

Transportation Infrastructure Group (AK) Safety Section (ACS)

Standing Committee on Transportation Safety Management Systems (ACS10)

Wednesday, Jan 8, 2025 8:00AM - 12:00PM, Marquis Salon 12 (M2) / Marriott Marquis

Scope: The committee will be concerned with the development and coordination of integrated safety management programs to reduce death and injury on transportation systems. Areas of concern include: 1) the advancement of safety management systems, 2) research and technology to improve safety, and 3) models of safety delivery systems.

Chair: Stephanie Malinoff

Standing Committee on Safety Performance and Analysis (ACS20)

Wednesday, Jan 8, 2025 3:45PM - 7:30PM, Marquis Salon 6 (M2) / Marriott Marquis

Scope: This committee deals with the advancement, integration and institutionalization of quantitative highway safety information to support transportation decision-making at all levels. The function of this committee is to foster the continual development, validation and increased knowledge of science-based methods, procedures and measures that will increase the safety of the nation's highways and roadways.

Chair: Derek Troyer

Derek.Troyer@dot.gov

Standing Committee on Traffic Law Enforcement (ACS30)

Tuesday, Jan 07, 2025 8:00AM - 9:45AM, Marquis Salon 12 (M2) / Marriott Marquis

Scope: This committee is concerned with research relating to safety effects of enforcement activity and other traffic supervision measures, including those involving the driver and vehicle.

Chair: Grady Carrick

gcarrick@enforcementengineering.com

Standing Committee on Occupant Protection (ACS40)

Monday, Jan 06, 2025 8:00AM - 9:45AM, Marquis Salon 10 (M2) / Marriott Marquis

Scope: The Occupant Protection Committee monitors, synthesizes, encourages, and disseminates research activities related to the science of occupant protection, in all modes of transportation and around the world, to promote an evolving research agenda that addresses current and future occupant protection priorities. Occupant protection priorities include restraint system performance and efficiency to optimize protection, including biomechanical issues, economic impact to society; and behavioral measures to increase restraint use such as enforcement and education.

Chair: Shashi Nambisan shashi@unlv.edu

Standing Committee on Impairment in Transportation (ACS50)

Monday, Jan 06, 2025 3:45PM - 5:30PM, Marquis Salon 9 (M2) / Marriott Marquis

Scope: This committee is concerned with impairment by alcohol and other drugs, as well as other forms of impairment, as they relate to all significant modes of transportation with particular emphasis on those relationships that are common to more than one mode.

Chair: Tara Casanova Powell taracpc@outlook.com

Standing Committee on Truck and Bus Safety (ACS60)

Wednesday, Jan 8, 2025 8:00AM - 12:00PM, Marquis Salon 10 (M2) / Marriott Marquis

Scope: This committee will focus on motor carrier safety in all its aspects. This will include research and evaluation in human, roadway, vehicle, operational, organizational, and regulatory arenas as they relate to motor carrier safety.

Chair: Mouyid Islam IslamM4@michigan.gov
