

Knowledge Is Power: How TRB's Databases Improve Access to Transportation

Monday, April 19, 2010

Session Duration: 90 minutes

Learn how to conduct transportation research more efficiently and effectively. This free webinar provides practical tips for using the Transportation Research Information Services (TRIS), Research in Progress (RiP), and Research Needs Statements (RNS) databases. Panelists will provide an overview of each database, offer tips on how to refine searches, and demonstrate advanced features added to the databases last year. Learn how to enter records into the RiP Website and find out how agency publications are entered into TRIS. Panelists from the University of California, Berkeley and the Montana Department of Transportation will discuss ways that they use TRB databases to enhance their research programs.

Presenters for this session include:

Barbara Post, Transportation Research Board

Rita Evans and Kendra Levine, Harmer E. Davis Transportation Library, Institute of Transportation Studies, University of California, Berkeley

Susan Sillick, Montana Department of Transportation

Moderated by: Ken Winter, Virginia Department of Transportation
