TRANSPORTATION RESEARCH BOARD 2022 EXECUTIVE COMMITTEE*

OFFICERS
Chair: Nathaniel P. Ford, Sr., Chief Executive Officer, Jacksonville Transportation Authority, Jacksonville, FL
Vice Chair: Shawn Wilson, Secretary, Louisiana Department of Transportation and Development, Baton Rouge
Executive Director: Neil J. Pedersen, Transportation Research Board, Washington, DC

MEMBERS
Michael F. Ableson, CEO, Arriva Automotive–North America, Detroit, MI
James F. Albaugh, President and Chief Executive Officer, The Boeing Company (retired), Scottsdale, AZ
Douglas C. Ceva, Vice President, Customer Lead Solutions, Prologis, Inc., Jupiter, FL
Marie Therese Dominguez, Commissioner, New York State Department of Transportation, Albany
Ginger Evans, President, Tower Consulting, LLC, Arlington, VA
Michael F. Goodchild, Professor Emeritus, Department of Geography, University of California, Santa Barbara
Diane Gutierrez-Scacetti, Commissioner, New Jersey Department of Transportation, Trenton
Stephen W. Hargarten, Director, Injury Research Center, Associate Dean, Office of Global Health, Professor, Emergency Medicine, Medical College of Wisconsin, Milwaukee
Chris T. Hendrickson, Hamirschlag University Professor of Engineering Emeritus, Carnegie Mellon University, Pittsburgh, PA
Randell Iwasaki, Leader of State and Local Transportation, Amazon Web Services, Walnut Creek, CA
Ashby Johnson, Executive Director, Capital Area Metropolitan Planning Organization (CAMPO), Austin, TX
Joel M. Jundt, Secretary of Transportation, South Dakota Department of Transportation, Pierre
Drew Kodjak, Executive Director, International Council on Clean Transportation, Washington, DC
Carol A. Lewis, Professor, Transportation Studies, Texas Southern University, Houston
Julie Lorenz, Secretary, Kansa Department of Transportation, Topeka
Michael R. McClellan, Vice President, Strategic Planning, Norfolk Southern Corporation, Norfolk, VA
Patrick K. McKenna, Director, Missouri Department of Transportation, Jefferson City
Craig E. Philip, Research Professor and Director, VECToR, Department of Civil and Environmental Engineering, Vanderbilt University, Nashville, TN
Steward T.A. Pickett, Distinguished Senior Scientist, Cary Institute of Ecosystem Studies, Millbrook, NY
Leslie S. Richards, General Manager, Southeastern Pennsylvania Transportation Authority (SEPTA), Philadelphia
James M. Tien, Distinguished Professor and Dean Emeritus, College of Engineering, University of Miami, Coral Gables, FL

EX OFFICIO MEMBERS
Michael R. Berube, Deputy Assistant Secretary for Sustainable Transportation, U.S. Department of Energy, Washington, DC
Amit Bose, Administrator, Federal Railroad Administration, Washington, DC
Carlos M. Braceras, Executive Director, Utah Department of Transportation, Salt Lake City
Tristan Brown, Deputy Administrator, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, Washington, DC
Steven Cliff, Deputy Administrator, National Highway Traffic Safety Administration, Washington, DC
Richard Corey, Executive Officer, California Air Resources Board, Sacramento
Nuria I. Fernandez, Administrator, Federal Transit Administration, Washington, DC
LeRoy Gishi, Chief, Division of Transportation, Bureau of Indian Affairs, U.S. Department of the Interior, Germantown, MD
Martha R. Grabowski, McDevitt Distinguished Chair in Information Systems, Le Moyne College, Syracuse, NY, and Senior Research Scientist, Rensselaer Polytechnic Institute, Troy, NY
John T. Gray II, Senior Vice President, Policy and Economics, Association of American Railroads, Washington, DC
Robert C. Hampshire, Deputy Assistant Secretary for Research and Technology, U.S. Department of Transportation, Washington, DC
Robin Hutcherson, Deputy Administrator, Federal Motor Carrier Safety Administration, Washington, DC
Eleftheria Kontou, Assistant Professor, University of Illinois at Urbana-Champaign, Urbana, and Chair, TRB Young Members Coordinating Council
Stephanie Pollack, Deputy Administrator, Federal Highway Administration, U.S. Department of Transportation, Washington, DC
Craig A. Rutland, U.S. Air Force Pavement Engineer, U.S. Air Force Civil Engineer Center, Tyndall Air Force Base, FL
Susan A. Shaheen, Professor and Co-Director, Transportation Sustainability Research Center, University of California, Berkeley
Karl Simon, Director, Transportation and Climate Division, U.S. Environmental Protection Agency, Washington, DC
Paul P. Skoufias, President and CEO, American Public Transportation Association, Washington, DC
Polly Trottenberg, Deputy Secretary of Transportation, U.S. Department of Transportation, Washington, DC
Jim Tymon, Executive Director, American Association of State Highway and Transportation Officials, Washington, DC

* Membership as of May 2022.
3 New Technologies in Highway Construction

**Hala Nassereddine**

In this special issue, TR News looks at new technologies that support highway construction. Some concerns of the past, such as lagging productivity and aging infrastructure, continue to affect the industry. But, despite these and other challenges, new technology is driving industry reinvention and taking the future of highway construction in a positive direction.

5 Cyberphysical Systems: Innovative Applications for Highways

**Nazila Roofigari-Esfahan**

Cyberphysical systems—a combination of computerized and physical components—are a central part of many industries, including manufacturing, smart infrastructure, and transportation. However, limited educational and training programs are hindering its full-scale adoption. The author looks at the benefits and addresses the challenges of implementing this technological innovation.

11 Preparing for Digital Twins

**Francesca Maier**

As digital twins—virtual models of a physical object or system—gain popularity, their usefulness in aiding the transition from paper plans to 3-D models and organizing crucial asset information is becoming clear. The author presents compelling evidence that the pursuit of digital twins is time well spent.

16 Augmented Reality: Existing Capabilities and Future Opportunities

**Fernando Moreu, Kaveh Malek, Elijah Wyckoff, and Ali Mohammadkhorsani**

In the infrastructure industry, augmented reality is being applied to reality—such as an aging structure—to add virtual information, like a crack pattern on that structure from a prior inspection. The result is an annotated, mixed image projection right before the user’s eyes via a special headset. The authors describe how this technology is revolutionizing inspections.

22 Digital Eyes in the Skies: Machine Learning for Uncrewed Aerial Missions

**Paul Wheeler and Bharathwaj Sankaran**

Agile and maneuverable, uncrewed aircraft systems can inspect transportation assets for signs of damage or wear without endangering road crews or impeding traffic. Machine learning allows these specialized drones to react better to repeated conditions or tasks, while potentially saving budget dollars and decreasing the time it takes to perform inspections.

26 Building Information Modeling for Infrastructure: Crafting a Smarter Transportation Future

**Alexa Mitchell**

The recent infusion of billions in infrastructure funds means an uptick of new transportation projects. It also means that industry professionals must work more efficiently. The author describes how 3-D digital technology—known as building information modeling—can help the industry achieve just that.

30 E-Ticketing: The Fast Lane in Highway Construction Technology

**Roy Sturgill and Gabriel B. Dadi**

Searching for ways to work faster, smarter, and with less frustration, the construction industry is picking up speed in its move from paper to electronic project management. The authors describe e-ticketing and how it is taking hold.

**Cover** Digital technology is the driving force behind highway construction innovations. The ability to see in 3-D via enhanced modeling technology is arming construction project designers with the means to produce more precise plans, manage materials, and track and organize data. Such technology is only part of the innovations in use now or just down the road in highway construction. (iStock)
COVID-19 Changed Business-As-Usual for State DOTs: How Nebraska DOT Responded

Lorraine Legg

The COVID-19 pandemic hit just as Nebraska DOT’s 2020 construction season was getting into gear. That meant moving quickly to adapt to directed health measures while pushing forward on projects. The author relates how the department successfully responded and the lessons learned in the process.

TRB Highlights

TRB COVID-19 Resources

Agencies and organizations can use TRB publications and online resources for useful and timely information to help address issues related to the COVID-19 pandemic. To read about TRB’s current research and activities, and for a list of relevant publications, visit www.nationalacademies.org/trb/blog/transportation-in-the-face-of-communicable-disease.

Coming Next Issue

The September–October 2022 issue of TR News features a variety of perspectives on decarbonizing transportation. This theme issue is unique in that authors present thought-provoking discussions—some reflecting decidedly strong opinions—on a controversial subject. One author presents ideas on how growth in transportation electrification may increase energy to power grids while furthering decarbonization. Another author poses the challenge California faces in its efforts to reduce greenhouse gases by getting drivers off the roads. Other authors outline the research needed to support carbon reduction in aviation.

All give readers a lot to consider as we move toward a zero-emissions future.

Plugged in and powering up, an electric vehicle will soon be back on the road. Such vehicles have a role to play in the quest to reduce the transportation industry’s carbon footprint.

TR NEWS

features articles on innovative and timely research and development activities in all modes of transportation. Brief news items of interest to the transportation community are also included, along with profiles of transportation professionals, meeting announcements, summaries of new publications, and news of Transportation Research Board activities.
