                   | 114        |
| 7.3.5   | Target Setting  | 115        |
| 7.3.6   | Federal Performance Measure Reporting Requirements              | 118        |
| 7.4   | Performance Data Collection, Analysis and Management            | 118        |
| 7.4.1   | Introduction  | 118        |
| 7.4.2   | Data Collection to Support Input Measures                       | 119        |
| 7.4.3   | Data Collection to Support Output and Outcome Measures          | 119        |
| 7.4.4   | Use of Third-Party Data   | 120        |
| 7.4.5   | Use of Archived Data  | 121        |
| 7.4.6   | TSMO Performance Analytics                                      | 122        |
| 7.4.7   | TSMO Data Governance and Data Business Plan                     | 123        |
| 7.5   | Performance Reporting   | 123        |
| 7.5.1   | Introduction  | 123        |
| 7.5.2   | Internal Reporting  | 124        |
| 7.5.3   | External Reporting  | 124        |
| 7.5.4   | Reports and Dashboards  | 125        |
| 7.6   | Real-time TSMO Tactic Management for Improved Performance       | 127        |
| 7.6.1   | Introduction  | 127        |
| 7.6.2   | Using Performance Information to Support Active Management      | 128        |

|   |  |            |
|---|--|------------|
| 7.7   | Incorporation of Performance Management into Planning and Programming Decision Making    | 130        |
| 7.7.1   | Introduction   | 130        |
| 7.7.2   | Using TSMO-Based Performance Measures in Statewide and Regional Planning and Programming | 130        |
| 7.8   | Institutionalization of Performance Management   | 132        |
| 7.8.1   | Introduction   | 132        |
| 7.8.2   | Core Features of Institutionalization  | 132        |
| 7.8.3   | Agency Reorientation for TSMO Performance Management                                     | 133        |
| 7.8.4   | The Institutional Role of the TMC to Support for Performance Management                  | 134        |
| <b>Chapter 8: Systems Engineering, Interoperability and Technology Management</b> |  | <b>137</b> |
| 8.1   | Definitions  | 137        |
| 8.1.1   | Systems and Systems Engineering  | 137        |
| 8.1.2   | System Architecture  | 138        |
| 8.1.3   | Interoperability   | 139        |
| 8.1.4   | Concept of Operations  | 139        |
| 8.2   | Systems Engineering Context  | 139        |
| 8.2.1   | Rationale and Value  | 139        |
| 8.2.2   | Key Features   | 140        |
| 8.2.3   | Federal Systems Engineering Requirements   | 140        |
| 8.3   | System Architecture  | 141        |
| 8.4   | Standards  | 143        |
| 8.5   | The Systems Engineering Process  | 144        |
| 8.5.1   | Systems Engineering Process Overview   | 144        |
| 8.5.2   | Concept of Operations  | 145        |
| 8.5.3   | Systems Engineering V-Model  | 146        |
| 8.5.4   | Systems Engineering Level of Detail  | 148        |
| 8.6   | Systems Engineering Management Plans   | 151        |
| 8.7   | Supporting a Systems Engineering Environment   | 152        |
| 8.8   | Integrating TSMO Systems Engineering into the Project Development Process                | 153        |
| <b>Chapter 9: Organization and Workforce</b>                                      |  | <b>157</b> |
| 9.1   | Definitions  | 157        |
| 9.1.1   | Organization   | 157        |
| 9.1.2   | Workforce  | 157        |
| 9.2   | Organization   | 158        |
| 9.2.1   | Organizational Challenges to Effective TSMO  | 158        |
| 9.2.2   | Context for Organizational Models  | 158        |
| 9.2.3   | Organizational Model Options   | 159        |
| 9.3   | Workforce  | 163        |
| 9.3.1   | Workforce Challenges to Effective TSMO   | 163        |
| 9.3.2   | Positions and Technical Capabilities   | 163        |
| 9.3.3   | Business and Soft Skills and Abilities   | 167        |
| 9.3.4   | Workforce Composition  | 167        |
| 9.3.5   | Outsourcing for Staff Capabilities   | 167        |
| 9.3.6   | Workforce Development  | 168        |
| 9.3.7   | Recruitment and Retention  | 172        |

|  |            |
|--|------------|
| <b>Chapter 10: Collaboration and Outreach</b>                                      | <b>177</b> |
| 10.1 Definitions   | 177        |
| 10.1.1 Collaboration   | 177        |
| 10.1.2 Outreach  | 177        |
| 10.2 Collaboration   | 178        |
| 10.2.1 Introduction to Collaboration and TSMO                                      | 178        |
| 10.2.2 Public Sector Collaborative Dependencies in TSMO                            | 178        |
| 10.2.3 Infrastructure Owner-Operators vs. MPO Collaboration Context                | 180        |
| 10.2.4 Benefits of Collaboration   | 182        |
| 10.2.5 Mechanisms for Public-Public Collaboration                                  | 183        |
| 10.2.6 Overcoming the Challenges of Collaboration                                  | 186        |
| 10.2.7 Contracted Services and Public-Private Partnerships                         | 186        |
| 10.3 Outreach  | 188        |
| 10.3.1 Program-level Outreach  | 188        |
| 10.3.2 Project-Level Outreach  | 190        |
| 10.3.3 Outreach Considerations   | 191        |
| <b>Chapter 11: Culture and Leadership</b>  | <b>195</b> |
| 11.1 Definition  | 195        |
| 11.1.1 Culture   | 195        |
| 11.2 Essentials of Culture   | 196        |
| 11.2.1 Significance  | 196        |
| 11.2.2 Principal Challenges to Establishing an Agency TSMO Culture                 | 196        |
| 11.2.3 Management Challenges   | 197        |
| 11.3 Fostering a TSMO Culture  | 198        |
| 11.3.1 The Need to Understand TSMO's Role and<br>Contribution to Agency Objectives | 198        |
| 11.3.2 Committing to Real-time System Performance                                  | 199        |
| 11.3.3 Aligning Program Authority  | 200        |
| 11.3.4 The Role of Leadership  | 201        |
| <b>Chapter 12: TSMO Capability Improvement, Guidance and Tools</b>                 | <b>207</b> |
| 12.1 Programmatic Challenges   | 207        |
| 12.2 The TSMO Capability Maturity Model  | 208        |
| 12.2.1 The Application of Capability Maturity                                      | 208        |
| 12.2.2 The Dimensions and Levels of TSMO Capability Maturity                       | 209        |
| 12.3 TSMO Capability Maturity Model Self-Assessment                                | 211        |
| 12.3.1 TSMO CMM Self-Assessment Structure  | 211        |
| 12.3.2 Recommendations for a Successful TSMO CMM Self-Assessment                   | 212        |
| 12.3.3 Converting Capability Assessments to Action Plans                           | 214        |
| 12.4 TSMO CMM Guidance and Tools   | 214        |
| 12.4.1 AASHTO TSMO Guidance  | 214        |
| 12.4.2 FHWA TSMO Capability Maturity Frameworks                                    | 215        |
| 12.4.3 CMM and CMF Workshops   | 215        |
| <b>Part D: Project Development</b> .....   | <b>219</b> |
| <b>Chapter 13: Performance-Based Practical Design</b>                              | <b>221</b> |
| 13.1 Introduction  | 221        |
| 13.2 Performance-Based Practical Design Concept                                    | 222        |
| 13.2.1 Project Performance Measures  | 223        |

|                    |  |            |
|--------------------|--|------------|
| 13.2.2             | Balance of Needs and Impacts                             | 224        |
| 13.2.3             | Safety Considerations                                    | 225        |
| 13.2.4             | Design Exceptions  | 226        |
| 13.3               | Considerations for Design Flexibility                    | 227        |
| 13.3.1             | Functional Classification and Context                    | 227        |
| 13.3.2             | Multimodal/Freight                                       | 229        |
| 13.3.3             | Traffic Volume   | 230        |
| 13.3.4             | Traffic Speed  | 232        |
| 13.4               | Analysis Methods   | 233        |
| 13.4.1             | Analytical Tools   | 233        |
| 13.4.2             | Deterministic Tools                                      | 237        |
| 13.4.3             | Simulation Tools   | 239        |
| 13.5               | Integration with TSMO                                    | 239        |
| 13.5.1             | Freeway Operations                                       | 240        |
| 13.5.2             | Arterial Operations                                      | 241        |
| 13.5.3             | Incident Management                                      | 241        |
| 13.5.4             | Demand Management  | 242        |
| 13.6               | PBPD Process Relative to TSMO                            | 242        |
| 13.6.1             | Define Project Needs                                     | 242        |
| 13.6.2             | Establish Performance Measures                           | 243        |
| 13.6.3             | Evaluate Alternatives                                    | 243        |
| 13.7               | Examples of PBPD TSMO Projects                           | 243        |
| 13.7.1             | High-Occupancy Toll Lanes                                | 243        |
| 13.7.2             | Urban Freeway Reconstruction                             | 244        |
| 13.7.3             | Innovative Intersections                                 | 245        |
| 13.7.4             | Regional Performance-Based Planning                      | 245        |
| 13.7.5             | Active Traffic Management                                | 247        |
| <b>Chapter 14:</b> | <b>Performance Measures for Operational Improvements</b> | <b>249</b> |
| 14.1               | Introduction   | 249        |
| 14.2               | Performance Measures                                     | 249        |
| 14.2.1             | Level of Service (LOS)                                   | 251        |
| 14.2.2             | Reliability Measures                                     | 253        |
| 14.2.3             | Other Operational Measures                               | 254        |
| 14.3               | Reorientation to Improving Performance                   | 255        |
| 14.3.1             | Freeways   | 255        |
| 14.3.2             | Arterials  | 256        |
| 14.3.3             | Collectors and Local Streets                             | 256        |
| 14.3.4             | Intersection   | 257        |
| 14.3.5             | Grade Separation and Interchanges                        | 257        |
| 14.4               | AASHTO Green Book  | 258        |
| 14.4.1             | Research to Date   | 259        |
| <b>Chapter 15:</b> | <b>Linking TSMO to Capital Projects</b>                  | <b>261</b> |
| 15.1               | Project Development Overview                             | 261        |
| 15.1.1             | Steps  | 262        |
| 15.1.2             | Roles and Responsibilities                               | 264        |
| 15.2               | Methods for TSMO Input                                   | 266        |
| 15.3               | Project Planning and Programming                         | 267        |
| 15.3.1             | Purpose and Need   | 267        |
| 15.3.2             | Alternatives Evaluation                                  | 268        |

|                                    |   |            |
|------------------------------------|---|------------|
| 15.3.3                             | Programming   | 268        |
| 15.4                               | Project Design  | 269        |
| 15.4.1                             | Preliminary Design                                      | 269        |
| 15.4.2                             | Final Design  | 270        |
| 15.5                               | Construction  | 270        |
| 15.5.1                             | Construction Impacts                                    | 271        |
| 15.5.2                             | Mitigation  | 271        |
| 15.5.3                             | Monitoring for Impacts                                  | 274        |
| 15.6                               | Maintenance and Operations                              | 276        |
| 15.6.1                             | Evaluation of Needs                                     | 276        |
| 15.6.2                             | Staff Resources   | 278        |
| 15.6.3                             | Training and Standard Operating Procedures              | 279        |
| <b>Chapter 16: Procurement</b>     |   | <b>281</b> |
| 16.1                               | Introduction  | 281        |
| 16.2                               | Procurement Overview                                    | 281        |
| 16.2.1                             | Organizational Location                                 | 282        |
| 16.2.2                             | Engagement Timeframe                                    | 282        |
| 16.3                               | Work Type   | 283        |
| 16.3.1                             | Construction  | 283        |
| 16.3.2                             | Engineering and Design-related Services                 | 283        |
| 16.3.3                             | Maintenance   | 284        |
| 16.3.4                             | Operational Improvement                                 | 284        |
| 16.4                               | Selection Method  | 285        |
| 16.4.1                             | Cost-based Selection                                    | 285        |
| 16.4.2                             | Qualifications-based Selection                          | 286        |
| 16.4.3                             | Combined Qualifications and Cost Selection (Best Value) | 288        |
| 16.4.4                             | Sole Source Selection                                   | 289        |
| 16.5                               | Contract Mechanisms                                     | 290        |
| 16.5.1                             | Payment Structure                                       | 290        |
| 16.5.2                             | Award Structure.  | 291        |
| 16.6                               | Suggested TSMO Procurement Structures                   | 292        |
| 16.7                               | Innovative Procurement Options                          | 295        |
| 16.8                               | Examples of Operational Improvements                    | 295        |
| <b>Chapter 17: Project Funding</b> |   | <b>297</b> |
| 17.1                               | Introduction  | 297        |
| 17.2                               | Project Costs   | 297        |
| 17.2.1                             | Planning  | 298        |
| 17.2.2                             | Design  | 298        |
| 17.2.3                             | Construction/Equipment                                  | 298        |
| 17.2.4                             | Operations  | 299        |
| 17.2.5                             | Maintenance   | 299        |
| 17.3                               | Funding Process   | 300        |
| 17.3.1                             | Quantify Needs  | 300        |
| 17.3.2                             | Programming Timeframe                                   | 301        |
| 17.3.3                             | Partnerships  | 301        |
| 17.3.4                             | Justification   | 301        |
| 17.3.5                             | Submission  | 302        |
| 17.4                               | Local Funds   | 302        |
| 17.5                               | State Funds   | 303        |

|        |   |     |
|--------|---|-----|
| 17.6   | Federal Funding                             | 303 |
| 17.6.1 | National Highway Performance Program (NHPP) | 305 |
| 17.6.2 | Surface Transportation Block Grant (STBG)   | 306 |
| 17.6.3 | STBG Transportation Alternatives            | 307 |
| 17.6.4 | Congestion Management and Air Quality       | 307 |
| 17.6.5 | Highway Safety Improvement Program          | 309 |
| 17.6.6 | National Highway Freight Program (NHFP)     | 310 |
| 17.6.7 | Other (Research, Technology, and Education) | 311 |

## Part E: Tactical Elements ..... 313

### Chapter 18: Overview of Tactical Elements 315

|        |  |     |
|--------|--|-----|
| 18.1   | Managing Congestion  | 315 |
| 18.2   | Improving Safety   | 317 |
| 18.3   | Operational Performance Monitoring, TMCs, and Traveler Information | 318 |
| 18.3.1 | Performance Monitoring   | 318 |
| 18.3.2 | Transportation Management Centers                                  | 319 |
| 18.3.3 | Traveler Information Dissemination                                 | 320 |
| 18.4   | Tactic Categories  | 321 |

### Chapter 19: Fundamental Elements of Situational Awareness, Communication, Decision Support, and Control 327

|        |                                    |     |
|--------|------------------------------------|-----|
| 19.1   | Data and Information Gathering     | 327 |
| 19.2   | Traveler Information               | 330 |
| 19.2.1 | Pre-Trip Traveler Information      | 332 |
| 19.2.2 | En Route Traveler Information      | 334 |
| 19.3   | Transportation Management Centers  | 338 |
| 19.4   | Statewide and Regional Integration | 339 |

### Chapter 20: Event Management Tactics 341

|        |   |     |
|--------|---|-----|
| 20.1   | Traffic Incident Management                       | 343 |
| 20.1.1 | Implementing a TIM Program                        | 346 |
| 20.2   | Emergency Transportation Operations for Disasters | 351 |
| 20.3   | Road Weather Management                           | 356 |
| 20.4   | Work Zone Traffic Management                      | 364 |
| 20.5   | Planned Special Event Management                  | 369 |

### Chapter 21: Arterial Management 379

|      |  |     |
|------|--|-----|
| 21.1 | Traffic Signal Program Management                  | 380 |
| 21.2 | Advanced Traffic Signal Control                    | 384 |
| 21.3 | Arterial Contraflow Lane Reversal                  | 389 |
| 21.4 | Arterial Dynamic Shoulder Use / Transit-Only Lanes | 392 |

### Chapter 22: Freeway Management Tactics 397

|        |  |     |
|--------|--|-----|
| 22.1   | Ramp Management and Control            | 398 |
| 22.1.1 | Ramp Metering / Adaptive Ramp Metering | 398 |
| 22.1.2 | Special Use Treatments                 | 404 |
| 22.1.3 | Ramp Terminal Treatments               | 405 |
| 22.1.4 | Ramp Closure                           | 406 |
| 22.2   | Dynamic Junction Control               | 408 |
| 22.3   | Contraflow Lane Reversal               | 412 |
| 22.4   | Part-Time Shoulder Use                 | 418 |
| 22.5   | Dynamic Lane Use Control               | 422 |

|  |            |
|--|------------|
| 22.6 Dynamic Speed Limits or Speed Advisories                                | 424        |
| 22.7 Queue Warning   | 429        |
| 22.8 Summary   | 432        |
| <b>Chapter 23: Freight Operations</b>  | <b>437</b> |
| 23.1 Freight Operations around Ports and other Commercial Traffic Generators | 438        |
| 23.2 Truck Parking   | 446        |
| 23.3 Use of ELDs for e-Inspections to Expedite Freight                       | 452        |
| 23.4 Dynamic Truck Restrictions  | 456        |
| 23.5 CAV Pertaining to Freight   | 460        |
| <b>Chapter 24: Advanced Integrated Tactics</b>                               | <b>467</b> |
| 24.1 Active Management and TSMO  | 468        |
| 24.2 Managed Motorways and Freeways  | 470        |
| 24.3 Integrated Corridor Management  | 476        |
| 24.4 Managed Lanes   | 481        |
| 24.5 Summary   | 485        |
| <b>Chapter 25: Active Demand and Parking Management Tactics</b>              | <b>489</b> |
| 25.1 Dynamic Transit Fare Pricing  | 490        |
| 25.2 Managed Lanes   | 491        |
| 25.3 Variable Pricing  | 491        |
| 25.4 Dynamic Ridesharing   | 492        |
| 25.5 Dynamic Routing   | 496        |
| 25.6 Dynamic Transit / Demand-Responsive Transit                             | 500        |
| 25.7 Active Parking Management   | 500        |
| <b>Chapter 26: Active Transportation Tactics</b>                             | <b>507</b> |
| 26.1 Bicycle Lanes   | 508        |
| 26.2 Cycle Tracks  | 514        |
| 26.3 Bike Sharing  | 518        |
| 26.4 Pedestrian Facilities   | 522        |
| 26.5 Bicycle and Pedestrian Education  | 528        |
| <b>Chapter 27: Transit Tactics</b>   | <b>539</b> |
| 27.1 Transit Signal Priority   | 542        |
| 27.1.1 Passive and Active Signal Priority                                    | 542        |
| 27.1.2 Steps in Transit Signal Priority                                      | 543        |
| 27.2 Bus Rapid Transit   | 548        |
| 27.3 Dynamic Transit Fare Pricing  | 555        |
| 27.4 On-Demand Transit   | 557        |
| 27.5 Multimodal Transportation Centers                                       | 562        |
| <b>Chapter 28: Tolling and Road Pricing</b>                                  | <b>571</b> |
| 28.1 Tolling and Congestion Pricing  | 571        |
| 28.2 Cordon Pricing  | 576        |
| <b>Part F: Industry and Technology Trends</b> .....                          | <b>581</b> |
| <b>Chapter 29: Technology Trends</b>   | <b>583</b> |
| 29.1 Advanced Communications   | 584        |
| 29.2 Cybersecurity   | 586        |
| 29.2.1 Cyber Risks   | 587        |
| 29.2.2 Coordination with Information Technology (IT) Staff                   | 588        |
| 29.2.3 Self-Assessment, Planning, and Realistic Exercises                    | 588        |

|  |            |
|--|------------|
| 29.2.4 Cybersecurity Best Practices  | 590        |
| 29.2.5 Staying Current on Potential Threats and Best Practices   | 592        |
| 29.3 Big Data & Analytics  | 593        |
| 29.3.1 Integration of Many Technologies Across Many Sectors  | 594        |
| 29.3.2 Data Availability and Need for Robust Analytics   | 595        |
| 29.3.3 Potential Impacts and Opportunities   | 595        |
| 29.3.4 Policy Implications   | 596        |
| 29.4 Artificial Intelligence and Advanced Computing  | 597        |
| 29.4.1 Artificial Intelligence   | 597        |
| 29.4.2 Edge computing and cloud computing  | 599        |
| 29.5 Connected Vehicles  | 599        |
| 29.5.1 Anticipated Opportunities for Connected Vehicles<br>to Improve Transportation Operations          | 601        |
| 29.5.2 Anticipated Impacts of Connected Vehicles on Operations   | 602        |
| 29.6 Automated Vehicles  | 604        |
| 29.6.1 Anticipated Opportunities for Automated Vehicles<br>to Improve Transportation Operations          | 605        |
| 29.6.2 Synergies of Combining Connected and Automated Vehicle Features                                   | 606        |
| 29.6.3 Anticipated Impacts of Automated Vehicles on Agency Operations                                    | 609        |
| 29.6.4 Managing Uncertainties Around Automated Vehicles  | 612        |
| <b>Chapter 30: Industry Trends</b>   | <b>615</b> |
| 30.1 Changing Roles in the 21 <sup>st</sup> Century  | 615        |
| 30.2 Risk Management   | 618        |
| 30.3 Examples of Industry Trends in Operations   | 620        |
| 30.3.1 Mobility on Demand  | 620        |
| 30.3.2 Mobility as a Service   | 626        |
| 30.3.3 Smart Cities  | 629        |
| 30.3.4 Road Usage Charging   | 632        |
| 30.3.5 Next Generation Traffic Management Systems  | 637        |
| 30.3.6 Next Generation Traveler Information Systems  | 639        |
| 30.3.7 Potential Operations Impacts and Opportunities<br>of Next Generation Traveler Information Systems | 641        |
| 30.4 Emerging Technology Impacts on Agencies' Activities   | 642        |
| 30.5 Evolution of Organizations, Structure, and Workforce  | 644        |
| 30.6 Increased Emphasis on Technology  | 647        |
| 30.7 Increased Need for Data Management, Transportation<br>Performance Management, and Reporting         | 650        |
| 30.7.1 Increased Need for Workforce Development  | 652        |
| 30.7.2 Increased Need for Integration  | 654        |
| 30.7.3 Impacts on Agency Operations Activities Responding<br>to Right-of-Way Uses and Requests           | 656        |

**Part G: Terms and Definitions..... 661**

## List of Figures

|  |            |
|--|------------|
| <b>PART A: Introduction</b> .....  | <b>1</b>   |
| <b>Chapter 1: Transportation Operations Manual Introduction</b>                                | <b>3</b>   |
| Figure 1.1.1 Transportation Trip Chain   | 7          |
