

## SEARCHING TRID FOR DATASETS

TRID's coverage now includes datasets. To limit searches to datasets:

- From the [TRID home page](#), select [add additional filters](#) under the *Search by keyword* box
- Using the *Results Type* dropdown menu, select **Datasets**

The screenshot shows a search filter interface. At the top is a dropdown menu labeled 'Result Type' with a circled 'i' icon. The dropdown is open, showing a list of options: 'Datasets' (selected and highlighted in blue), 'All publications and projects', 'Articles and papers', 'All publications', 'Reports, books, and collections', and 'Projects'. Below the dropdown are five buttons: '1 Mo', '1 Yr', '5 Yr', 'All', and 'Custom'. At the bottom of the interface is a section labeled 'Date Range Type' with two radio buttons: 'Published / Project Start Date' (selected) and 'Record Created Date'.

- Populate as many fields as necessary to focus your search, and click **Apply**

### Other things to know about datasets in TRID:

- Datasets described in TRID frequently support a U.S. Department of Transportation-funded technical report, but can also describe a "standalone" dataset with no accompanying report.
  - Dataset records will indicate either: '[dataset]' OR '[supporting dataset]' in the title field.
- All dataset records will contain a **Dataset URL**. Dataset records that support a final report will also contain a **Record URL** that links to full text of the report.
- TRID's dataset indexing primarily describes datasets arising from U.S. Department of Transportation-managed research and development (R&D) programs.
- Records describing final reports will also contain links to supporting datasets if applicable.
