- The National Guard and Domestic Response
- Training and Readiness – Myth vs Reality
- Positing the Absurd – December 2005
- The Pandemic ‘Opportunity’

Joint State Response Training System (JSRTS)

(A really Bad acronym for a Really Important Program...)

- Mapping Support
- Individual and Staff Training and Educational Support
- Multiple Staff Collaborative Support

www.JSRTS.org

JSRTS Defined

JSRTS takes a tailored COTS based mapping tool, integrates it with an intuitive, web based staff trainer, and puts both in a government run virtual world, allowing thousands of soldiers, airmen, sailors and civilians to train and collaborate anytime, anywhere, at very low cost

RaSОР-EM - Regional and State Online Resource – Emergency Management

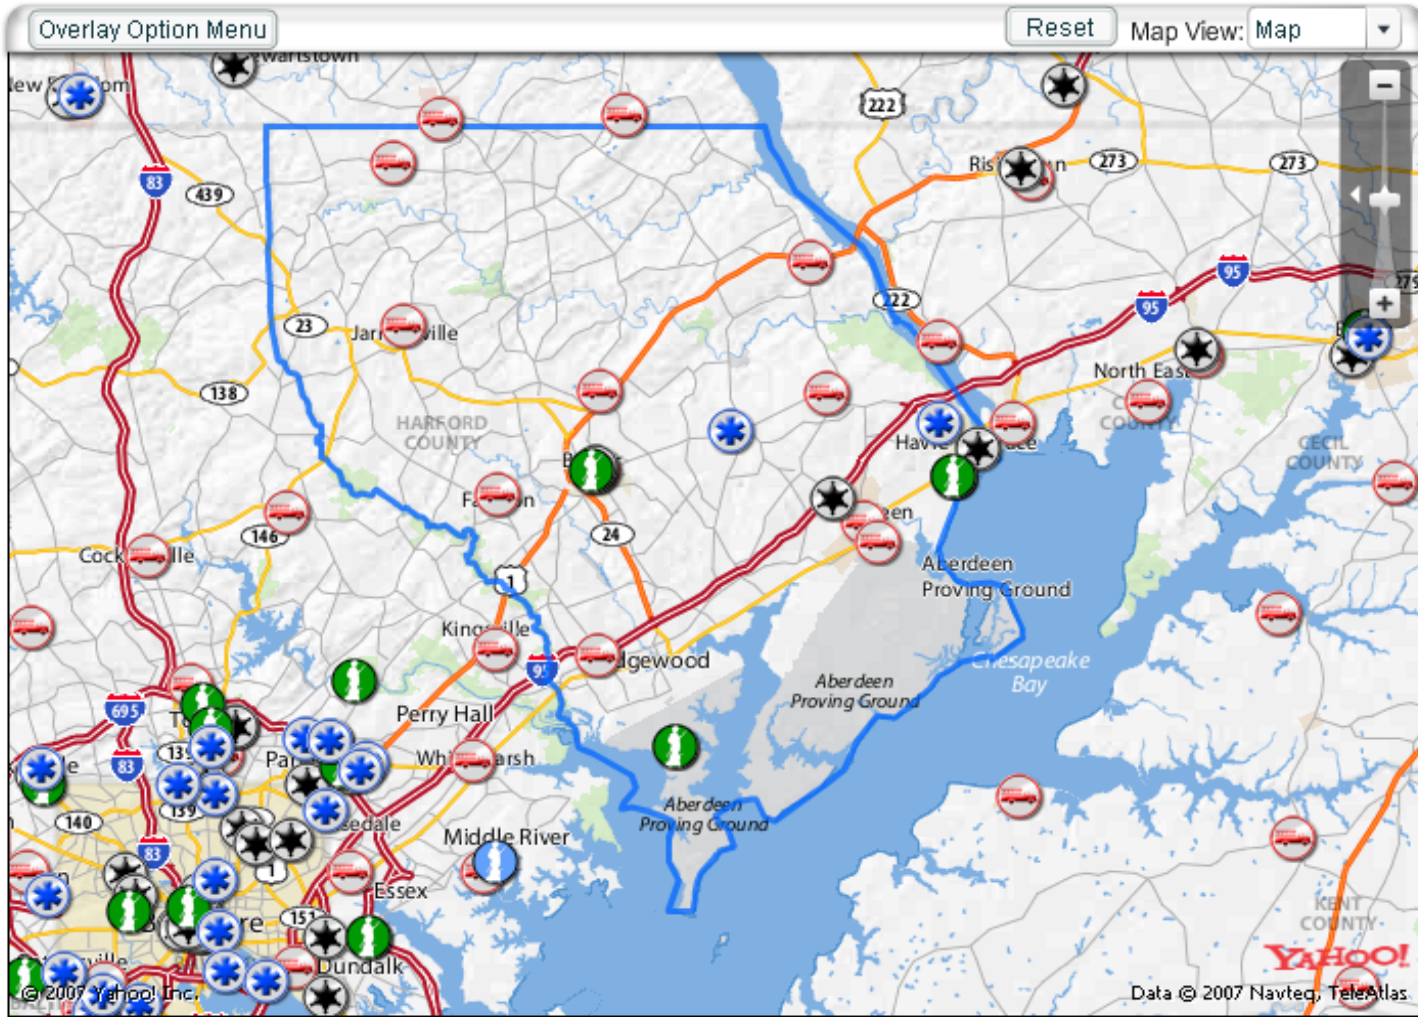

- Data Focused on political jurisdictions – cities, counties, states
- Revolutionary concept – data leveraging, not data mining. 45,000 links to other people's data
- Geo-specific emergency data support for every populated location in the United States
- Easy to use, easy to access, and FREE
- 4,000+users in all 54 States and territories and numerous federal agencies

RaSOR-EM Overlay Sample

United States > Maryland > Harford County

- Hospital
- EMS
- Fire
- Law Enforcement
- Trauma Centers
- Life Flight
- Red Cross

Staff Training Support

EMST – Emergency Management Staff Trainer

- Individual Education (DL Courseware)
- Individual Training Component
- Staff Training Component
- Geo-Specific Training for organizations across the United States
- Modules for State and Local EOCs and National Guard Joint Task Forces – **Transportation Module Coming Soon!!**
- Easy to Use, Easy to Access, and very low cost
- Certification component coming soon

www.emst.jsrts.org

EMST Future Development

- Regional Scenario Development
- Transportation Module and Scenario Development
- Use as a Certification Tool
- Integration into the US Nexus Virtual World

US-Nexus Defined

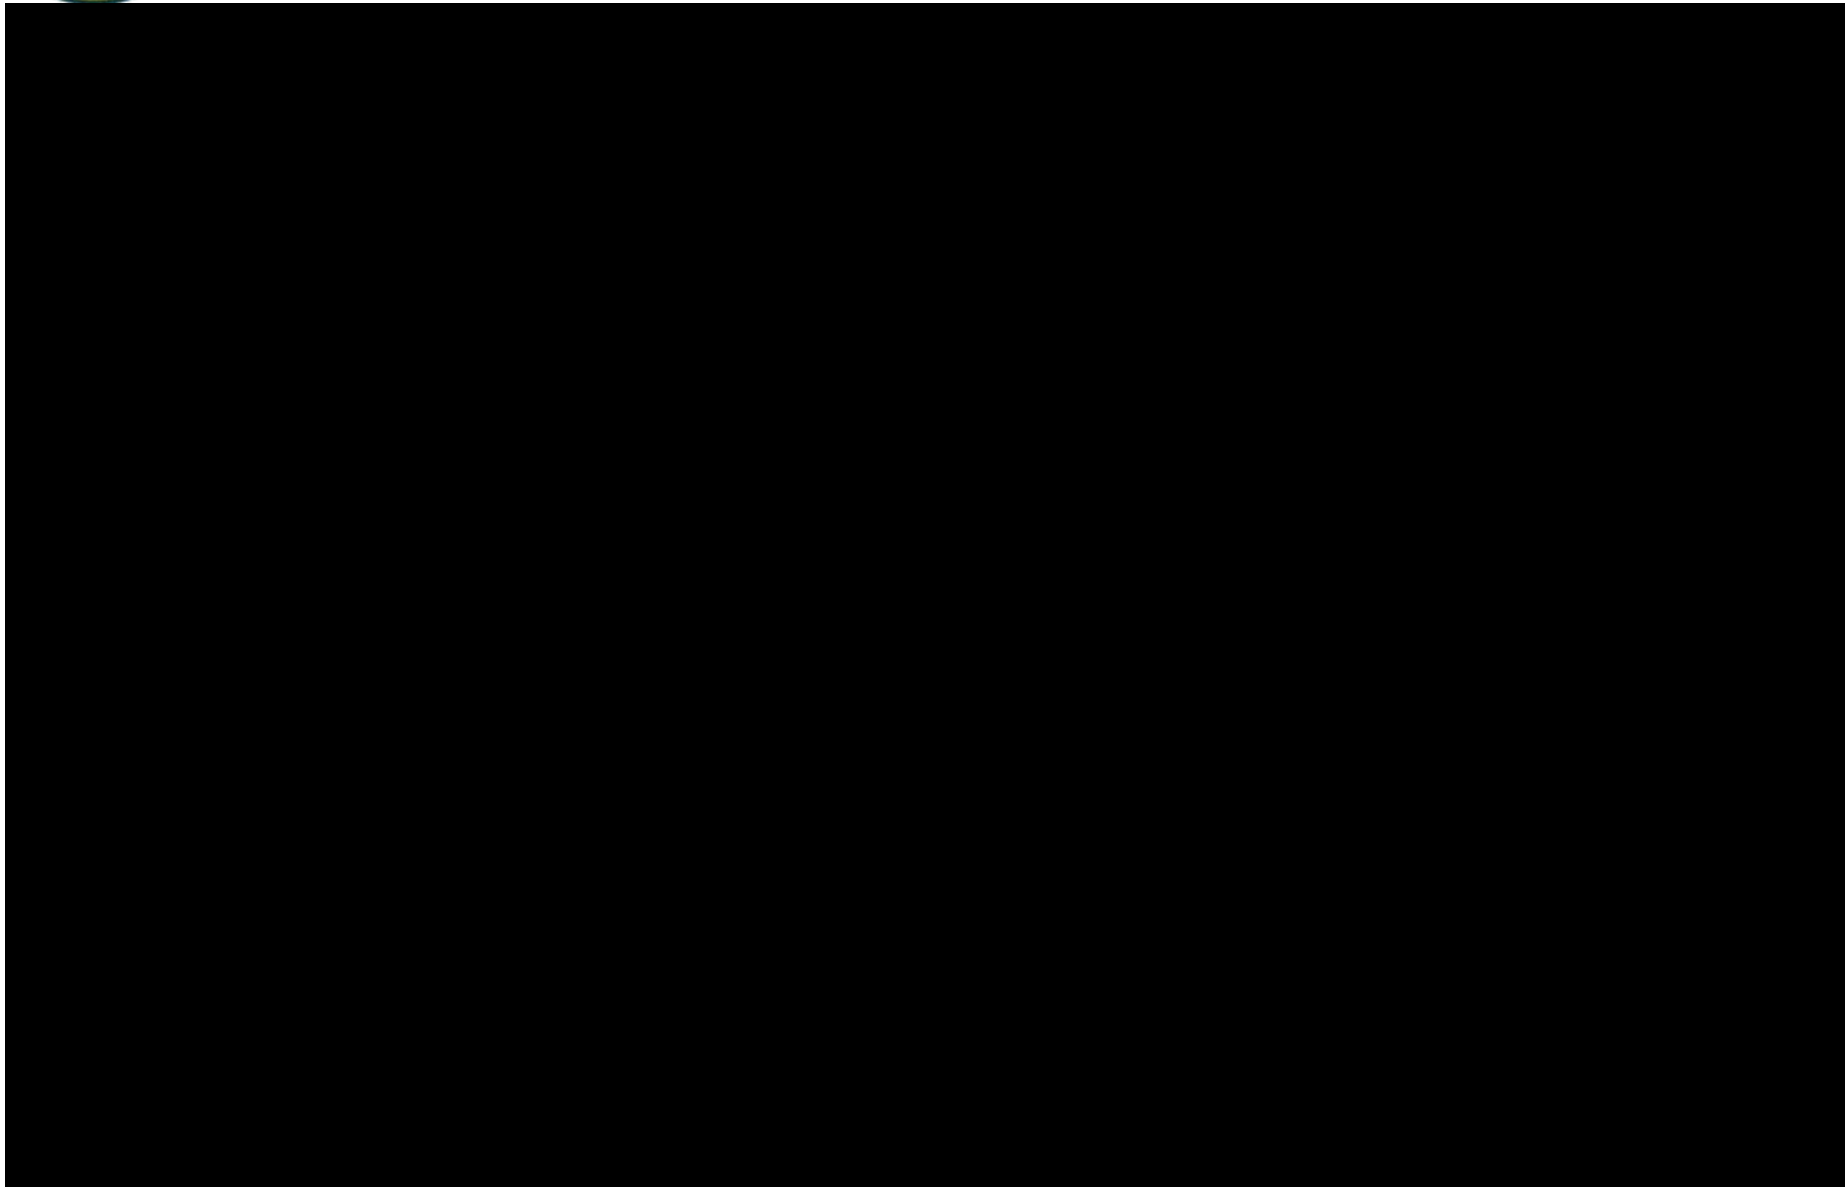

US-Nexus is an avatar driven, local-to-national architecture for government education, training and collaboration

US-Nexus functions as a collaborative workspace, linking users to external media, applications, and each other

Multi-Staff Collaboration

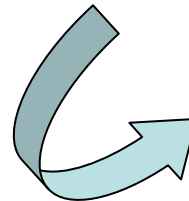

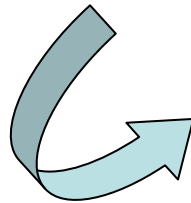

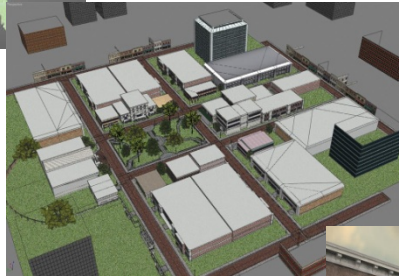

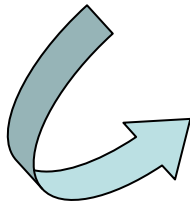

US-Nexus Leverages the Visual Internet

Nexus interface is visual AND intuitive

Joint State Response Training System (JSRSTS)

The Joint State Response Training System (JSRSTS) is a local-to-national virtual architecture for training, collaboration, and education. Focused on the preparation of National Guard personnel for domestic contingencies, JSRSTS also provides a variety of groundbreaking capabilities that span government, including virtual collaborative workspaces, integrated virtual individual and staff training, powerful map-based emergency management data leveraging, and a host of educational opportunities for National Guard and civilian personnel.
