

Public Transportation is a Climate Solution

A typical trip on public transit emits **55% fewer greenhouse gas emissions** than driving or ridehailing alone.

Average GHG Emissions per Passenger Mile

Did you know?

- Public transportation is a low-carbon solution for passengers, and it has gotten better over time.
- Emissions per passenger mile in 2018 were 26% lower than in 2005.
- Transit kept pace with auto efficiency improvements over the last decade.
